Shaheen,2023-11-27 The perennial enigma the human mind has been encountering is the meaning of life and its place in the universe On this subject science and spirituality remained in discord with each other particularly for the last couple of centuries The Theory of Relativity followed by quantum mechanics changed the worldview of traditional mindset altogether The postulates of quantum physics paved the way for growing interest in philosophical spirituality Theoretical physicist Fritjof Capra s book The Tao of Physics explored parallels between Eastern mysticism and modern science Toshihiko Izutsu in his book Sufism and Taoism found similarities between Taoism and Muslim mysticism or Sufism The book under review attempts to discover compatibility between Sufism and modern cosmology It is basically a research book with more than seven hundred 700 citations of authorities of various disciplines drawing from a vast array of diverse fields such as physics philosophy biology psychology and spirituality The book probes into the nature and value of existence which ultimately leads to the direction of interconnection of the universe and human psyche unity and integration of all things and ultimately the unity of the whole universe and the whole person These views are not placed on the shaky foundations of faith but they are based on philosophical logic and scientific facts regarding importance of man as an observer in the universe despite appearing insignificant on a point like planet in the stunning vastness of empty space and magnificent integration and harmony of the human psyche with the cosmos These aspects of the book are unique in the sense that they amazingly reveal commonalities between physical and spiritual concepts and explain the phenomenon of existence as a compact whole in a coherent and logical sequence with a glimpse of futuristic existence This book may be of particular interest to the academia research scholars and students who may find the contents of the book unique and even startling The author of the book is a

Love's Oneing Kerrie Hide, 2022-11-08

Grounded in Christian love mysticism, Love's Oneing gives voice to the luminous consciousness that awakens from within our oneness in God in contemplation. With great sensitivity, the book offers nuanced insight into the marriage of kenosis and desire in contemplation through the rich tapestry of writings from nine mystics: Julian of Norwich, the Cloud of Unknowing, author Meister Eckhart, Mechthild of Magdeburg, Clare of Assisi, John of the Cross, Teilhard de Chardin, Beatrice Bruteau, and Ilia Delio. With the delicate eye of a spiritual director immersed in mystical literature, Kerrie Hide situates these mystical teachings within contemplative prayer whilst offering a scholarly exploration of contemplative practice to embody the insights. Deeply grounded in traditional and contemporary mystical classics, Hide celebrates how the Christian mystical tradition lays a foundation for the evolutionary growth of communion, consciousness, and the insights of quantum science, highlighting key moments in contemplation that when surrendered into open, into divine love. Born of intellectual reflection, lived experience, and contemplative wisdom, Love's Oneing makes a unique contribution to the existing literature on contemplation at a time when the recovery of the mystical dimension of life is crucial for the future of our planet in this climate crisis moment.

Love as Common Ground Paul S. Fiddes, 2021-09-23

This book explores the way in which the study and practice of love creates a common ground for different faiths and different traditions within the same faith. For the contributors, common ground in this context is not a minimal core of belief or a lowest common denominator of faith, but a space or area in which to live together, consider together the meaning of the love to which various faiths witness and work together to enable human flourishing. Such a space, the contributors believe, is possible because it is the place of encounter with the divine. This book is the fruit of a Project for the Study of Love in Religion, which aims to create this space in which different traditions of love converge from Islam, Judaism, and the Christianity of both East and West. Tools employed by the contributors in exploring this space of love include exegesis of ancient texts, theology, accounts of mystical experience, philosophy, and evolutionary science of the human. Insights about human and divine love that emerge include its nature as a form of knowing, its sacrificial and erotic dimensions, its inclination towards beauty, its making of community, and its importance for a just political and economic life.
