Well-being Past and Present Siobhan Hyland,Paul Jackson,Mark Rothery,2025-09-18 In this exciting interdisciplinary volume researchers archivists curators and social scientists offer a fresh exploration of the concept of well being in Britain throughout history and in the present day Well being Past and Present examines the various ways well being has been invoked as a concept or term throughout historical periods attending to its multifarious meanings and its significance on the way we live our lives Focusing on the interactions between historical research and heritage and archival

methods and practices the volume bridges the gap between historical experiences of well being and contemporary well being interventions by institutions and communities Across sixteen chapters the authors in Well being Past and Present travel from the battlefield to the library the orchard to the archive and the country house to the hospital ward examining well being s own historical and contemporary position in discourses like leisure health and happiness The key questions this volume asks are has the concept of well being become too nebulous to carry any real meaning What happens to the term when we place it in the range of very different contexts that it finds a home in How do past discourses of well being connect to the present How widely is well being and associated activities spread across our diverse societies Well being Past and Present is a timely volume and contributes not just to our historical understanding of well being but how we can utilise history and heritage to establish communities of care in Britain **Drawing Futures** Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura

Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas
