

Introduction:

Legal Education hasn't undergone any fundamental change during the last 150 years. Except for the duration of the courses, and addition of some fundamental subjects, there has been minimal innovation in legal education scenario during all these years. Legal Education in India has remained mostly concentrated on developing legal professionals in a national context. Legal Education has more or less remained a theoretical study, with only minimal content of practical exposure. Experiential learning was given a back bench in actual practice, and many practical courses remain in paper rather than in content. National law school experiment in India which has to an extent revived the interest in legal education has remained elitist and out of reach for children from middle and lower income group.

Since the past few years the roles of lawyers have drastically changed in the society. In the changed scenario, the additional roles envisaged are that of policy planner, business advisor, negotiator among interest groups, expert in articulation and communication of ideas, mediator, lobbyist, law reformer, etc. These roles demand specialised knowledge and skills not ordinarily available in the existing profession. These roles have moved away from being localised and started moving beyond national boundaries. As a result a new genre of globalised legal professionals has evolved who while having a firm understanding of local legal scenario, was able to extend its principles to a global context.

Current State of Indian Legal Education:

While a lot is currently being discussed about the state of legal education in India, with reports from National Knowledge Commission, Law Commission of India, Legal Education Committee of the Bar Council of India, University Grants Committee Special Committee on Legal Education, Expert Committee Appointed by Supreme Court and some state governments [5] it is necessary to draw a sketch of the existing legal education frame work in India.

Currently, law is being looked upon as a national subject. The content of law courses prescribed by the regulators is focused on the national laws rather than on the essential principles. As a result the vision of law students get often confined to national boundaries. On the other hand, the globalisation has made the distinction between various systems of law meaningless, and new avenues in international law, like international criminal law and International Space Law, has cut across national borders.

The Origin of the Task Force

In 1987, at a conference "celebrat[ing] twenty years of effort and achievement since the Ford Foundation . . . set in motion the clinical education movement,"⁶ Justice Rosalie Wahl of the Minnesota Supreme Court, the Chair of the ABA Section of Legal Education and Admissions to the Bar, asked those in attendance to "recommit themselves 'to certain basic principles,' including that of teaching students how to learn systematically from experience and simultaneously to educate them in a broader range of legal analysis and skills than have traditionally been taught."⁷ She asked, "[h]ave we really tried to determine . . . what skills, what attitudes, what character traits, what qualities of mind are required of lawyers?"⁸ In early 1989, Justice Wahl created the Task Force to answer these questions.⁹ After collecting data, holding public hearings, and conducting extensive deliberations over a period of almost three years, the Task Force issued the Report in July 1992.

General Reports of the XVIIIth Congress of the International Academy of Comparative Law/Rapports Généraux du XVIIIème Congrès de l'Académie Internationale de Droit Comparé Karen B. Brown, David V. Snyder, 2011-12-30

This title presents twenty nine topics prepared by leading scholars in more than 20 countries providing a comparative analysis of cutting edge legal topics of the 21st century. Considering topics of vital moment to contemporary legal scholars, the title includes pieces on Surrogate Motherhood, The Balance of Copyright in Comparative Perspective, International Law in Domestic Systems, Constitutional Courts as Positive Legislators, Same sex Marriage, Climate Change and the Law, The Regulation of Private Equity Hedge Funds and State Funds and Regulation of Corporate Tax Evasion. Each chapter surveys legal developments in the U S and Canada, Europe, Asia, Latin and South America, Africa and the Middle East in a format that permits the reader easy access to similarities and differences in the approaches of the selected national regimes. This comprehensive volume tells the story of parallel trends in the evolution of legal doctrine despite jurisdictional, cultural and political barriers. While each of the covered countries stands alone as a sovereign in a technologically advanced world, their disparate systems nonetheless have converged to adopt comparable strategies in dealing with complex legal issues. The volume is a critical addition to the library of any scholar hoping to keep abreast of the major trends in contemporary law.

Loyola University New Orleans College of Law Maria Isabel Medina, 2016-05-18. Maria Isabel Medina's chronicle of Loyola University New Orleans College of Law examines the prominent Jesuit institution across its hundred year history from its founding in 1914 through the first decade of the twenty first century. With a mission to make the legal profession attainable to Catholics and other working class persons, Loyola's law school endured the hardships of two world wars, the Great Depression, the tumult of the civil rights era and the aftermath of Hurricane Katrina to emerge as a leader in legal education in the state. Exploring the history of the college within a larger examination of the legal profession in New Orleans and throughout Louisiana, Medina provides details on Loyola's practical and egalitarian approach to education. As a result of the school's principled focus, Loyola was the first law school in the state to offer a law school clinic, develop a comprehensive program of legal skills training and to voluntarily integrate African Americans into the student body. The transformative milestones of Loyola University New Orleans College of Law parallel pivotal points in the history of the Crescent City, demonstrating how local culture and environment can contribute to the longevity of an academic institution and making Loyola University New Orleans College of Law a valuable contribution to the study of legal education.

