Making Medical Decisions:

Making Medical Decisions Richard Gross, 1999 Never before have the powerful techniques of decision analysis had more importance for patient and doctor This book translates the major principles of medical decision making into clinically relevant and easy to understand terms Filled with examples drawn from patient care and familiar games of chance Making Medical Decisions teaches the reader how to feel confident about giving the best advice in the face of the inherent uncertainties of real world medicine

Making Medical Decisions for the Profoundly Mentally Disabled Norman L. Cantor, 2009-08-21 A legal and moral analysis of medical decision making on behalf of those with such severe cognitive impairments that they cannot exercise self determination In this book Norman Cantor analyzes the legal and moral status of people with profound mental disabilities those with extreme cognitive impairments that prevent their exercise of medical self determination He proposes a legal and moral framework for surrogate medical decision making on their behalf The issues Cantor explores will be of interest to professionals in law medicine psychology philosophy and ethics as well as to parents guardians and health care providers who face perplexing issues in the context of surrogate medical decision making The profoundly mentally disabled are thought by some moral philosophers to lack the minimum cognitive ability for personhood Countering this position Cantor advances both theoretical and practical arguments for according them full legal and moral status He also argues that the concept of intrinsic human dignity should have an integral role in shaping the bounds of surrogate decision making Thus he claims while profoundly mentally disabled persons are not entitled to make their own medical decisions respect for intrinsic human dignity dictates their right to have a conscientious surrogate make medical decisions on their behalf Cantor discusses the criteria that bind such surrogates He asserts contrary to popular wisdom that the best interests of the disabled person are not always the determinative standard the interests of family or others can sometimes be considered Surrogates may even consistent with the intrinsic human dignity standard sometimes authorize tissue donation or participation in nontherapeutic medical research by profoundly disabled persons Intrinsic human dignity limits the occasions for such decisions and dictates close attention to the preferences and feelings of the profoundly disabled persons themselves Cantor also analyzes the underlying philosophical rationale that makes these decision making criteria consistent with law and morals

Making Medical Spending Decisions Mark A. Hall, 1997 This book explores the making of health care rationing decisions through the analysis of three alternative decision makers patients paying out of pocket officials setting limits on treatments and coverage and physicians at the bedside Hall develops this analysis along three dimensions political economics ethics and law The economic dimension addresses the practical feasibility of each method The ethical dimension discusses the moral aspects of these methods while the legal dimension traces the most recent developments in jurisprudence and health law

Practical Decision Making in Health Care Ethics Raymond J. Devettere,2009-12-04 For nearly fifteen years *Practical Decision Making in Health Care Ethics* has offered scholars and students a highly accessible and teachable alternative to the dominant principle based theories in the field Devettere s approach is not based on an ethics of abstract obligations and duties but following Aristotle on how to live a fulfilled and happy life in short an ethics of personal well being grounded in prudence the virtue of ethical decision making This third edition is revised and updated and includes discussions of several landmark cases including the tragic stories of Terri Schiavo and Jesse Gelsinger the first death caused by genetic research Devettere addresses new topics such as partial birth abortion law embryonic stem cell research infant euthanasia in The Netherlands recent Vatican statements on feeding tubes organ donation after cardiac death new developments in artificial hearts clinical trials developed by pharmaceutical companies to market new drugs ghostwritten scientific articles published in major medical journals and controversial HIV AIDS research in Africa This edition also includes a new chapter on the latest social and political issues in American health care Devettere s engaging text relies on commonsense moral concepts and avoids academic jargon It includes a glossary of legal medical and ethical terms an index of cases and thoroughly updated bibliographic essays at the end of each chapter that offer resources for further reading It is a true classic brilliantly conceived and executed and is now even more valuable to undergraduates and graduate students medical students health care professionals hospital ethics committees and institutional review boards and general readers interested in philosophy medicine and the rapidly changing field of health care ethics **Data Mining to Determine Risk in Medical Decisions**

Patricia B. Cerrito,2011-11-15 Decisions regarding the risks involved in medical treatments must belong to patients and their physicians after all it is the patient s health and life which is at stake But patients will not be equipped for this decision making process if they cannot be given some idea as to the risks and benefits of treatment Such risks are generally estimated by a consensus panel of specialist physicians using supporting medical literature Unfortunately this literature does not always provide a good estimate of risk particularly in the case of rare occurrences This book demonstrates statistical techniques that can be used to investigate matters of risk These include kernel density estimation predictive modeling association rules and text analysis It also shows through example how these techniques can provide meaningful results and examines current methods discussing some of the flaws in models which may lead to misleading results After a general introduction to the concept of medical risk the subjects covered include the process by which rare occurrences are investigated in drugs or treatments the trade offs between risks and benefits extrapolation of clinical trial results and the cost of healthcare in relation to risks It also examines problems such as competing risks error and the use of group identities

as well as looking at the issue of futility The book concludes with a chapter providing a general discussion and summary and an appendix shows some of the processes for using SAS Enterprise Miner to perform some of the models used in the text

Your Health, Your Decisions Robert Alan McNutt, 2016-09-02

In nearly every medical decision making encounter the physician is at the center of the discussion with the patient the recipient of the physician's decisions

Dr Robert Alan McNutt starts from a very different premise the patient should be at the center

McNutt challenges the physician directed medical expertise model of making decisions presenting a practical approach augmented by formal exercises designed to give patients the tools and confidence to compare and contrast their health care options so they can make their own choices

He addresses a number of scenarios including heart disease breast cancer and prostate cancer conditions that pose a range of choices that patients may face about diagnoses and treatments

After providing a clear explanation of what is the highest quality medical decision making information McNutt teaches patients to use that information to weigh the harms and benefits of their treatment options empowering them to ask critical questions as they take a stronger hand in their own care

Your Health Your Decisions moves from specific scenarios that commonly baffle patients to a systematic exploration of how to make medical decisions

By offering patients the tools they need to be full partners in their own health care McNutt demystifies what can be a bewildering and even terrifying process
