Making Of Alien Resurrection:

Making of Alien Resurrection Andrew Murdock, 1997-11-28 Alien Resurrection marks the fourth installment in the Alien science fiction film series. The story takes us into deep space where the USS Auriga is the venue for clandestine scientific experiments in the name of medical advancement. The arrival of the Betty, a rock n roll spacecraft with a cargo of live hosts and a volatile crew, plants the seeds for confirmation and conflict. Sigourney Weaver returns as the genetically corrupted Lieutenant Ripley and is joined by Winona Ryder as the auton robot Call and an eclectic crew of renegade space pirates in a quest to find meaning in a world that seeks to tamper with the lethal and mysterious alien life form. Director Jean Pierre Jeunet, who generated the abstract and visually arresting films *Delicatessen* and *The City of Lost Children*, takes creative license to establish another uniquely stylized futuristic vision. The Making of Alien Resurrection is a celebration of the creative process involved in the completion of a major feature film. Join the director, cinematographer, designers, editors, visual effects consultants, special effects technicians, artists, sculptors, and a myriad of other talented people in a collaborative journey to fabricate an idiosyncratic perception of the future.

Technoscience in Contemporary Film Aylish Wood, 2002 This analysis of images of science and technology from popular films of the 1980s and 1990s argues that films as diverse as the science fiction film *Jurassic Park* contribute to popular understandings of science and technology.

Bodies in the Making Nancy N. Chen, 2006 In the twenty first century the body is experienced less as a fixed entity than it is as a protean product and a project of technological, medical, and artistic invention. The essays in *Bodies in the Making: Transgressions and Transformations* address the proliferation of such transformative practices as tattooing, piercing, self-cutting, cosmetic and transsexual surgery, prosthetics, organ transplants, and life extension technologies. Establishing links among these varied practices, the contributors illuminate the dramatic and widespread changes that have taken place across generations in attitudes towards the relation of the body to the mind, to agency, and to subjectivity. *Bodies in the Making* also addresses a paradox that has shaped recent body modification debates. Although physical transformations are usually experienced as self-expressive and liberatory, they are frequently understood to be socially determined, economically driven, and culturally enmeshed. Contributors to the volume engage this contradiction directly, exploring ways in which diverse body practices are capable of subverting power while also at times reinscribing it.

Focus On: 100 Most Popular 1990s Science Fiction Films Wikipedia contributors, **Becoming Alien** Sarah Welch-Larson, 2021-02-25 The Alien films are perceived to be a fractured franchise, each one loosely related to the others. They are nonlinear, complicated, convoluted, a collection of genre movies ranging from horror to war to farce. But on closer examination, the threads that bind together these films are strong and undeniable. The series is a model of Catherine Keller's cosmology as a cycle of order out of chaos, an illustration of her concept of evil as discreation. When viewed through the lens of Keller's *Face of the Deep*, the Alien films resolve into a cohesive whole. The series becomes six views of the idea of evil as exploitation, its origins, and its consequences. Each film

expands on the concept of evil set forth by its predecessors complicating that conception and retroactively enriching readings of the films that came before **Predator - The Unofficial Guide to the Movie Franchise** Nick Naughton, 2023-10-20 Predator is a product of the last great era of Hollywood action films the eighties A decade of bone crunching blood splattered foul mouthed blockbuster epics Robocop The Terminator Die Hard Commando that wouldn't know what a PG 13 rating was if it skewered them with a spear and ripped their spinal column out to keep as a trophy as the Predator is apt to do on occasion In this book we'll take a deep dive into the original Predator and all the sequels it spawned We'll discuss all of these films in this book and we shall also of course discuss the two AvP pictures too We'll look at the background of each film the development of them and discuss what worked and what didn't in the actual movie **Hollywood Online** Ian London, 2024-03-07 Hollywood Online provides a historical account of motion picture websites from 1993 to 2008 and their marketing function as industrial advertisements for video and other media in the digital age The Blair Witch Project is the most important example of online film promotion in cinema history Over the last thirty years only a small number of major and independent distributors have converted internet created buzz into box office revenues with similar levels of success Yet readings of how the film's internet campaign broke new ground in the summer of 1999 tend to minimize or overlook or ignore the significance of other online film promotions Similarly claims that Blair initiated a cycle of imitators have been repeated in film publications and academic studies for more than two decades This book challenges three major narratives in studies about online film marketing Hollywood's major studios and independents had no significant relationship to the internet in the 1990s online film promotions only took off after 1999 because of Blair and Hollywood cashed in by initiating a cycle of imitators and scaling up corporate activities online Hollywood Online tests these assumptions by exploring internet marketing up to and including the film's success online Pre Blair 1993-9 then by examining the period immediately after Blair Post Blair 2000-8 which broadly coincides with the rise and decline of DVD as well as the emergence of the social media sites MySpace Facebook and Twitter

