Humanizing Cities Through Car-Free City Development and Transformation Doheim, Rahma M.,Farag, Alshimaa Aboelmakarem,Kamel, Ehab,2020-06-05 The heavy dependency on private cars has shaped the design of cities While offering fast comfortable and convenient commutes cars have become the most popular method of transportation but are also a health crisis due to the toxic emissions they release into the atmosphere as well as the high death toll from traffic accidents For these reasons there is a need to minimize the use of cars within cities in favor of greener and humanized urban design that would improve the quality of life and reduce the global threat of climate change *Humanizing Cities Through Car Free City Development and Transformation* is an essential publication that explores the concepts of car free cities and city humanization as possible solutions to reduce the deteriorating effect on the environment and the community The publication discusses the urban initiative to implement pedestrianization and humanization of cities and public spaces to promote the concept of car free living Featuring coverage on a wide range of topics including city humanization smart mobility and urban policies this book is ideally designed for urban planners environmentalists government officials policymakers architects transportation authorities researchers academicians and students

Developing Age-Friendly Communities in the UK Stephen J. Page,Joanne Connell,2022-12-23 The ageing population is a global societal issue Policymakers planners and the public third and private sectors must rethink how the built environment and services are delivered to meet the needs of a changing demographic This is the first book to systematically review the evolution development and progress of age friendly thinking in the UK with a primary focus on the real world experiences of the people leading place based initiatives The book presents the findings of the first in depth national study of age friendly programme leaders in the UK completed in 2021 and provides insights into the development of age friendly communities the formative influences from a social policy perspective the management challenges and the progress towards achieving age friendly goals Using primary interview data and narrative analysis the experiences of working with age friendly programmes in different organisational forms are explored The book promotes a greater

understanding of what it means to become an age friendly community in practice how the programmes have different development pathways and what influences different outcomes Embellished with detailed narratives from practitioners informative tables and diagrams and figures throughout the book carefully gathers the voices of a diverse range of decision makers and leaders associated with the age friendly movement and provides unique insights on the drivers of change in specific localities This is a must read for anyone involved in ageing research or ageing policy and practice as it provides an insightful look into the real world of embedding this community development model in different localities to make a difference to the lives of older people Topical themes include how these agendas connect with other issues such as dementia friendly programmes and the work of the third sector as well as the growing challenge of what it means to be friendly as a community and place and whether friendly is becoming an over used term in relation to place identity The book has national and global interest for all communities engaged in age friendly activity offering exemplars of best practice achievements in transforming local communities and views on the meaning of ageing as well as the age friendly lens as an approach that champions the world through the eyes of older people It offers a thought provoking read for anyone with an interest in this expanding area of ageing irrespective of disciplinary focus

Urban Sustainability Through Environmental Design Kevin Thwaites,Sergio Porta,Ombretta Romice,Mark Greaves,2007-12-06

What can architects landscape architects and urban designers do to make urban open spaces streets and squares more responsive lively and safe Urban Sustainability through Environmental Design answers this question by providing the analytical tools and practical methodologies that can be employed for sustainable solutions to the design and management of urban environments The book calls into question the capability of quick fix development solutions to provide the establishment of fixed communities and suggests a more time conscious and evolutionary approach This is the first significant book to draw together a pan European view on sustainable urban design with a specific focus on social sustainability It presents an innovative approach that focuses on the tools of urban analysis rather than the interventions themselves With its practical approach and wide ranging discussion this book will appeal to all those involved in producing communities and spaces for sustainable living from

students to academics through to decision makers and professional leaders *Designing Responsive City Centers* Amir Shakibamanesh, Mahshid Ghorbanian, 2025-01-11 This book explores the history and evolution of city centers and provides practical guidance for designing successful city centers emphasizing the importance of urban design guidelines in achieving this goal With a focus on community engagement environmental quality and economic benefits the book offers a roadmap for creating vibrant dynamic and sustainable city centers that enhance the overall quality of life for their communities The book offers guidelines for urban design which can be used to apply the main principles and solutions related to landscaping building architecture and access systems The guidelines manifest development policies as key solutions and govern the qualitative aspects of the plan enabling the creation of responsive city centers that benefit their communities An invaluable resource for anyone interested in urban design and its role in shaping the cities of the future this book is an essential tool for creating successful and sustainable urban environments *The Street* Vikas Mehta, 2013-03-05 Received the Environmental Design Research Association's 2014 Place Book Award Shortlisted for the UDG Francis Tibbalds Book Award 2014 Good cities are places of social encounter Creating public spaces that encourage social behavior in our cities and neighborhoods is an important goal of city design One of the cardinal roles of the street as public space is to provide a setting for sociability How do we make sociable streets This book shows us how these ordinary public spaces can be planned and designed to become settings that support an array of social behaviors Through carefully crafted research The Street systematically examines people's actions and perceptions develops a comprehensive typology of social behaviors on the neighborhood commercial street and provides a thorough inquiry into the social dimensions of streets Vikas Mehta shows that sociability is not a result of the physical environment alone but is achieved by the relationships between the physical environment the land uses their management and the places to which people assign special meanings Scholars and students of urban design planning architecture geography and sociology will find the book a stimulating resource The material is also directly applicable to practice and should be widely read by professional urban designers planners architects and others involved in the design planning and implementation of commercial streets *Creating Neighbourhoods and Places in the Built Environment* David Chapman, 2003-09-02 This design primer examines the forces at work in the built environment and their impact on the form of buildings and their environments The actions of a range of individuals and agencies and the interaction between them is examined exploring the competing interests which exist their interaction with physical and environmental forces and the uncertain results of both individual and corporate intervention *Transformation of Cities in Central and Eastern Europe* F. E. Ian Hamilton, Kaliopa Dimitrovska Andrews, Nataša Pichler-Milanović, 2005 Annotation This volume is one in a series initiated by the United Nations University Institute of Advanced Studies on the inter relationship between globalisation and urban transformation It identifies and describes the inter and intra urban transformations of Central and Eastern European cities and considers their pre 1945 historic legacies the socialist period and their contemporary transition

