Digital Labor Trebor Scholz, 2013 Digital Labor asks whether life on the Internet is mostly work or play We tweet we tag photos we link we review books we comment on blogs we remix media and we upload video to create much of the content that makes up the web *Capitalism, Citizenship and the Arts of Thinking* Kathryn Dean, 2014-03-26 Capitalism Citizenship

and the Arts of Thinking proposes a historical materialist ethic of human flourishing understood in terms of the practice of citizenship. It focuses on the ways in which capitalism's necessary mode of thinking, analytical thinking, impedes the nurturing of capabilities for citizenship as understood from a Marxian Aristotelian point of view. It includes a systematic discussion of the Aristotelian resonances in Marx's critique of capitalism as well as an elaboration and critique of Alfred Sohn-Rethel's account of the origins of analytical thinking in his book *Intellectual and Manual Labor: A Critique of Epistemology*. Dean's critique of this book draws on the language theories of Lev Vygotsky, Alexander Luria, Jack Goody, Eric Havelock, and Walter Ong so as to identify the origins of analytical thinking in literacy rather than in monetised exchange relations as claimed by Sohn-Rethel. Having traced the development of analytical thinking so as to bring out the ways in which this thinking was a condition of possibility for the division of head and hand in nineteenth-century England, Dean brings the analysis into the contemporary world by examining the changes effected by digitalised communication in terms of citizenship capabilities now drawing on the work of Michael Hardt and Antonio Negri in order to do so. The book's ground-breaking content is in the fusion of Marxian Aristotelian and linguistic elements to develop a critique of capitalism's hegemonic mode of thinking, analytical thinking, as manifested in the modern sciences and to show how the draining of intelligibility from the everyday world permitted by this thinking becomes an obstacle to the practice of meaningful citizenship. Its main appeal will be to Marxist thinkers whose main concern is with the alienating as opposed to exploitative character of capitalist modes of life. It is written to complement the work of such Marxists, these being in the main writers such as Michael Hardt and Antonio Negri, and is pitched at researchers in the field. It could be used on post-graduate courses in political theory as well as social and cultural theory.

The Oxford Handbook of Information and Communication Technologies Robin Mansell, 2007. The production and consumption of information and communication technologies or ICTs are becoming deeply embedded within our societies. The influence and implications of this have an impact at a macro level in the way our governments, economies, and businesses operate and at a micro level in our everyday lives. This handbook is about the many challenges presented by ICTs. It sets out an intellectual agenda that examines the implications of ICTs for individuals, organizations, democracy, and the economy. Explicitly interdisciplinary and combining empirical research with theoretical work, it is organised around four themes covering the knowledge economy, organizational dynamics, strategy and design, governance, and democracy, and culture, community, and new media literacies. It provides a comprehensive resource for those working in the social sciences and in the physical sciences and engineering fields with leading contemporary research informed principally by the disciplines of anthropology, economics, philosophy, politics, and sociology.

The Digital Transformation of Labor Anthony Larsson, Robin Teigland, 2019-11-11. Through a series of studies, the overarching aim of this book is to investigate if and how the digitalization/digital transformation process causes or may cause the autonomy of various labor functions and its impact in creating or stymieing various job opportunities on the labor market. This book also seeks to illuminate what actors/groups

are mostly benefited by the digitalization digital transformation and which actors groups that are put at risk by it This book takes its point of departure from a 2016 OECD report that contends that the impact digitalization has on the future of labor is ambiguous as on the one hand it is suggested that technological change is labor saving but on the other hand it is suggested that digital technologies have not created new jobs on a scale that it replaces old jobs Another 2018 OECD report indicated that digitalization and automation as such does not pose a real risk of destroying any significant number of jobs for the foreseeable future although tasks would by and large change significantly This would affects welfare as most of its revenue stems from taxation and particularly so from the taxation on labor directly or indirectly For this reason this book will set out to explore how the future technological and societal advancements impact labor conditions The book seeks to provide an innovative enriching and controversial take on how various aspects of the labor market can be and are affected the ongoing digitalization trend in a way that is not covered by extant literature As such this book intends to cater to a wider readership from a general audience and students to specialized professionals and academics wanting to gain a deeper understanding of the possible future developments of the labor market in light of an accelerating digitalization digital transformation of society at large

