Machine Intelligence Intelligent Systems Practice And Perspective:

Intelligent Systems, 1982 **Intelligent Systems** Jean E. Hayes, Donald Michie, 1984 **Expert Systems and Related Topics** Marlene A. Palmer, 1990-01-01 This comprehensive reference to all areas of expert systems and applications plus advanced related topics lets you spend your time reading expert systems literature rather than searching for it It gives you a source of historical perspectives and outlooks on the future of the field Whether you are a manager a developer or an end user or researcher Expert Systems and Related Topics Selected Bibliography Guide to Information Sources puts all the sources of expert systems literature at your fingertips **Singularity Hypotheses** Amnon H. Eden, James H Moor, Johnny H Soraker, Eric Steinhart, 2013-04-03 Singularity Hypotheses A Scientific and Philosophical Assessment offers authoritative jargon free essays and critical commentaries on accelerating technological progress and the notion of technological singularity It focuses on conjectures about the intelligence explosion transhumanism and whole brain emulation Recent years have seen a plethora of forecasts about the profound disruptive impact that is likely to result from further progress in these areas Many commentators however doubt the scientific rigor of these forecasts rejecting them as speculative and unfounded We therefore invited prominent computer scientists physicists philosophers biologists economists and other thinkers to assess the singularity hypotheses Their contributions go beyond speculation providing deep insights into the main issues and a balanced picture of the debate **Artificial Intelligence and Expert Systems** Stuart E. Savory, 1988

Superintelligence Nick Bostrom, 2014-07-03 The human brain has some capabilities that the brains of other animals lack It is to these distinctive capabilities that our species owes its dominant position Other animals have stronger muscles or sharper claws but we have cleverer brains If machine brains one day come to surpass human brains in general intelligence then this new superintelligence could become very powerful As the fate of the gorillas now depends more on us humans than on the gorillas themselves so the fate of our species then would come to depend on the actions of the machine superintelligence But we have one advantage we get to make the first move Will it be possible to construct a seed AI or otherwise to engineer initial conditions so as to make an intelligence explosion survivable How could one achieve a controlled detonation To get closer to an answer to this question we must make our way through a fascinating landscape of topics and considerations Read the book and learn about oracles genies singletons about boxing methods tripwires and mind crime about humanity's cosmic endowment and differential technological development indirect normativity instrumental convergence whole brain emulation and technology couplings Malthusian economics and dystopian evolution artificial intelligence and biological cognitive enhancement and collective intelligence This profoundly ambitious and original book picks its way carefully through a vast tract of forbiddingly difficult intellectual terrain Yet the writing is so lucid that it somehow makes it all seem easy After an utterly engrossing journey that takes us to the frontiers of thinking about the human condition and the future of intelligent life we find in Nick Bostrom's work nothing less than a reconceptualization of