towards market oriented and democratic systems The dramatic changes since 1989 including the collapse of Communist ideology the break up of the Soviet Union Czechoslovakia and Yugoslavia the end of the Cold War and the impact of globalisation and European integration have reconfigured this region and affected their re integration into European and global networks This book first examines the similarities and differences between significant Central and Eastern European cities comparing the differing patterns of historical context and socialist legacies before 1990 and the impacts of internal and external forces on re shaping these cities and their paths of transformation since 1990 It also examines the role of contemporary planning within the overall development of Central and Eastern European cities The conclusion demonstrates the similarities and differences between Central and Eastern European cities and their re integration into global networks

Housing Transformations Bridget Franklin, 2006-08-21 Including illustrated case study examples this original and groundbreaking book explores a wide range of literature combines social theory with elements from the built environment disciplines and explores how and why we build where we do

Beiträge Zur 15. Internationalen Konferenz Zu Stadtplanung, Regionalentwicklung und Informationsgesellschaft Manfred Schrenk, 2010 *Toward an Integrative Theory of Urban Design* Hossein Bahraïny, Ameneh Bakhtiar, 2016-05-13 This book takes a bold epistemological approach to address the fundamental questions that urban design has faced since its inception questions concerning its legitimacy definition nature content purpose theory methods jurisdiction and above all its knowledge base The appropriate level of urban design global or local is another critical and emerging question discussed At the end an integrative theory of urban design is introduced on the basis of which a set of principles is developed for application by practicing urban designers These principles are presented at three essential levels general global and local Iranian *Toward an Integrative Theory of Urban Design* is intended to dispel many of the ambiguities still troubling urban design as a discipline and profession

Sustainable Urban Neighbourhood David Rudlin, Nicholas Falk, 2010-05-14 This successful title previously known as *Building the 21st Century Home* and now in its second edition explores and explains the trends and issues that underlie the renaissance of UK towns and cities and describes the sustainable urban neighbourhood as a model for rebuilding urban areas The book reviews the way that planning policies architectural trends and economic forces have undermined the viability of urban areas in Britain since the Industrial Revolution Now that much post war planning philosophy is being discredited we are left with few urban models other than garden city inspired suburbia Are these appropriate in the 21st century given environmental concerns demographic change social and economic pressures The authors suggest that these trends point to a very different urban future The authors argue that we must reform our towns and cities so that they become attractive humane places where people will choose to live The Sustainable Urban Neighbourhood is a model for such reform and the book describes what this would look like and how it might be brought about

Sustainability in Urban Planning and Design Amjad Almusaed, Asaad Almssad, Linh Truong - Hong, 2020-12-16 This book has been prepared to embody the major

and efficient applications of the different duties and the role of sustainability in urban planning and design by a new reading of the city structure and composition as well as offering a solid and clear concept for this kind of science The book aims to illustrate various theories and methods of the treatment of the modern ideas of metropolitan life The book is divided into two parts and contains 23 chapters

Explorations in Urban Design Matthew Carmona, 2017-05-15 Whilst recognising that distinctly different traditions exist within the study and practice of urban design this book advances an interdisciplinary and innovative approach which is of direct importance to understanding the urban forms conditions practices and processes It enthuses and inspires users who are grappling with urban design research problems but who need inspiration to move from idea to methodological approach Through the work of 32 urban researchers from the arts sciences and social sciences it demonstrates a wide range of problems and approaches and shows how the diverse range of complementary approaches can come together to provide a holistic understanding to the design of cities While each of the contributors presents a particular approach to researching the field sometimes focusing centrally on particular research methodologies others cutting across methods or focusing on theory all include discussion of actual research projects to illustrate their application to real world problems This book will be valuable to everyone from the informed undergraduate student about to embark on their first dissertation to PhD students and seasoned researchers immersed in methodological and conceptual complexity and wishing to compare available and appropriate methodological paths

Place Identity, Participation and Planning Cliff Hague, Paul Jenkins, 2005 Can regional identities create a more sustainable alternative to the increasingly standardised environments in which we live Is bottom up rather than top down planning possible

Revitalising Historic Urban Quarters Tim Heath, Taner Oc, Steve Tiesdell, 2013-09-13 This book synthesizes urban design and urban regeneration by examining the revitalization of a number of historic urban quarters Its focus is on quarters or areas where there is a significant number of historic buildings concentrated in a small area with places and area based approaches Many cities have such quarters that confer on them a sense of place and identity through their historic continuity and cultural associations The quarters are often an integral element of the city's image and identity The lessons and observations from the experience of the revitalization of such historic urban quarters forms the core of this book with a number of case study examples from North America and Europe showing a variety of approaches to and outcomes of revitalization

By Design Great Britain. Department of the Environment, Transport and the Regions, 2000 This guide is intended as a companion to Planning Policy Guidance PPGs and subsequent Planning Policy Statements PPSs and aims to encourage better design and to stimulate thinking about urban design The guide is relevant to all aspects of the built environment from the design of buildings and spaces landscapes to transport systems and for planning and development at every scale from streets and their neighbourhoods villages and cities to regional planning strategies