Invisible Labour Indranil Chakraborty, 2020-10-05 This book investigates the life working conditions and urban experiences of support service workers such as janitors security guards culinary workers and carpool drivers in the information technology IT sector of India Largely omitted from academic discourse support service workers are crucial to the Indian IT industry Drawing on interviews with such workers in seven Indian cities with a large concentration of software service companies this volume Uses quantitative and qualitative analyses to map and assess workers responses to migration from rural occupations to a modern urban employment setting Explores the everyday grind of migrant workers in the context of the homogenizing effects of globalization in an alienating urban environment and discusses how their dislodgment from the structures of rural life gender and caste roles has placed them in a space of contestation between traditions and the opportunities and challenges offered by digital society in the form of freedom individualism flexibility and innovation Traces the evolution of new areas of class and identity formations as well as the hegemonic relations within that ethos imposed by contractors and corporations The volume will be of great interest to scholars and researchers of sociology and social anthropology urban studies development studies labour studies social exclusion and South Asian studies

Economic Science Fictions William Davies, 2018-05-04 An innovative new anthology exploring how science fiction can motivate new approaches to economics From the libertarian economics of Ayn Rand to Aldous Huxley s consumerist dystopias economics and science fiction have often orbited each other In *Economic Science Fictions* editor William Davies has deliberately merged the two worlds asking how we might harness the power of the utopian imagination to revitalize economic thinking Rooted in the sense that our current economic reality is no longer credible or viable this collection treats our economy as a series of fictions and science fiction as a means of anticipating different economic futures It asks how science fiction can motivate new

approaches to economics and provides surprising new syntheses merging social science with fiction design with politics scholarship with experimental forms With an opening chapter from Ha Joon Chang as well as theory short stories and reflections on design this book from Goldsmiths Press challenges and changes the notion that economics and science fiction are worlds apart The result is a wealth of fresh and unusual perspectives for anyone who believes the economy is too important to be left solely to economists Contributors AUDINT Khairani Barokka Carina Brand Ha Joon Chang Miriam Cherry William Davies Mark Fisher Dan Gavshon Brady and James Pockson Owen Hatherley Laura Horn Tim Jackson Mark Johnson Bastien Kerspern Nora O Murch Tobias Revell et al Judy Thorne Sherryl Vint Joseph Walton Brian Willems *The Laboring of Communication* Vincent Mosco, Catherine McKercher, 2009-08-04 This book addresses the changing nature of work workers and their organizations in the media information and knowledge industries It begins with a concise analysis of the meaning of knowledge work and of an information society The Prospect of Labor in Cyberspace Zhuyuan Yang, 2024-11-27 This book explores user labor in the internet age offering innovative perspectives on digital labor It broadens the discussion on topics like technology and power the reproduction of network user labor labor relations in cyberspace economic rewards of network user labor and especially the non economic rewards of network user labor Specifically the book examines the impact of technology power and capital on network user labor the control exerted by media platforms over this labor and the payment methods for both economic and non economic rewards *Eco-socialism as Politics* Qingzhi Huan, 2010-03-11 This volume consists of analyses by experts from both the West and the East on the up to date development of Eco socialism as a red green politics within the context of capitalist globalisation It investigates whether and or in what sense Eco socialism can offer a better explanation to the causes of ecological problems than the other Green discourses such as deep ecology and ecological modernisation theory and thus has more contributions to make in dealing with the deteriorating ecological crisis throughout the world **Managerial Control of American Workers** Mel van Elteren, 2017-03-04 Today surveillance and regulation of employees are pervasive at all levels except the highest in a wide variety of American workplaces Digital information systems have become important tools of managerial control The constraints built into these systems by so called business process reengineering are a continuation of scientific management principles developed during the late 19th century Additional means of control have included employment based welfare capitalism and human relations and corporate culture approaches This book provides fresh insight into various practices of managerial control from the 1880s to the present and their effects on work organization and quality and worker skill requirements The author highlights current developments including those focused on highly skilled knowledge workers accounting for enhanced automation offshoring and related changes in the production and distribution of goods and services Rethinking Markets in Modern India Ajay Gandhi, Barbara Harriss-White, Douglas E. Haynes, Sebastian Schwecke, 2020-10-01 To people operating in India s economy actually existing markets are remarkably different from how

planners and academics conceive them. From the outside they appear as demarcated arenas of exchange bound by state imposed rules. As historical and social realities however, markets are dynamic, adaptive and ambiguous spaces. This book delves into this intricate context, exploring Indian markets through the competition and collaboration of those who frame and participate in markets. Anchored in vivid case studies from colonial property and advertising milieus to today's bazaar and criminal economies, this volume underlines the friction and interdependence between commerce, society and state. Contributors from history, anthropology, political economy and development studies synthesize existing scholarly approaches, add new perspectives on Indian capitalism's evolution and reveal the transactional specificities that underlie the real world functioning of markets.
