Lunar Men The Friends Who Made The Future:

The Lunar Men Jennifer S. Uglow, 2002 In the 1760s a group of amateur experimenters met and made friends in the Midlands Most came from humble families all lived far from the centre of things but they were young and their optimism was boundless together they would change the world Among them were the ambitious toy maker Matthew Boulton and his partner James Watt of steam engine fame the potter Josiah Wedgwood the larger than life Erasmus Darwin physician poet inventor and theorist of evolution a forerunner of his grandson Charles Later came Joseph Priestley discoverer of oxygen and fighting radical

The Lunar Men Jennifer Uglow, 2009 Led by Erasmus Darwin the Lunar Society of Birmingham was a group of eighteenth century amateur experimenters The story brings to life this group of inventors artisans and tycoons who shaped and inspired the modern world and kick started the Industrial Revolution

A History of Management Thought Morgen Witzel, 2016-12-16 Of all the sciences and social sciences management is the one that most deliberately turns its back on the past Yet management as we know it today did not spring into life fully formed Management has more than just a present it also has a past and a future and all three are inextricably linked This book charts the evolution of management as an intellectual discipline from ancient times to the present day Contemporary management challenges including sustainability technology and data and legitimacy are analysed through an historical lens and with the benefit of new case studies The author helps readers understand how the evolution of management ideas has interacted with changes in society By framing management's history as one of challenge and response this new edition is the perfect accompaniment for students and scholars seeking meaningful study in the business school and beyond Essential reading as a core textbook in management history the book is also valuable supplementary reading across the humanities and social sciences

The Account Books of the Reimarus Family of Hamburg, 1728-1780 (2 vols.) Almut Spalding, Paul S. Spalding, 2015-09-01 In *The Account Books of the Reimarus Family of Hamburg 1728-1780* Almut Spalding and Paul S. Spalding offer a two volume critical edition of domestic records that open windows onto early modern Europe and the Enlightenment They detail economic realities social circles cultural and educational pursuits leisure activities religious communities and institutions in the life of a great city and a distinguished family Volume one consists of the transcription with an introduction and illustrations Volume two is an extensive index Hermann Samuel Reimarus and his daughter Margareta Elisabeth Elise Reimarus carefully maintained these records over fifty years The former was a notable classicist biblical scholar animal behaviorist and freethinker the latter leader of a literary salon educator translator and author

Cheap Print and Popular Song in the Nineteenth Century Paul Watt, Derek B. Scott, Patrick Spedding, 2017-03-23 This book is a cultural history of the nineteenth century songster pocket sized anthologies of song texts usually without musical notation It examines the musical social commercial and aesthetic functions songsters served and the processes by which they were produced and disseminated the repertory they included and the singers printers and entrepreneurs that both inspired their manufacture

and facilitated their consumption Taking an international perspective chapters focus on songsters from Ireland North America Australia and Britain and the varied public and private contexts in which they were used and exploited in oral and print cultures Stories from Home Margaret Ponsonby,2016-04-01 Most homes in the past were not elite wealthy interiors complete with high fashion furnishings designed by well known architects and designers as many domestic histories often seem to have assumed As this book makes clear there were in fact an enormous variety of house interiors in England during the period 1750 1850 reflecting the location status and gender of particular householders as well as their changing attitudes tastes and aspirations By focusing on non metropolitan homes which represented the majority of households in England this study highlights the need for historians to look beyond prevailing attitudes that often reduce interiors to generic descriptions based on high fashions of the decorative arts Instead it shows how numerous social and cultural influences affected the manner in which homes were furnished and decorated Issues such as the availability of goods gender regional taste income the second hand market changing notions of privacy and household hierarchies and print culture could all have a significant impact on domestic furnishing The study ends with a discussion of how domestic interiors of historic properties have been presented and displayed in modern times highlighting how competing notions of the past can cloud as well as illuminate the issue Combining cultural history and qualitative analysis of evidence this book presents a new way of looking at ordinary and provincial homes that enriches our understanding of English domestic life of the late eighteenth and early nineteenth centuries *The Eighteenth-Century Literature Handbook* Gary Day,Bridget Keegan,2009-09-07 Literature and Culture Handbooks are an innovative series of guides to major periods topics and authors in British and American literature and culture Designed to provide a comprehensive one stop resource for literature students each handbook provides the essential information and guidance needed from the beginning of a course through to developing more advanced knowledge and skills Written in clear language by leading academics they provide an indispensable introduction to key topics including Introduction to authors texts historical and cultural contexts Guides to key critics concepts and topics An overview of major critical approaches changes in the canon and directions of current and future research Case studies in reading literary and critical texts Annotated bibliography including websites timeline glossary of critical terms The Eighteenth Century Literature Handbook is an invaluable introduction to literature and culture in the eighteenth century The Oxford Handbook of Higher Education Systems and University Management S. G. Redding,Antony Drew,Stephen Crump,2019 This Handbook examines the main challenges facing higher education systems in an increasingly turbulent and interconnected world exploring how higher education institutions are managed in changing conditions and the societal implications of different approaches to change **The Aliveness of Plants** Peter Ayres,2015-10-06 The Darwin family was instrumental in the history of botany Their experiences illustrate the growing specialization and professionalization of science in the nineteenth century The author shows how botany escaped the burdens of medicine feminization and the sterility of classification and

nomenclature to become a rigorous laboratory science *The Poetry of Erasmus Darwin* Martin Priestman, 2016-02-24

