Rosan, 2012-07-13 Leading theorists and practitioners trace the evolution of key ideas in urban and regional planning over the last hundred years [Designing San Francisco](#) Alison Isenberg, 2024-09-24 A major urban history of the design and development of postwar San Francisco Designing San Francisco is the untold story of the formative postwar decades when U S cities took their modern shape amid clashing visions of the future In this pathbreaking and richly illustrated book Alison Isenberg shifts the focus from architects and city planners those most often hailed in histories of urban development and design to the unsung artists activists and others who played pivotal roles in rebuilding San Francisco between the 1940s and the 1970s Previous accounts of midcentury urban renewal have focused on the opposing terms set down by Robert Moses and Jane Jacobs put simply development versus preservation and have followed New York City models Now Isenberg turns our attention west to colorful pioneering and contentious San Francisco where unexpectedly fierce battles were waged over iconic private and public projects like Ghirardelli Square Golden Gateway and the Transamerica Pyramid When large scale redevelopment came to low rise San Francisco in the 1950s the resulting rivalries and conflicts sparked the proliferation of numerous allied arts fields and their professionals including architectural model makers real estate publicists graphic designers photographers property managers builders sculptors public interest lawyers alternative press writers and preservationists Isenberg explores how these centrally engaged arts professionals brought new ideas to city regional and national planning and shaped novel projects across urban suburban and rural borders San Francisco's rebuilding galvanized far reaching critiques of the inequitable competition for scarce urban land and propelled debates over responsible public land stewardship Isenberg challenges many truisms of this renewal era especially the presumed male domination of postwar urban design showing how women collaborated in city building long before feminism's impact in the 1970s An evocative portrait of one of the world's great cities Designing San Francisco provides a new paradigm for understanding past and present struggles to define the

Corburn, 2013-04-12 Healthy city planning means seeking ways to eliminate the deep and persistent inequities that plague cities Yet as Jason Corburn argues in this book neither city planning nor public health is currently organized to ensure that today's cities will be equitable and healthy Having made the case for what he calls adaptive urban health justice in the opening chapter Corburn briefly reviews the key events actors ideologies institutions and policies that shaped and reshaped the urban public health and planning from the nineteenth century to the present day He uses two frames to organize this historical review the view of the city as a field site and as a laboratory In the second part of the book Corburn uses in depth case studies of health and planning activities in Rio de Janeiro Nairobi and Richmond California to explore the institutions policies and practices that constitute healthy city planning These case studies personify some of the characteristics of his ideal of adaptive urban health justice Each begins with an historical review of the place its policies and social movements around urban development and public health and each is an example of the urban poor participating in shaping and being impacted by healthy city planning **Urban Public Policy** Martin V. Melosi, 2010-11 The 1992 Los Angeles riots catapulted the problems of the city back onto the policy agenda The cauldron of social problems of the city as the riots showed offers no simple solutions Indeed urban policy includes a range of policy issues involving welfare housing job training education drug control and the environment The myriad of local state and federal agencies only further complicates formulating and implementing coherent policies for the city This volume while not offering specific proposals to remedy the problems of the city provides a broad historical context for discussing contemporary urban policy and for arriving at new prescriptions for relieving the ills of the American city The essays address issues related to public housing poverty transportation and the environment In doing so the authors discuss larger themes in urban policy as well as provide case studies of how policies have been implemented over time in specific cities Of particular interest are two essays that discuss the role of the historian in shaping urban policy and the importance of historical preservation in urban planning **What We See** Stephen A.

Goldsmith, Lynne Elizabeth, 2010-05-01 Leading thinkers offer fresh insight into the workings of vibrant ecological equitable communities and their economies **Thinking Planning and Urbanism** Beth Moore Milroy, 2010-01-01 When manufacturers and retailers vacate traditional locations they leave holes in a city's fabric that signal a shifting urban industrial terrain Who should mend these spaces and how should they approach the problem Using Toronto's Dundas Square and surrounding area as a case study Thinking Planning and Urbanism meticulously reconstructs the redevelopment process to explore the theories and practices used It traces the labyrinth of competing interests that can sideline and nearly overwhelm the public planning function In these circumstances Moore Milroy concludes practising planners are marooned by planning theories that begin from the premise that urban space is a social construction and only secondarily a function of

technology and aesthetics This book makes plain the nature of the gap between the practice of planning and its theories a gap that inhibits planners from effectively championing creative actions to deal with postindustrial problems The findings drawn from this case will be widely recognized in redevelopment elsewhere and thus will be extremely useful to students and practitioners of urban design public administration municipal law and urban and regional planning **Introduction to**

Pipkin, 1984-06-30 Professionals and Urban Form departs from the usual way of studying the city to examine the chief professions responsible for designing urban places planning and architecture Not often treated together they are here combined to highlight common problems and lines of convergence between the two The architects planners and social scientists who contributed to this book concern themselves with the interconnection between knowledge and practice in planning and architecture paying particular attention to the issues of whether design knowledge and theory can or should be distinct from social science knowledge and the effects of professionalization and institutionalization on the structuring of inquiry and theory The main sections of the book deal with the history of the design professions epistemological foundations professions and practice and controversies in practice Many issues of contemporary interest to planners are dealt with including the debates over normative advocacy and communicative planning Marxist perspectives supply and demand in the job market for architects and the overarching epistemological question of the relationship between social science research and design practice
