Making A Difference In Families Research That Creates Change:

Making a Difference in Families Robyn Munford, 2020-07-16 This must read volume will challenge every researcher to re-examine their assumptions and approach to research with families. Munford and Sanders emphasise the positive contribution research can make through the development of an inclusive research process. Their model extends the principles of the action research method by emphasising the contribution of families at each stage of the research and dissemination of results through an easily assessable range of research products. The thought provoking case studies articulate the strengths and realities of applying their model in a wide variety of settings in different countries. Angeline Barretta Herman, Professor of Social Work, University of St Thomas. This book tackles the hard issues which are becoming of vital importance for all researchers. How our research can make a difference to research participants and our communities and also satisfy the needs of other players are some of the difficult questions this book addresses. The book's direct approach and its inclusion of work from around the globe make it widely applicable. Professor Jan Fook, La Trobe University. Doing research with families poses particular challenges in social work and welfare. The families are generally clients of social services and can be in a vulnerable position. Also it is important that family research contributes to improving practice in clinical and community work. *Making a Difference in Families* discusses key approaches to research with families including action research, focus groups and participant observation.
