Karl Marx and the Intellectual Origins of Dialectical Materialism J. White,1996-10-25 The book provides a genealogy of dialectical materialism by tracing the development of Marxist ideas from their origins in German philosophical thought to the ideology of the social democratic groups in Russia in the 1890s from which Lenin and the revolutionary generation emerged It reconstructs Marx s original conceptions and examines the modifications that were made to them by himself and by his Russian followers which eventually gave rise to the doctrine of dialectical materialism first expounded by Plekhanov

Dialectical Passions Gail Day,2010-12-22 Representing a new generation of theorists reaffirming the radical dimensions of art Gail Day launches a bold critique of late twentieth century art theory and its often reductive analysis of cultural objects Exploring core debates in discourses on art from the New Left to theories of critical postmodernism and beyond Day counters the belief that recent tendencies in art fail to be adequately critical She also challenges the political inertia that results from these conclusions Day organizes her defense around critics who have engaged substantively with emancipatory thought and social process T J Clark Manfredo Tafuri Fredric Jameson Benjamin H D Buchloh and Hal Foster among others She maps the tension between radical dialectics and left nihilism and assesses the interpretation and internalization of negation in art theory Chapters confront the claim that exchange and equivalence have subsumed the use value of cultural objects and with it critical distance and interrogate the proposition of completed nihilism and the metropolis put forward in the politics of Italian operaismo Day covers the debates on symbol and allegory waged within the context of 1980s art and their relation to the writings of Walter Benjamin and Paul de Man She also examines common conceptions of mediation totality negation and the politics of anticipation A necessary unsettling of received wisdoms *Dialectical Passions* recasts emancipatory reflection in aesthetics art and architecture

Recovering the Later Georg Lukács Matthew J. Smetona,2023-04-25 New resources for the critique of capitalism in culture from the late writings of Georg Luk cs one of the first authors in the tradition of Western Marxism The Hungarian literary critic philosopher and Marxist social theorist Georg Luk cs is best known for his 1923 *History and Class Consciousness* in which he offered an influential critique of reification from the standpoint of a dialectical conception of totality While Luk cs s early works have been central to the study of Marxist thought his later works have often been dismissed as political accommodations to Stalinism In this new study Matthew Smetona argues for a revisionist interpretation of Luk cs s later writings on topics as diverse as aesthetics politics and

ontology Smetona demonstrates that these writings reveal a methodological unity that follows directly from History and Class Consciousness in which realism in both literary and extraliterary senses becomes the basis for the critique of reification As Lukács had demonstrated reification is that process by which the social relations between persons seem to take on the character of a thing Rooted in Marx's concept of commodity fetishism the critique of reification proved in Lukács's hands to be a flexible tool capable of clarifying all manner of obfuscations that arise within the social relations that capitalism produces To recover the later work of Lukács is to open up new horizons for Marxist cultural criticism

Georg Lukács's Philosophy of Praxis Konstantinos Kavoulakos, 2018-09-20 Georg Lukács early Marxist philosophy of the 1920s laid the foundations of Critical Theory However the evaluation of Lukács philosophical contribution has been largely determined by one sided readings of eminent theorists like Adorno Habermas Honneth or even Lukács himself This book offers a new reconstruction of Lukács early Marxist work capable of restoring its dialectical complexity by highlighting its roots in his neo Kantian pre Marxist period In his pre Marxist work Lukács sought to articulate a critique of formalism from the standpoint of a dubious mystical ethics of revolutionary praxis Consequently Lukács discovered a more coherent and realistic answer to his philosophical dilemmas in Marxism At the same time he retained his neo Kantian reservations about idealist dialectics In his reading of historical materialism he combined non idealist non systematic historical dialectics with an emphasis on conscious collective transformative praxis Reformulated in this way Lukács classical argument plays a central role within a radical Critical Theory

Imre Lakatos and the Guises of Reason John Kadvany, 2001-04-09 An exploration of the philosophy of science and mathematics of Hungarian emigre Imre Lakatos demonstrating its contemporary relevance

