Rodrigues,2025-01-16 The topic of loving relationships is one of the most important and often problematic areas of people s lives Unfortunately such importance is best perceived when relationships are unsatisfactory and or threatened by the possibility of an imminent breakup When that happens our mood our ability to concentrate our energy our work and our health among other dimensions of our lives can be profoundly affected Although contemporary love life appears to be markedly different from that of predecessor generations given the wide range of current relationships as the hook up living together separate cohabitation virtual love or even betrayal among many other forms of loving interaction we live in a time when relationships between two or more people it seems need more understanding and more accurate research However studying love scientifically is a hard task because of methodological difficulties and conceptual improprieties intrinsically related to this type of investigation Because it can be considered such a familiar concept many researchers should agree on what love is and how it can be measured But this is not what occurs After all what is love Is it as a psychological phenomenon capable of being scientifically studied by psychology The goal of this Research Topic is to Promote and disseminate publications related to what is conceived scientifically as the Psychology of Love differing from conceptions related to self help and common sense Conceptualize love through psychological science Systematize knowledge about the nature of love and related phenomena such as jealousy shyness inhibition infidelity and other related topics Understand conceptualizations of love and relationship dynamics of people in monogamous and consensually non monogamous relationships Research the establishment and maintenance of romantic relationships and try to understand scientifically the role of love in marital satisfaction      *The Oxford Handbook of Close Relationships* Jeffry A. Simpson,Lorne Campbell,2013-05-02 This book

provides an in depth and comprehensive summary of the psychology of close relationships and showcases classic and contemporary theories models and empirical research that have been conducted in the field      **The Handbook of Sexuality in Close Relationships** John H. Harvey,Amy Wenzel,Susan Sprecher,2004-04-26 Although sexuality is an integral part of close romantic relationships research linking these two constructs has been less systematic than other areas pertaining to close relationships To date researchers in communication sociology family studies psychology and psychiatry have made significant advances in both of these fields The editors goal is to integrate this research into one volume They bring together major scholars from the diversity of fields working on close relationship topics to examine past contributions and new directions in sexuality The emphasis is on theoretical integration and stimulation methodological rigor and critical analysis This volume explores early sexual experiences and their impact on late life sexuality how life s stresses impact sexuality and satisfaction with closeness the affect of postpartum depression on sexuality and the relationship between control power anger as well as revenge and sexual processes in couples The Handbook of Sexuality in Close Relationships is

### **The Psychology of Love and Hate in Intimate Relationships**

Katherine Aumer,2016-06-23 Social psychology has made great advancements in understanding how our romantic relationships function and to some extent dissolve However the social and behavioral sciences in much of western scholarship often focus exclusively on the more positive aspects of intimate relationships and less so on more controversial or unconventional aspects The goal of this volume is to explore and illuminate some of these underrepresented aspects aspects such as non monogamy female orgasm sadism and hate that often function alongside love in intimate relationships Ultimately by looking at intimate relationships in this way the volume contributes to and advocates for a more holistic and comprehensive view of intimate relationships Throughout the volume contributors from social clinical and evolutionary psychology cover love and hate from a variety of sometimes opposing perspectives The first section covers love and the changing landscape of intimate relationships Its chapters review the current literature and research of understudied topics like non monogamy female orgasm sexual fantasies and the viewpoint of love as something other than positive The second section explores hate and how hate can

operate in intimate relationships for example the appearance of sadistic behavior and debates the nature of hate as either a motivation or emotion The volume concludes by looking at ways in which the appearance of hate in relationships can be dealt with and overcome successfully Taken together these two sections reflect the full variety of experiences within intimate relationships With the aim of exploring how love and hate can and frequently do work together The Psychology of Love and Hate in Intimate Relationships is a fascinating psychological exploration of intimate relationships in modern times It is an invaluable resource to academics and students specializing in psychology gender and sociology including clinicians and therapists and all those interested in increasing our knowledge of intimate relationships The Psychology of Human Sexuality Justin J. Lehmiller, 2019-02-22

Many topics within the study of close relationships are relevant to positive psychology such as love friendship social support and forgiveness However very little has been done to specifically connect and thus expand these two interrelated and rapidly growing fields Positive Psychology of Love fills this void by bringing together the latest research and theory in the field of close relationships from a positive psychology point of view suggesting how we can have more fulfilling close and intimate relationships and how these relationships may enhance our lives Each of the chapters focuses on a different aspect of close and intimate relationships as related to positive psychology such as romantic love friendship positive emotions sexuality
