Bodies in the Bog and the Archaeological Imagination Karin Sanders, 2009-12 Over the past few centuries northern Europe's bogs have yielded mummified men women and children who were deposited there as sacrifices in the early Iron Age and kept startlingly intact by the chemical properties of peat In this remarkable account of their modern afterlives Karin Sanders argues that the discovery of bog bodies began an extraordinary and ongoing cultural journey Throughout the nineteenth and twentieth centuries Sanders shows these eerily preserved remains came alive in art and science as material metaphors for such concepts as trauma nostalgia and identity Sigmund Freud Joseph Beuys Seamus Heaney and other major figures have used them to reconsider fundamental philosophical literary aesthetic and scientific concerns Exploring this intellectual spectrum Sanders contends that the power of bog bodies to provoke such a wide range of responses is rooted in their unique status as both archaeological artifacts and human beings They emerge as corporeal time capsules that transcend archaeology to challenge our assumptions about what we can know about the past By restoring them to the roster of cultural phenomena that force us to confront our ethical and aesthetic boundaries *Bodies in the Bog* excavates anew the question of what it means to be human

Digging for Richard III: The Search for the Lost King (Revised and Expanded) Mike Pitts, 2015-09-08 As gripping as any detective fiction Proof that one doesn't need to be fascinated with Richard III to be

enthralled by the story of his body's discovery Publisher's Weekly In August 2012 a search began and on February 4 2013 a team from Leicester University delivered its verdict to a mesmerized press room and to the world they had found the remains of Richard III whose legacy was perhaps the most contested of all British monarchs Prior to this major discovery there had been little new information about Richard III for some time With no new evidence to fuel it the debate over what kind of man he might have been seemed to have stalled Thus the story of the discovery of Richard III is a story of the value of archaeology careful analysis of physical evidence backed up by the latest science and technology and how it can change our understanding of history Firsthand accounts from the team that found the king along with photographs from the author's own archives and an expanded epilogue incorporating new DNA evidence augment this compelling detective story as the evidence is uncovered

Ned Kelly Craig Cormick, 2014-10 Ned Kelly was hanged at the Old Melbourne Gaol on 11 November 1880 and his body buried in the graveyard there Many stories emerged about his skull being separated and used as a paperweight or trophy and it was finally put on display at the museum of the Old Melbourne Gaol until it was stolen in 1978 It wasn't only Ned Kelly's skull that went missing After the closure of the Old Melbourne Gaol in 1929 the remains of deceased prisoners were exhumed and reinterred in mass graves at Pentridge Prison The exact location of these graves was unknown until 2002 when the bones of prisoners were uncovered at the Pentridge site during redevelopment This triggered a larger excavation that in 2009 uncovered many more coffins and led to the return of the skull and a long scientific process to try to identify and reunite Ned Kelly's remains But how do you go about analysing and accurately identifying a skeleton and skull that are more than 130 years old Ned Kelly Under the Microscope details what was involved in the 20 month scientific process of identifying the remains of Ned Kelly with chapters on anthropology odontology DNA studies metallurgical analysis of the gang's armour and archaeological digs at Pentridge Prison and Glenrowan It also includes medical analysis of Ned's wounds and a chapter on handwriting analysis that all lead to the final challenging conclusions Illustrated throughout with photographs taken during the forensic investigation as well as historical images the book is supplemented with breakout boxes of detailed but little known facts about Ned Kelly and the gang to make this riveting story a widely appealing read

Unwrapping Ancient Egypt Christina Riggs, 2014-04-10 First runner up for the British Kuwait Friendship Society Book Prize in Middle Eastern Studies 2015 In ancient Egypt wrapping sacred objects including mummified bodies in layers of cloth was a ritual that lay at the core of Egyptian society Yet in the modern world attention has focused instead on unwrapping all the careful arrangements of linen textiles the Egyptians had put in place This book breaks new ground by looking at the significance of textile wrappings in ancient Egypt and at how their unwrapping has shaped the way we think about the Egyptian past Wrapping mummified bodies and divine statues in linen reflected the cultural values attached to this textile with implications for understanding gender materiality and hierarchy in Egyptian society Unwrapping mummies and statues similarly reflects the values attached to Egyptian antiquities in the West where the colonial legacies of archaeology Egyptology and racial science still influence how Egypt appears in museums and the press From the tomb of Tutankhamun to the Arab Spring *Unwrapping Ancient Egypt* raises critical questions about the deep seated fascination with this culture and what that fascination says about our own

Living with Disfigurement in Early Medieval Europe Patricia Skinner,2016-12-21 This book is open access under a CC BY 4 0 license This book examines social and medical responses to the disfigured face in early medieval Europe arguing that the study of head and facial injuries can offer a new contribution to the history of early medieval medicine and culture as well as exploring the language of violence and social interactions Despite the prevalence of warfare and conflict in early medieval society and a veritable industry of medieval historians studying it there has in fact been very little attention paid to the subject of head wounds and facial damage in the course of war and or punitive justice The impact of acquired disfigurement for the individual and for her or his family and community is barely registered and only recently has there been any attempt to explore the question of how damaged tissue and bone might be treated medically or surgically In the wake of new work on disability and the emotions in the medieval period this study documents how acquired disfigurement is recorded across different geographical and chronological contexts in the period

Mannequins in Museums Bridget R. Cooks, Jennifer J. Wagelie, 2021-07-07 *Mannequins in Museums* is a collection of historical and contemporary case studies that examine how mannequins are presented in exhibitions and shows that as objects used for storytelling they are not neutral objects. Demonstrating that mannequins have long histories of being used to promote colonialism, consumerism, and racism, the book shows how these histories inform their use. It also engages readers in a conversation about how historical narratives are expressed in museums through mannequins as surrogate forms. Written by a select group of curators and art historians, the volume provides insight into a variety of museum contexts including art history, fashion, anthropology, and wax. Drawing on exhibition case studies from North America, South Africa, and Europe, each chapter discusses the pedagogical and aesthetic stakes involved in representing racial difference and cultural history through mannequins. As a whole, the book will assist readers to understand the history of mannequins and their contemporary use as culturally relevant objects. *Mannequins in Museums* will be compelling reading for academics and students in the fields of museum studies, art history, public history, anthropology, and visual and cultural studies.
