Night-time and Sleep in Asia and the West Lodewijk Brunt,Brigitte Steger,2004-06-01 Ideas and practices concerning sleep and night time are constantly changing and widely varied in different cultures and societies What we do during the day and night is the result of much political struggle Trade unions political parties entrepreneurs leaders and schools boards all have an interest in questions of timing for the opening and closing of shops the starting hours of schools and factories and the number of hours people have to work and sleep By drawing together comparative case studies from countries in both Asia and Europe Night time and Sleep in Asia and the West allows the reader to track the differences in the cultural importance given to the night and to compare the ways in which the challenges and opportunities of modernity have been played out in the East and the West **Art Nouveau and the Classical Tradition** Richard Warren,2017-12-14 Art Nouveau was a style for a new age but it was also one that continued to look back to the past This new study shows how in

expressing many of their most essential concerns sexuality death and the nature of art its artists drew heavily upon classical literature and the iconography of classical art It challenges the conventional view that Art Nouveau s adherents turned their backs on Classicism in their quest for new forms Across Europe and North America artists continued to turn back to the ancient world and in particular to Greece for the vitality with which they sought to infuse their creations The works of many well known artists are considered through this prism including those of Gustav Klimt Aubrey Beardsley and Louis Comfort Tiffany But breaking new ground in its comparative approach this study also considers some of the movement s less well known painters sculptors jewellers and architects including in central and eastern Europe and their use of classical iconography to express new ideas of nationhood Across the world while Art Nouveau was a plural style drawing on multiple influences the Classics remained a key artistic vocabulary for its artists whether blended with Orientalist and other iconographies or preserving the purity of classical form

German Façade Design Randall Ott,2016-09-17 German architecture prior to the modern period has received less systemic analytical study than that of Italy France and Britain Scholarly discussion of broad traditions or continuities within Germanic or Central European fa ade design is even sparser Baroque era studies of the region mostly devote themselves to isolated architects monuments or movements Modernism s advent decisively changed this Germanic architecture enjoyed sudden ascendancy Yet even so study specifically of that region s fa ades still lagged nothing compares to the dozens of treatments of Le Corbusier s fa ade systems for example and how these juxtapose with French neoclassical or Italian Renaissance methods Given the paucity of multi period studies one can be forgiven for believing Germany s effervescence of radical modern works seems unprecedented This book takes up these multiple quandaries It identifies and documents a previously unrecognized compositional tradition characterized here as the screen fa ade and posits it as a counter narrative critiquing the essentialist authentic canon currently dominant in Western architectural history By crossing evenly over the dividing line between the historical and modern periods it offers valuable

insights on indigenous roots underlying some aspects of Germany's invigorating early twentieth century architectural developments. The book chronologically examines 400 years of closely related facades concentrated in Germany but also found in Austria, the Czech Republic, German-speaking Switzerland and nearby areas of Central Europe. While nearly 75 buildings are mentioned and illustrated, a dozen are given extensive analysis, and the book focuses on the works of three architects: Schinkel, Behrens, and Mies. Relationships between examples of these three architects' facades far transcend mere homage amongst masters. Glimmers of the system they eventually codify are apparent as early as at Heidelberg Castle in 1559 and Nürnberg's Rathaus in 1622. The book argues that in Germany, northern Gothic affinities for bisection, intense repetition, and rote aggregation intersected with southern Classical affinities for symmetry, hierarchy, and centrality, thereby spawning a unique hybrid product. Instead of graphic formality, this study is guided by on-site perceptions, propositional contrasts, means of approach, interpretive conflicts, and emotion, and it relates the design of these facades to concepts proposed by contemporary philosophers including Novalis, Hegel, Nietzsche, Freud, Adorno, and most importantly, Gadamer on hermeneutics.

Vienna, 1970. Robert Venturi and Denise Scott Brown: Learning from Las Vegas. Kester Rattenbury, Samantha Hardingham, 2024-11-01. The Supercrit series revisits some of the most influential architectural projects of the recent past and examines their impact on the way we think and design today. Based on live studio debates between protagonists and critics, the books describe, explore, and criticise these major projects. This second book in the unprecedented series examines Robert Venturi and Denise Scott Brown's infamous book which overturned the barriers separating high architecture from the commercial architecture of the Strip. In Robert Venturi and Denise Scott Brown's Learning from Las Vegas, you can hear the couple's project description, see the drawings, and join in the critique. This innovative and compelling book is an invaluable resource for any architecture student.

The Female Secession. Megan Brandow-Faller, 2020-06-22. Decorative handcrafts are commonly associated with traditional femininity and unthreatening docility. However, the artists connected with interwar Vienna's female Secession created craft-based artworks that may be understood as sites of feminist resistance. In this book, historian Megan Brandow-Faller tells the story of how these artists disrupted long-established boundaries by working to dislodge fixed oppositions between art and craft, decorative and profound, and masculine and feminine in art. Tracing the history of the women's art movement in Secessionist Vienna from its origins in 1897 at the Women's Academy to the Association of Austrian Women Artists and its radical offshoot, the Wiener Frauenkunst, Brandow-Faller tells the compelling story of a movement that reclaimed the stereotypes attached to the idea of Frauenkunst or women's art. She shows how generational struggles and diverging artistic philosophies of art, craft, and design drove the conservative and radical wings of Austria's women's art movement apart and explores the ways female artists and craftswomen reinterpreted and extended the Klimt Group's ideas in the interwar years. Brandow-Faller draws a direct connection to the themes that impelled the better-known explosion of feminist art in 1970s America. In this provocative story

of a Viennese modernism that never disavowed its ornamental decorative roots she gives careful attention to key primary sources including photographs and reviews of early twentieth century exhibitions and archival records of school curricula and personnel Engagingly written and featuring more than eighty representative illustrations *The Female Secession* recaptures the radical potential of what Fanny Harlfinger Zakucka referred to as works from women s hands It will appeal to art historians working in the decorative arts and modernism as well as historians of Secession era Vienna and gender history
