Be patient.
Things will change.
It will be better.

Leading Systems
Barry Oshry, 1999 Accessible full of real life examples and beautifully written by a pioneer in systems thinking A systems framework based not on hopes and dreams but on thirty years of research on what systems really are Speaks to leadership in the family community organization and nation For over thirty years Barry Oshry has uncovered core truths about how we operate in large organizations through the Power Lab an experiential program that has been called The World Series of Leadership Development Activities In Leading Systems Oshry reveals the lessons he has derived from his Power Lab experiences experiences that have been central to his innovative insights about human systems and system leadership Oshry maintains that the next evolutionary challenge for human beings is to recognize ourselves as system creatures see how system processes shape our experiences and develop the knowledge and skills to master these processes rather than be victims of them Drawing on his Power Lab experiences he reveals the possibilities of systems leadership and how effective leadership can provide the basis for creating sane healthy effective social systems Challenging conventional thinking Oshry shows the limitations of consensus the importance of unilateral action and the restrictions that our values such as egalitarianism liberalism conservatism can place on power He reveals how the problems we often believe are personal or peculiar to our system or circumstances are in fact systemic limiting the possibilities of both individuals and the system as a whole and he demonstrates what it takes to break out and elevate ourselves and our systems to higher levels of possibility Perhaps most importantly Oshry shares his experience in discovering what he calls exhilarating concepts and shows how these concepts offer unusual insights into the nature of systems shedding light on everything from organizational dysfunction

to the conflicts that occur along lines of race gender sexual orientation and ethnicity It is only through this deep knowledge Oshry says that system leaders can elevate their systems to those higher levels of possibility to which we aspire Offering new directions *Leading Systems* is essential reading for anyone who wants a deep understanding of how systems work and how to exert enlightened leadership

Shouting in a Cage Sofia Fenner, 2023-07-11 Durable authoritarian rule often rests on the co optation of challengers The conventional story is straightforward rulers entice opposition groups to sell out offering them benefits if they set aside their antiauthoritarian aspirations and become part of the system However co optation does not always neutralize former adversaries and even seemingly domesticated opponents can turn on their rulers Co optation does weaken opposition but it is not as simple reliable or transactional as existing theories claim *Shouting in a Cage* offers new ways to understand co optation s power and its limits by examining two co opted parties the Wafd Party in

Egypt and the Istiqlal Party in Morocco Sofia Fenner argues that co optation is less a corrupt bargain than a discursive contest a clash of competing interpretations Co opted parties conjure up imagined futures in which their short term choices will lead to the realization of their long term democratic goals Meanwhile other actors point to the disconnect between these parties antiauthoritarian aspirations and their participation in authoritarian systems Fenner demonstrates that co opted parties come to look hypocritical precisely because they refuse to give up their oppositional commitments Their credibility sapped they become unappealing allies and eventually political afterthoughts However such parties retain a surprising capacity for opposition rooted in the literal and metaphorical idea of party as family Based on extensive archival research and ethnographic fieldwork in North Africa Shouting in a Cage broadens our understanding of political behavior under authoritarianism Smiling on a Troubled Planet David O.