While historians of science have focused significant attention on Erasmus Darwin's scientific ideas and milieu relatively little attention has been paid to Darwin as a literary writer In *The Poetry of Erasmus Darwin* Enlightened Spaces Romantic Times Martin Priestman situates Darwin's three major poems *The Loves of the Plants* 1789 *The Economy of Vegetation* 1791 and *The Temple of Nature* 1803 and Darwin himself within a large polymathic late Enlightenment network of other scientists writers thinkers and social movers and shakers Interpreting Darwin's poetry in terms of Darwin's broader sense of the poetic text as a material space he posits a significant shift from the Enlightenment's emphases on conceptual spaces to the Romantic period's emphases on historical time He shows how Darwin's poetry illuminates his stance toward all the major physical sciences and his well formulated theories of evolution and materially based psychology Priestman's study also offers the first substantial accounts of Darwin's mythological theories and their links to Enlightenment Rosicrucianism and Freemasonry and of the reading of history that emerges from the fragment poem *The Progress of Society* a first ever printed edition of which is included in an appendix Ultimately Priestman's book offers readers a sustained account of Darwin's polymathic Enlightenment worldview and cognate poetics in a period when texts are too often judged by their adherence to a retrospectively constructed Romanticism *Literature, Science and Exploration in the Romantic Era* Tim Fulford, Debbie

Lee, Peter J. Kitson, 2004-09-02 In 1768 Captain James Cook made the most important scientific voyage of the eighteenth century He was not alone scores of explorers like Cook travelling in the name of science brought new worlds and new peoples within the horizon of European knowledge for the first time Their discoveries changed the course of science Old scientific disciplines such as astronomy and botany were transformed new ones like craniology and comparative anatomy were brought into being Scientific disciplines in turn pushed literature of the period towards new subjects forms and styles Works as diverse as Mary Shelley's *Frankenstein* and Wordsworth's *Excursion* responded to the explorers and scientists latest discoveries This wide ranging and well illustrated study shows how literary Romanticism arose partly in response to science's appropriation of explorers encounters with foreign people and places and how it in turn changed the profile of science and exploration *The First Scientific American* Joyce Chaplin, 2007-08-02 Famous fascinating Benjamin Franklin he would be neither without his accomplishments in science Joyce Chaplin's authoritative biography considers all of Franklin's work in the sciences showing how during the rise and fall of the first British empire science became central to public culture and therefore to Franklin's success Having demonstrated in his earliest experiments and observations that he could master nature Franklin showed the world that he was uniquely suited to solve problems in every realm In the famous adage Franklin snatched lightning from the sky and the scepter from the tyrants in that order The famous kite and other experiments with electricity were only part of Franklin's accomplishments He charted the Gulf Stream made important observations on meteorology and used the burgeoning science of political arithmetic to make unprecedented statements about America's

power Even as he stepped onto the world stage as an illustrious statesman and diplomat in the years leading up to the American Revolution his fascination with nature was unrelenting Franklin was the first American whose genius for science qualified him as a genius in political affairs It is only through understanding Franklin s full engagement with the sciences that we can understand this great Founding Father and the world he shaped *The Genius of Erasmus Darwin* Christopher Upham Murray Smith, Robert Arnott, 2005 *The Genius of Erasmus Darwin* provides insight into the full extent of Erasmus Darwin s exceptional intellect He is shown to be a major creative thinker and innovator one of the minds behind the late eighteenth century industrial revolution and one of the first if not the first to perceive the living world including humans as part of a unified evolutionary scenario The contributions here provide contextual understandings of Erasmus Darwin s thought as well as studies of particular works and accounts of the later reception of his writings In this way it is possible to see why the young Samuel Taylor Coleridge was moved to describe Darwin as the first literary character in Europe and the most original minded man Erasmus Darwin Charles Darwin s grandfather was one of the leading intellectuals of eighteenth century England He was a man with an extraordinary range of interests and activities he was a doctor biologist inventor poet linguist and botanist He was also a founding member of the Lunar Society an intellectual community that included such eminent men as James Watt and Josiah Wedgwood Progress Unchained Peter J. Bowler, 2021-03-04 Bowler traces ideas about progress using evolutionary biology to throw light on parallel changes in the understanding of social development

