Making An Impact In Hiv Aids Ngo Exper:

Making an Impact in HIV and AIDS Jocelyn DeJong, 2003 As the HIV AIDS epidemic has grown to become the fourth biggest killer in the world and the leading cause of death in sub Saharan Africa so the pressure on those working in the field to expand the scale of their activities has increased Non governmental organizations NGOs have been especially influential in the response to HIV in developing countries and the pressure to increase the scope and impact of this work is particularly strong Making an Impact in HIV and AIDS recognizes that scaling up NGO programmes requires more than just additional resources or the straightforward replication or expansion of interventions The book analyzes when expansion is appropriate how to make it effective how to measure the costs and what the implications for organizations may be It examines these issues through the experience of NGOs working in different contexts and in all aspects of HIV AIDS including prevention care and support and mitigating the impact of the epidemic The author draws on case studies from a range of countries in Africa Asia and Latin America She integrates the insights from these experiences with existing thinking and proposes a new typology of approaches to scaling up Key elements of scaling up are discussed as are issues such as the risks entailed in growth motivations for scaling up and the special challenges related to scaling up work on HIV and AIDS This book is aimed at those active in the HIV AIDS field who are interested in NGO programmes and those in the wider development field who are concerned about the impact of HIV AIDS and what NGOs can do about it It makes an important contribution to thinking about scaling up NGO activities in general and is particularly relevant as the pressures of the epidemic concern not only the organizations directly involved but also those working on all aspects of development The Politics of HIV/AIDS in Russia Ulla Pape, 2013-10-01 This book studies the role of civil society organisations in the fight against HIV AIDS in Russia It looks at how Russia s HIV AIDS epidemic has developed into a serious social economic and political problem and how according to the United Nations Programme on HIV AIDS UNAIDS Russia is currently facing the biggest HIV AIDS epidemic in all of Europe with an estimated number of 980 000 people living with HIV in 2009 The book investigates civil society organisations contribution to social change and civil society development in post Soviet Russia and thus situates a specific type of civil society actors into a broader socio political context and questions their ability to represent civic interests particularly in the field of social policy making and health This allows for a better understanding of the dynamics of state society relations in present day Russia and gives insight into the ways HIV AIDS NGOs in Russia have used transnational ties in order to exert influence on domestic policy making in the field of HIV AIDS *Applied Theatre and Sexual Health Communication* Katharine E. Low, 2020-11-05 This book analyses the partnership between applied theatre and sexual health communication in a theatre making project in Nyanga a township in South Africa By examining the bridges and schisms between the two fields as they come together in the project an alternative way of approaching sexual health communication is advocated This alternative considers what it is that applied theatre does and could become in this context Moments of value which lie around

the margins of the practice emerge as opportunities that can be overlooked These somewhat ephemeral intangible moments which appear on the edges are described as apertures of possibility and occur when one takes a step back and realises something unnoticed in the moment This book offers an invitation to pause and notice the seemingly insignificant moments that often occurs tangentially to the practice The book also calls for more outcry about sexual health and sexual violence arguing for theatre making as a route to multitudes of voices nuanced understandings and diverse spaces in which discussions of sexuality and sexual health are shared felt and experienced

Where Human Rights Begin Wendy Chavkin, Ellen Chesler, 2005 Brings together eight wide reaching and provocative essays that examine the practical and theoretical issues of reproductive health policy and implementation This book assesses the impact of policies that have been initiated and consider future directions that governments must take in order to translate visionary ideas into actual achievements

Scaling Up Health Service Delivery Ruth Simmons, Peter Fajans, Laura Ghiron, 2007 The focus here is on ways to increase impact of health service innovations that have been tested in pilot or experimental projects so as to benefit more people and to foster policy and programme development on a lasting sustainable basis p i Preface

A Resource for NGOs Heather De Wet, 2003

NGOs and Global Trade Erin Hannah, 2016-01-29 In a deeply iniquitous world where the gains from trade are distributed unevenly and where trade rules often militate against progressive social values human health and sustainable development NGOs are widely touted as our best hope for redressing these conditions As a critical voice of the poor and marginalized many are engaged in a global struggle for democratic norms and social justice Yet the potential for NGOs to bring about meaningful change is limited This book examines whether improvements in participatory opportunities for progressive NGOs results in substantive and normative policy change in one of the major trading powers the European Union Hannah advances a constructivist account of the role of NGOs in the EU s trade policymaking process She argues that NGOs have been instrumental in providing education raising awareness and giving a voice to broader societal concerns about proposed trade deals both when they take advantage of formal participatory opportunities and when they protest from the streets and in the media However the book also highlights how NGO inputs are mediated by the social structure of global trade governance Epistemes the background knowledge ideological and normative beliefs and shared assumptions about how the world works determine who has a voice in global trade governance Showing how NGOs succeed only when their advocacy conforms broadly to the dominant episteme this book will be of value to scholars and students with an interest in NGOs and international trade negotiations It will also be of interest to policymakers national trade negotiators government departments and the trade policy community

Creating Opportunities for Change and Organization Development in Southern Africa Dalitso Samson Sulamoyo, 2012-12-01 This book takes the position that successful OD applications in cross cultural settings are predicated on the ability of OD experts to localize them for purposes of suiting local conditions and context Cultural frameworks have been utilized by global OD experts to understand the general cultural

settings of environments in which they are working and applying OD techniques However the complexities of culture within organizations communities and countries may not always be understood within these cultural frameworks and models Assumptions of culture based or reliant on models alone can impede the successful applications of OD The author discusses the role of cultural translations of OD techniques within a southern African context It examines the approach of western consultants in a southern African environment as well as the approach of local southern African consultants as they interact with western developed OD applications in their own local environments The book uses three methods for conveying the opportunities and experience of OD in southern Africa research practitioner point of view and storytelling The author recognizes the works of renowned African scholars in the field of management as well OD practitioners carrying out innovative and pioneering work in southern Africa Their work may not have had much exposure in the West however their contributions to the field of management should be recognized OD is discussed in this book as an opportunity for change and development for southern African countries that are in democratic transitions post conflict environments and on a path of development The future of OD is explored within the context of economical global and political emerging issues The time is right for change and development in southern Africa with OD as the driving force Make Arts for a Better Life Kathleen Van Buren,Brian Schrag,2018-09-04 Make Arts for a Better Life A Guide for Working with Communities provides a ground breaking model for arts advocacy Drawing upon methods and theories from disciplines such as ethnomusicology anthropology folklore community development and communication studies the Guide presents an in depth approach to researching artistic practices within communities and to developing arts based projects that address locally defined needs Through clear methodology case studies from around the world and sample activities the Guide helps move readers from arts research to project development to project evaluation Woven into the discussions are critical reflections on the concept of a better life and ethical issues in arts advocacy Accessible writing and visual cues ensure that readers can easily locate sections which may be particularly pertinent to their work whether based on types of arts music drama dance oral verbal arts visual arts or professional positions educators scholars project leaders For additional resources readers can access an accompanying website offering methodology cheat sheets sample research documents and suggestions for educators scholars and project leaders Dissemination and Implementation Research in Health Ross C.
