The Making of a Teacher Taft B. Botner, 1995-01-01 Evaluation in Decision Making Naftaly S. Glasman, David Nevo, 1988-06-30 This book is about the practice of decision making by school principals and about ways to improve this practice by capitalizing on evaluation dimensions Much has been written on decision making but surprisingly little on decision making in the school principalship Much has been also written on evaluation as well as on evaluation and decision making but not much has been written on evaluation in decision making especially decision making in the principalship This book presents two messages One is that decision making in the principalship can be studied and improved and not only talked about in abstract terms The other message is that evaluation can contribute to the understanding of decision making in the principalship and to the improvement of its practice In this book we call for the conception of an evaluation minded principal a principal who has a wide perspective on the nature of evaluation and its potential benefits a principal who is also inclined to use evaluation perceptions and techniques as part of his her decision making process This book was conceived in 1985 with the idea to combine thoughts about educational administration with thoughts about educational evaluation Studies of decision making in the principalship had already been on their way We decided to await the findings and in the meantime we wrote a first conceptual version of evaluation in decision making As the studies were completed we wrote a first empirical version of same **Exploring classroom assessment practices and teacher decision-making** Dennis Alonzo, Chris Davison, Chris Ann Harrison, 2023-05-25 The Making of an American School-teacher Forrest Crissey, 1906

Teachers & technology : making the connection , The Making of a Teacher Martin Grove Brumbaugh,1905 **Home Economics Education Series** United States. Division of Vocational Education, Teachers at Their Best Rich Waters,2018-04-03 The purpose of this book is to change the conversation about teacher induction preparation and development and how we create effective teachers Our national discussion about how to create effective teachers needs to move away from how higher education can do a better job preparing our teachers and move toward how our local schools can do a better job inducting preparing and developing our teachers over a full career There are two interconnected and irrefutable reasons for this First school culture supersedes all rational strategies for teacher development and second teachers learn to teach in the schools where they work not in higher education or any of the alternative routes which the ineffectiveness of higher education teacher preparation have caused to emerge With the affirmation of these postulates this book clarifies that teachers are at their best when they are working together in collaborative cultures where teacher thinking and decision making lead schools in continuous improvement and change Elaborating on the importance of these best conditions for optimal teacher development this book will insist that it is the entirety of a school culture that produces effective teachers and schools with authentic learning communities produce the cultures that produce effective teachers
