American Playgrounds Susan G. Solomon, 2005 A compelling history a manifesto and a manual for change **Louis I Khan Beyond Time and Style** Carter Wiseman, 2007-02-27 The first in depth biographical study of the brilliant but elusive architect who fundamentally redefined twentieth century architecture Now ranked with Frank Lloyd Wright Le Corbusier and Mies van der Rohe Louis I Kahn brought a reverence for history back into modern architecture while translating it into a uniquely contemporary idiom Drawing on more than one hundred interviews with colleagues coworkers clients and family members and illustrated with many previously unpublished photographs this book documents the uniquely American rise of a poor immigrant to the pinnacle of the international architectural world It illuminates the richly diverse personal relationships Kahn had with such clients as Jonas Salk and Paul Mellon and the romantic entanglements that mystified even those closest to him While celebrating the genius of Kahn's art the book provides an invaluable portrait of the man who created it **The Architecture of Bathing** Christie Pearson, 2020-10-06 A celebration of communal bathing swimming pools saunas beaches ritual baths sweat lodges and more viewed through the lens of architecture and landscape We enter the public pool the sauna or the beach with a heightened awareness of our bodies and the bodies of others The phenomenology of bathing opens all of our senses toward the physical world entwined with the social while the history of bathing is one of shared space in both natural and built environments In *The Architecture of Bathing* Christie Pearson offers a unique examination of communal bathing and its history from the perspective of architecture and landscape Engagingly written and richly illustrated with more than 260 illustrations many in color *The Architecture of Bathing* offers a celebration of spaces in which public and private sacred and profane ritual and habitual pure and impure nature and culture commingle Pearson takes a wide ranging

view of her subject drawing on architecture art and literary works Each chapter is structured around an architectural typology and explores an accompanying theme for example tub sensuality river flow waterfall rejuvenation and banya immersion Offering examples introducing relevant theory and recounting personal experiences Pearson effortlessly combines a practitioner's zest with astonishing erudition As she examines these forms we see that they are inextricable from landscapes bodily practices and cultural production Looking more closely we experience architecture itself as an immersive material and social space embedded in the interdependent environmental and cultural fabric of our world

The Architecture of Ruins Jonathan Hill, 2019-03-25 The Architecture of Ruins Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin's incomplete and broken forms expand architecture's allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change
