**The Sense of Beauty** George Santayana,2012-08-31 It is remarkably appropriate that this work on aesthetics should have been written by George Santayana who is probably the most brilliant philosophic writer and the philosopher with the strongest sense of beauty since Plato It is not a dry metaphysical treatise as works on aesthetics so often are but is itself a fascinating document as much a revelation of the beauty of language as of the concept of beauty This unabridged reproduction of the 1896 edition of lectures delivered at Harvard College is a study of why when and how beauty appears what conditions an object must fulfill to be beautiful what elements of our nature make us sensible of beauty and what the relation is between the constitution of the object and the excitement of our susceptibility Santayana first analyzes the nature of beauty finding it irrational pleasure regarded as the quality of a thing He then proceeds to the materials of

beauty showing what all human functions can contribute love social instincts senses etc Beauty of form is then analyzed and finally the author discusses the expression of beauty Literature religion values evil wit humor and the possibility of finite perfection are all examined Presentation throughout the work is concrete and easy to follow with examples drawn from art history anthropology psychology and similar areas      **Blackwork Embroidery** Elizabeth Geddes, Moyra McNeill, 2013-01-31 Modern version of traditional craft materials techniques patterns projects 320 illustrations      *The Elements of Drawing* John Ruskin, 2012-09-19 Timeless work by one of the greatest art critics of all time begins with bare fundamentals and offers brilliant philosophical advice The truth behind Ruskin's statements is always clear American Artist 48 illustrations