Hegemony and Revolution Walter L. Adamson, 1983-01-01 As a result of his inquiry into the nature of class culture and the state Antonio Gramsci became one of the most influential Marxist theorists *Hegemony and Revolution* is the first full fledged study of Gramsci's Prison Notebooks in the light of his pre prison career as a socialist and communist militant and a highly original Marxist intellectual Walter Adamson shows how Gramsci's concepts of revolution grew out of his experience with the Turin worker councils of 1919 1920 as well as his experience combatting the Fascist movement For Gramsci revolution meant the steady ascension of a mass based educated and organized collective will in which the final seizure of power would be the climax of a broader educative process Success depended on countering not just the coercive power of the existing economic and political order but also the cultural hegemony of the state A counter hegemony for Gramsci required the leadership of an organized political party but at its core lay his conviction that the common people were capable of self enlightenment and could produce an alternative conception of the world that challenged the prevailing hegemonic culture Adamson shows how these ideas which Gramsci developed prior to his imprisonment led him to a highly original concept of subaltern class movements that cohere not just on the basis of economic interest but by virtue of religious ideological regional folkloric and other sorts of cultural ties as well These ideas of Gramsci have had enormous influence on a wide variety of subsequent

cultural theories including postcolonialism and Foucault style analyses of discursive practices **New Dialectics and Political Economy** R. Albritton, J. Simoulidis, 2002-11-29 Many of the leading thinkers on dialectics in the Marxian tradition have collaborated here to put forward and debate challenging new perspectives on the nature and importance of dialectics. The issues dealt with range from the philosophical consideration of the precise nature of dialectical reasoning to dialectics and economic theory and to more concrete concerns such as how dialectics can help us think about globalization, freedom, inflation and subjectivity Toward a Dialectic of Philosophy and Organization Eugene Gogol, 2012-08-22 In this study revolutions and revolutionary movements of the 19th and 20th centuries are examined through the lens of the Hegelian Marxian dialectics and Marx's concept of revolutionary organisation **The Algebra of Revolution** John Rees, 2005-06-23 The Algebra of Revolution is the first book to study Marxist method as it has been developed by the main representatives of the classical Marxist tradition namely Marx and Engels, Luxemburg, Lenin, Lukacs, Gramsci and Trotsky. This book provides the only single volume study of major Marxist thinkers' views on the crucial question of the dialectic connecting them with pressing contemporary political and theoretical questions. John Rees's The Algebra of Revolution is vital reading for anyone interested in gaining a new and fresh perspective on Marxist thought and on the notion of the dialectic Problems of Communism, 1972 Toward a Critical Theory of Nature Carl Cassegård, 2021-01-28 Challenging the normalization of a capitalist reality in which environmental destruction and catastrophe have become second nature, Towards a Critical Theory of Nature offers a bold new theoretical understanding of the current crisis via the work of the Frankfurt School. Focusing on key notions of dialectics, natural history and materialism, a critical theory of nature is outlined in favor of a more traditional Marxist theory of nature, albeit one which still builds on core Marxist concepts to confirm humanity's central place in manufacturing environmental misery. Pre-eminent thinkers of the Frankfurt school including Georg Lukács, Ernst Bloch, Theodor Adorno and Alfred Schmidt are highlighted for their potential to diagnose the interpenetration of capitalism and nature in a way that neither absolutizes nor obliterates the boundary between the social and natural. Further theoretical claims and practical consequences of a critical theory of nature challenge other contemporary theoretical approaches like eco-Marxism, social constructivism and new materialism to situate it as the only approach with genuinely radical potential. The possibility of utopian idealism for understanding and responding to the current climate crisis is carefully measured against the dangers of false hope in setting out realistic goals for change. Environmental change in turn is seen through the prism of recent cultural currents and movements, situating the power of a critical theory of nature in relation to understandings of the Anthropocene, concepts of apocalypse and postapocalypse. This book culminates in a powerful tool for an anti-capitalist critique of society's painfully extractive relationship to a deceptively abstracted natural world **Georg Lukacs: The Fundamental Dissonance of Existence** Timothy Bewes, Timothy Hall, 2011-03-10 The end of the Soviet period, the vast expansion in the power and influence of capital and recent developments in social and aesthetic theory have

