*Making Change Work* Brien Palmer, 2004-01-01 As organizations strive to remain ahead of the competition there will inevitably and often come the need for change All successful organizations regularly use change to improve processes and increase performance While these times of change can be a great opportunity for an organization it also can be a time of stress and angst for all involved Not all organizations are in a position to make these changes effectively and efficiently and for many their efforts often fall short of the intended goals *Making Change Work* Practical Tools for Overcoming Human Resistance to Change was written to help organizations prepare for and successfully implement change The price of a failed change effort can be steep both monetarily and in a loss of credibility *Making Change Work* will first provide tools to measure your organization's readiness to change helping make sure that the efforts will not be doomed to fail from the beginning The book then provides many tools to apply sequentially and logically in order to gain acceptance of the change throughout the organization In helping your organization make change successfully *Making Change Work* addresses buy in acceptance motivation anticipation fear uncertainty and all the other messy human considerations that cause change to fail in the real world      *Making Change Work* Emma Weber, Patricia Pulliam Phillips, Jack Phillips, 2016-05-03 Underpinned by decades of research and application *Making Change Work* shows that the lynchpin that connects change initiatives and their

ultimate success is behavioural change The book brings together the ROI Institute's established methodology for aligning projects and programmes to business needs and for evaluating impact and ROI with the Turning Learning Into Action methodology developed by Emma Weber to support learning transfer It offers a step by step process that partners with any business initiative requiring behavioural change providing the critical link bridging the knowledge and application At the heart of the methodology is a framework for reflective conversation ensuring accountability and aligning people to the desired outcomes Cutting through complex change theory Making Change Work is a how to guide providing an end to end approach to solve the problem that businesses have grappled with for so long from change projects that don't deliver business impact It includes real life case studies from organizations such as BMW and the University of NSW Department of Innovation on how organizations are using the framework to create successful outcomes that are not just demonstrated but that are delivered and measurable It is ideal for any professional who is embarking on any organizational initiative requiring change and evaluation of the subsequent ROI whether it is a learning initiative quality initiative or change initiative
