committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home Bicycles in American Highway Planning Bruce D. Epperson, 2014-11-19 The United States differs from other developed nations in the extent to which its national bicycle transportation policy relies on the use of unmodified roadways with cyclists obeying the same traffic regulations as motor vehicles This policy known as vehicular cycling evolved between 1969 when the 10 speed boom saw a sharp increase in adult bicycling and 1991 when the American Association of State Highway and Transportation Officials adopted an official policy that on road bikeways were not desirable This policy resulted from a growing realization by highway engineers and experienced club cyclists that they had parallel interests the cyclists preferred to ride on highways because most bikeways were not designed for high speeds and pack riding and the highway engineers did not want to divert funding from roadways to construct bikeways Using contemporary magazine articles government reports and archival material from industry lobbying groups and national cycling organizations this book tells the story of how America became a nation of bicyclists without bikeways **International Sport: A Bibliography, 2000** Richard William Cox, 2013-10-23 There has been an explosion in the quantity of sports history literature published in recent years making it increasingly difficult to keep abreast of developments The annual number of publications has increased from around 250 to 1 000 a year over the last decade This is due in part to the fact that during the late 1980s and 90s many clubs leagues and governing bodies of sport have celebrated their centenaries and produced histories to mark this occasion and commemorate their achievements It is also the result of the growing popularity and realisation of the importance of sport history research within academe This international bibliography of books articles conference proceedings and essays in the English language is a one stop for the sports historian to know what is new Cycling and Society Dave Horton, Paul Rosen, Peter Cox, 2016-05-13 How can the social sciences help us to understand the past present and potential futures of cycling This timely international and interdisciplinary collection addresses this question discussing shifts in cycling practices and attitudes and opening up important critical spaces for thinking about the prospects for cycling The book brings together for the first time analyses of cycling from a wide range of disciplinary backgrounds including history sociology geography planning engineering and technology The book redresses the past neglect of cycling as a topic for sustained analysis by treating it as a varied and complex practice which matters greatly to contemporary social cultural and political theory and action Cycling and Society demonstrates the incredible diversity of contemporary cycling both within and across cultures With cycling increasingly promoted as a solution to numerous social problems across a wide range of policy areas in car dominated societies this book helps to open up a new field of cycling studies Peddling Bicycles to America Bruce D. Epperson, 2014-01-10 This economic and technical history of the early American bicycle industry focuses on the crucial period from 1876 to the beginning of World War I It looks particularly at the life and career of the industry's most significant personality during this era Albert Augustus Pope After becoming enamored with English high wheeled

bicycles during a visit to the Philadelphia World's Fair in 1876 Pope soon started paying Hartford Connecticut's Weed Sewing Machine Company to make his own brand of high wheeler the Columbia the first to be manufactured in America in significant numbers A decade later Pope bought out that company and ten years after that Hartford's Park River was lined with five of Pope's factories This book tells the story of the Pope Manufacturing Company's meteoric rise and fall and the growth of an industry around it

*International Sport* Richard William Cox, 2004 There has been an explosion in the quantity of sports history literature published in recent years making it increasingly difficult to keep abreast of developments The annual number of publications has increased from around 250 to 1 000 a year over the last decade This is due in part to the fact that during the late 1980s and 90s many clubs leagues and governing bodies of sport have celebrated their centenaries and produced histories to mark this occasion and commemorate their achievements It is also the result of the growing popularity and realisation of the importance of sport history research within academe This international bibliography of books articles conference proceedings and essays in the English language is a one stop for the sports historian to know what is new

*Bike Battles* James Longhurst, 2015-04-15 Americans have been riding bikes for more than a century now So why are most American cities still so ill prepared to handle cyclists James Longhurst a historian and avid cyclist tackles that question by tracing the contentious debates between American bike riders motorists and pedestrians over the shared road *Bike Battles* explores the different ways that Americans have thought about the bicycle through popular songs merit badge pamphlets advertising films newspapers and sitcoms Those associations shaped the actions of government and the courts when they intervened in bike policy through lawsuits traffic control road building taxation rationing import tariffs safety education and bike lanes from the 1870s to the 1970s Today cycling in American

urban centers remains a challenge as city planners political pundits and residents continue to argue over bike lanes bike share programs law enforcement sustainability and public safety Combining fascinating new research from a wide range of sources with a true passion for the topic Longhurst shows us that these battles are nothing new in fact they re simply a continuation of the original battle over who is and isn t welcome on our roads Watch the trailer <https://www.youtube.com/watch?v=WNleJ0tDvqg>

*Mental Health, Gender, and the Rise of Sport* Gerald R. Gems, 2024-07-17 *Mental Health, Gender, and the Rise of Sport* explores the historical role of sport in the prescription for mental and physical health through the epidemic of neurasthenia a debilitating neurological disorder that afflicted American society throughout the latter nineteenth century Gerald R Gems argues that the practice of sport and sport spectatorship which grew concomitantly with the onset and spread of neurasthenia provided both a physical preventative and a psychological escape to redress the perceived causes of the epidemic Sports such as baseball boxing cycling and football offered psychological relief from the stresses of a rapidly changing economic and social order Cycling in particular provided women with the means to challenge the prescribed gender order of female domesticity male hegemony and the dictates of physically restrictive fashion In the process sport became a key component in the rise of feminism and a prescription for the epidemics that followed over the course of the twentieth and twenty first centuries

**Old Wheelways** Robert L.

McCullough, 2024-06-11 How American bicyclists shaped the landscape and left traces of their journeys for us in writing illustrations and photographs In the later part of the nineteenth century American bicyclists were explorers cycling through both charted and uncharted territory These wheelmen and wheelwomen became keen observers of suburban and rural landscapes and left copious records of their journeys in travel narratives journalism maps photographs illustrations They were also instrumental in the construction of roads and paths wheelways building them funding them and lobbying legislators for them Their explorations shaped the landscape and the way we look at it yet with few exceptions their writings have been largely overlooked by landscape scholars and many of the paths cyclists cleared have disappeared In *Old Wheelways* Robert McCullough restores the pioneering cyclists of the nineteenth century to the history of American landscapes McCullough recounts marathon cycling trips around the Northeast undertaken by hardy cyclists who then describe their journeys in such magazines as *The Wheelman* *Illustrated* and *Bicycling World* the work of illustrators including Childe Hassam before his fame as a painter efforts by cyclists to build better rural roads and bicycle paths and conflicts with park planners including the famous Olmsted Firm who often opposed separate paths for bicycles Today's ubiquitous bicycle lanes owe their origins to nineteenth century versions including New York City's asphalt ribbons Long before there were rails to trails there was a movement to adapt existing passageways including aqueduct corridors trolley rights of way and canal towpaths for bicycling The campaigns for wheelways McCullough points out offer a prologue to nearly every obstacle faced by those advocating bicycle paths and lanes today McCullough's text is enriched by more than one hundred historic images of cyclists often attired in skirts and bonnets suits and ties country lanes and city streets