made the work of Hungarian Marxist philosopher and social critic Georg Lukács more vital than ever. The very innovations in literary method that during the 80s and 90s marginalized him in the West have now made possible new readings of Lukács, less in thrall to the positions taken by Lukács himself on political and aesthetic matters. What these developments amount to, this book argues, is an opportunity to liberate Lukács's thought from its formal and historical limitations, a possibility that was always inherent in Lukács's own thinking about the paradoxes of form. This collection brings together recent work on Lukács from the fields of Philosophy, Social and Political Thought, Literary and Cultural Studies. Against the odds, Lukács's thought has survived as a critique of late capitalism, as a guide to the contradictions of modernity, and as a model for a temperament that refuses all accommodation with the way things are.

Ideology, Culture & the Process of Schooling Henry A. Giroux, 1984-10

This book lays bare the ideological and political character of the positivist rationality that has been the primary theoretical underpinning of educational research in the United States. These assumptions have expressed themselves in the form and content of curriculum, classroom social relations, classroom cultural artifacts, and the experiences and beliefs of teachers and students. Have existing radical critiques provided the theoretical building blocks for a new theory of pedagogy? The author attempts to move beyond the abstract negative characteristics of many radical critiques, which are often based on false dualisms that fail to link structure and intentionality, content and process, ideology and hegemony, etc. He also is critical of the over-determined models of socialization and the abstract celebration of subjectivity that underlies much of the false utopianism of many radical perspectives. Professor Giroux begins to lay the theoretical groundwork for developing a radical pedagogy that connects critical theory with the need for social action in the interest of individual freedom and social reconstruction.

Author note: Henry A. Giroux is Assistant Professor of Education at Boston University. He is the co-editor of *Curriculum and Instruction Alternatives in Education* and *The Hidden Curriculum and Moral Education*.

The Dialectics of Ecology John Bellamy Foster, 2024-04-01

Explores ecological socialism's potential against capitalist environmental degradation. Today, the fate of the earth as a home for humanity is in question, and yet contends John Bellamy Foster, the reunification of humanity and the earth remains possible if we are prepared to make revolutionary changes. As with his prior books, *The Dialectics of Ecology* is grounded in the contention that we are now faced with a concrete choice between ecological socialism and capitalist exterminism, and rooted in insights drawn from the classical historical materialist tradition. In this latest work, Foster explores the complex theoretical debates that have arisen historically with respect to the dialectics of nature and society. He then goes on to examine the current contradictions associated with the confrontation between capitalist extractivism and the financialization of nature, on the one hand, and the radical challenges to these represented by emergent visions of ecological civilization and planned degrowth, on the other. The product of contemporary ecosocialist debates, *The Dialectics of Ecology* builds on earlier works by Foster, including *Marx's Ecology* and *The Return of Nature*, aimed at the development of a dialectical naturalism and the formation of a path to sustainable human development.

The

Persistence of Critical Theory Gabriel R. Ricci, 2017-07-05 The latest volume of Culture and Civilization gathers contemporary exponents of critical theory specifically those based in the Frankfurt School of social thinking Collectively this volume demonstrates the continuing intellectual viability of critical theory which challenges the limits of positivism and materialism We may question how the theoretical framework of Marxism fails to coordinate with the conditions that defined labor forces as did Max Horkheimer and Theodor Adorno or deliberate on the conditions that justify the claims we make through public discourse as did Jurgen Habermas Or like Axel Honneth we may reflect on recognition theory as a means of addressing social problems Whatever our objective the focus of critical theory continues to be the consciousness of established positive interests that without debate may sustain injustices or conditions which the public may not have chosen to impose Throughout the hardship of punitive dismissal and exile in the 1930s and 40s and the shock of the New Left in the 1960s and 70s and finally the later linguistic and pragmatic turn the Frankfurt School has sustained the idea that people escape disaffection and alienation when their knowledge of the social and political world is dialectically mediated through creative interaction This new volume in the Culture and Civilization series continues the tradition of critical thought