Research Handbook on Digital Transformations F. Xavier Olleros, Majlinda Zhegu, 2016-09-30. The digital transition of our economies is now entering a phase of broad and deep societal impact. While there is one overall transition, there are many different sectoral transformations from health and legal services to tax reports and taxi rides, as well as a rising number of transversal trends and policy issues from widespread precarious employment and privacy concerns to market monopoly and

cybercrime They all are fertile ground for researchers as established laws and regulations organizational structures business models value networks and workflow routines are contested and displaced by newer alternatives This Research Handbook offers a rich and interdisciplinary synthesis of some of the current thinking on the digital transformations underway

Reforming Legal Education David M. Moss, Debra Moss Curtis, 2012-11-01 In today's volatile law school environment curriculum reform has emerged as a significant focus It is commonly understood that law schools effectively teach certain analytical skills but are less successful in other areas and often scramble to adapt to evolving aims This book demonstrates how law schools are successfully reforming their curriculum and lays the framework to show how all schools of law can engage in a continuous reform model that proactively shapes our profession It is expected that faculty and professional staff engaged in legal education will utilize this book as a primary resource to guide their respective reform efforts Each contributed chapter presents a case study of a data driven curriculum reform effort The initial chapters set the conceptual context for the book while the final chapter offers summative recommendations for considering legal education reform as derived from the earlier case study chapters This book adds significantly to the literature in legal education as we gain first hand insight into evidence based reform for the legal education community

Reaffirming Legal Ethics Kieran Tranter, Francesca Bartlett, Lillian Corbin, Michael Robertson, Reid Mortensen, 2010-07-02 It has been over thirty years since the founding crises that birthed legal ethics as both a field of study and a discrete field of law In that time thinking about the ethical dimension of legal practice has taken several turns from justifications of zealous advocacy to questions of process and connections to specifically legal values to more recently consideration of legal conduct as part of a wider field of virtue Parallel to this dynamism of thought there has also been significant changes in how legal professions especially within those that possess a common law heritage have been regulated and the values and conceptions of legitimate conduct that has informed this regulation This volume represents an opportunity for a comprehensive review of legal ethics as an international movement Contributors include many of the key participants to the legal ethics field from the United States United Kingdom Canada Australia New Zealand and South Africa including David Luban and Deborah Rhode as well as many of the recognised emerging thinkers The theme of the book is taking stock of the last thirty years of legal ethics practice and scholarship and also a forum for new ideas and new thinking regarding the conduct of lawyers and the moral and social responsibility of the legal profession The contributions also consider the topic of dynamism Over the last decade significant developments in both the expectations of professional conduct and the regulation of the profession has been experienced in all jurisdictions which has seen traditional and once sacred conceptions of lawyering challenged and re-evaluated The contributors also look at the theme of affirmation Within an increasingly complex environment of change and dynamism this volume reaffirms that there is value within the field of legal ethics That is the project of reflecting on the unique ethical and conduct requirements of lawyering can not be submerged into a broader field of applied philosophy management or

regulatory studies While this volume does not deny the opportunities that exist for interdisciplinary engagement with philosophy social science or politics it affirms legal ethics as a legitimate and highly relevant field of inquiry Civil Justice, Privatization, and Democracy Trevor C.W. Farrow,2014-01-01 Privatization is occurring throughout the public justice system including courts tribunals and state sanctioned private dispute resolution regimes Driven by a widespread ethos of efficiency based civil justice reform privatization claims to decrease costs increase speed and improve access to the tools of justice But it may also lead to procedural unfairness power imbalances and the breakdown of our systems of democratic governance Civil Justice Privatization and Democracy demonstrates the urgent need to publicize politicize debate and ultimately temper these moves towards privatized justice Written by Trevor C W Farrow a former litigation lawyer and current Chair of the Canadian Forum on Civil Justice Civil Justice Privatization and Democracy does more than just bear witness to the privatization initiatives that define how we think about and resolve almost all non criminal disputes It articulates the costs and benefits of these privatizing initiatives particularly their potential negative impacts on the way we regulate ourselves in modern democracies and it makes recommendations for future civil justice practice and reform **Teaching Legal Research** Barbara Bintliff,Duncan Alford,2013-09-13 Legal research is a fundamental skill for all law students and attorneys Regardless of practice area or work venue knowledge of the sources and processes of legal research underpins the legal professional s work Academic law librarians as research experts are uniquely qualified to teach legal research Whether participating in the mandatory first year law school curriculum or offering advanced or specialized legal research instruction law librarians have the up to date knowledge the broad view of the field and the expertise to provide the best legal research instruction possible This collection offers both theoretical and practical guidance on legal research education from the perspectives of the law librarian Containing well reasoned analytical articles on the topic the volume explains and supports the law librarian s role in legal research instruction The contributors to this book all experts in teaching legal research challenge academic law librarians to seize their instructional role in the legal academy This book was based on a special issue of Legal Reference Services Quarterly **The Calling of Law** Fiona Westwood,Karen Barton,2016-04-01 As one of the learned professions requiring advanced learning and high principles law enjoys a special standing in society In return for its status and rank the legal profession is expected to exhibit the highest levels of honesty trust and morality the very values which underpin the legal system itself This in turn entrusts to legal education a particular problem of addressing not only the substantive elements of the body of law but a means through which the characteristics of the calling of law are imparted and instilled At a time when the very essence of the legal profession is under threat this book calls for a realignment of the legal curriculum and pedagogies so as to emphasise the development of culture over industry character over eloquence and calling over skill Chapters are grouped around the core content and key themes of Curiosity Calling Character and Conscientiousness Contract and Culture The volume includes contributions from leading experts drawn internationally and

from other professional disciplines in order to present alternative approaches aimed at tackling common issues providing insight and provoking debate