Movers and Makers Parminder Bhachu, 2021-03-30 We live in times of extreme change There could be no better time than now to interrogate the lives of new kinds of people movers and makers who navigate fragility and uncertainty to create with daring often against great odds Parminder Bhachu uses their dramatic life stories to uncover what makes for creativity and resilience in times of disequilibrium What can be learnt from their creative moxie as innovators outside establishment powers Why has their creative reach grown exponentially in our globally connected twenty first century How have their abilities to innovate been catalyzed without subscription to knowledge hierarchies and monopolies These culturally dexterous movers who possess movement capital advanced with every migration have translated ancient maker and craft skills into transforming modern technology science design architecture and the arts Generous inclusive and deeply collaborative they are at the heart of open source sharing for collective intelligence the common good and the maker movement They invigorate the economies they reside in greatly enhancing creative capacities and reach Bhachu herself a multiple migrant maker offers us a model for a hopeful way forward bringing her unique ethnographic insights to illuminate what can be learnt about thriving in worlds of flux Making the Monster Kathryn Harkup, 2018-02-08 A thrilling and gruesome look at the science that influenced Mary Shelley s *Frankenstein* The year 1818 saw the publication of one of the most influential science fiction stories of all time *Frankenstein or The Modern Prometheus* by Mary Shelley had a huge impact on the gothic horror and science fiction genres and her creation has become part of our everyday culture from cartoons to Halloween costumes Even

the name Frankenstein has become a by word for evil scientists and dangerous experiments How did a teenager with no formal education come up with the idea for such an extraordinary novel Clues are dotted throughout Georgian science and popular culture The years before the book s publication saw huge advances in our understanding of the natural sciences in areas such as electricity and physiology for example Sensational science demonstrations caught the imagination of the general public while the newspapers were full of lurid tales of murderers and resurrectionists Making the Monster explores the scientific background behind Mary Shelley s book Is there any science fact behind the science fiction And how might a real life Victor Frankenstein have gone about creating his monster From tales of volcanic eruptions artificial life and chemical revolutions to experimental surgery monsters and electrical experiments on human cadavers Kathryn Harkup examines the science and scientists that influenced Shelley and inspired her most famous creation **Literary Coteries**

and the Making of Modern Print Culture Betty A. Schellenberg, 2016-06-06 Literary Coteries and the Making of Modern Print Culture offers the first study of manuscript producing coteries as an integral element of eighteenth century Britain s literary culture As a corrective to literary histories assuming that the dominance of print meant the demise of a vital scribal culture the book profiles four interrelated and influential coteries focusing on each group s deployment of traditional scribal practices on key individuals who served as bridges between networks and on the aesthetic and cultural work performed by the group The book also explores points of intersection between coteries and the print trade whether in the form of individuals who straddled the two cultures publishing events in which the two media regimes collaborated or came into conflict literary conventions adapted from manuscript practice to serve the ends of print or simply poetry hand copied from magazines Together these instances demonstrate how scribal modes shaped modern literary production This title is also available as Open Access

Harry Peckham's Tour Harry Peckham, 2008-10-20 Harry Peckham was educated at Winchester College and New College Oxford before being called to the Bar and becoming in time a King s Counsel a Commissioner for Bankrupts and Recorder of Chichester He was also a witty rake a keen sportsman he was a member of the committee that drew up the laws of cricket and a relentless tourist Harry Peckham s Tour is a collection of letters he wrote in 1769 while travelling through the Netherlands Belgium and France and contains insights into the society and culture of the places that he visited including Rotterdam The Hague Amsterdam Antwerp Brussels Ghent Paris Rouen and Calais Perceptive and funny Harry Peckham s Tour is written in a very engaging style and is a delight to read This edition contains a new introduction and notes by Martin Brayne and is the only available version of Peckham s text [Chasing Venus](#) Andrea Wulf, 2012-05-01 A thrilling adventure story San Francisco Chronicle that brings to life the astronomers who in the 1700s embarked upon a quest to calculate the size of the solar system and paints a vivid portrait of the collaborations rivalries and volatile international politics that hindered them at every turn From the author of Magnificent Rebels and New York Times bestseller The Invention of Nature On June 6 1761 the world paused to observe a momentous occasion the first transit of

Venus between the Earth and the Sun in more than a century Through that observation astronomers could calculate the size of the solar system but only if they could compile data from many different points of the globe all recorded during the short period of the transit Overcoming incredible odds and political strife astronomers from Britain France Russia Germany Sweden and the American colonies set up observatories in the remotest corners of the world only to be thwarted by unpredictable weather and warring armies Fortunately transits of Venus occur in pairs eight years later they would have another opportunity to succeed Thanks to these scientists neither our conception of the universe nor the nature of scientific research would ever be the same **Factory** Gillian Darley,2003 Gillian Darley traces the history of the modern factory from the utopian schemes of Robert Owen or Claude Ledoux in the early 19th century through the great modernist cathedrals of industry of Peter Behrens Albert Kahn and Frank Lloyd Wright