Michele Brittany, 2017-11-21 In sharp contrast to many 1960s science fiction films with idealized views of space exploration, Ridley Scott's *Alien* (1979) terrified audiences depicting a harrowing and doomed deep space mission. The *Alien* films launched a new generation of horror set in the great unknown, inspiring filmmakers to take Earth-bound franchises like *Leprechaun* and *Friday the 13th* into space. This collection of new essays examines the space horror subgenre with a focus on such films as Paul W. S. Anderson's *Event Horizon*, Duncan Jones' *Moon*, Mario Bava's *Planet of the Vampires* and John Carpenter's *Ghosts of Mars*. Contributors discuss how filmmakers explored the concepts of the final girl, survivor, the uncanny valley, the isolationism of space travel, religion and supernatural phenomena. **Alien Vault** Ian Nathan, Veronica

Cartwright, 2019-11-19 *Alien Vault* opens a portal into the making of the legendary film *Alien*, tracing its path from embryonic concept to fully fledged box office phenomenon. Previously published in 2011, the new edition includes an additional chapter tracing the path of Ridley Scott's return to the *Alien* saga with *Prometheus* and *Alien: Covenant*. For 40 years, audiences have been simultaneously captivated and appalled as the spaceship *Nostromo* is invaded and its crew stalked by a terrifying parasitic creature. From the gore of the infant alien bursting from Kane's chest to the mounting claustrophobia as Ripley discovers the monster has followed her into the escape shuttle, *Alien* is a chilling masterpiece. Featured herein are Director Ridley Scott's own annotated storyboards, Polaroids and script pages; the elegant but disturbing concept artwork of H. R. Giger; sketches and construction blueprints for the *Nostromo*; costume designs by Moebius; a treasure trove of never-before-seen photographs of the cast and crew; 10 meticulously reproduced artifacts such as replications of storyboards; a detailed schematic of the *Nostromo*; early designs of O. Bannion's facehugger concept; and a promotional poster from Japan enclosed in envelopes for readers to remove and examine more closely. Fully authorized and illustrated throughout, the updated *Alien Vault* is the ultimate tribute to a film that changed cinema forever. **Meanings of Ripley** Elizabeth Graham, 2020-05-22

Ellen Ripley of the *Alien* Quadrilogy has become an iconic female figure in the male-dominated genre of science fiction action horror since her first appearance in 1979. This collection offers readers varied interpretations of Ripley that are grounded in the social context and theoretical perspectives that were dominant prior to and during the time the films were released. Specifically, the rise of Second Wave Feminism and the backlash against it provides a backdrop for this collection. Is Ripley a feminist hero? A patriarchal woman and mother? Does she embody de Beauvoir's myth of the feminine? Does she exhibit sexual agency? Does she offer us a glimpse of individual autonomy that moves away from dichotomous gender roles? These are the

primary questions explored in this collection While the focus is clearly on Ripley the arguments go beyond the confines of the films by examining the relationship between the individual and society in which both are product and producer of the other and illustrate that social artifacts such as film can provide insights into the lived experiences of our world The contributors come from a variety of backgrounds including Literature Cinema Studies Gender and Women s Studies Philosophy Sociology Theatre History and reside in Canada and the United States They represent a range from junior to senior scholars While science fiction is clearly an interest of all these individuals it is not the primary area of research for most of them By bringing voices from multiple disciplines into the discussion about Ripley this collection offers readers perspectives that deviate from and yet complement the current trend in film criticism and thus contributes to opening up discussions about such characters and the genre to a wider audience

Alien Legacies Nathan Abrams,Gregory Frame,2023 The 1979 film *Alien* has left an indelible mark on popular culture Directed by Ridley Scott at the time known primarily for making advertisements and starring then unknown actor Sigourney Weaver in the lead role it transcended its humble origins to shock and disturb audiences upon its initial release Its success has led to three direct sequels two prequels one mashup franchise a series of comic books graphic novels novelizations games and an enormous and devoted fanbase For forty years *Alien* and its progeny have animated debate and discussion among critics and academics from a wide variety of fields and methodological perspectives This book brings together scholars from diverse disciplinary backgrounds to explore *Alien* through a contemporary lens The chapters here demonstrate the extent to which its effects and reception are deeply multifaceted with the *Alien* franchise straddling the lines between high and low culture playing with generic categories crossing media boundaries and animating theoretical critical and political debates Chapters touch on female agency and motherhood the influence of H R Giger the viscerality of *Alien* s body horror the narrative tradition of the Female Gothic the patriarchal gaze in the *Alien* video games and the rise of in universe online marketing campaigns In so doing the volume aims to debate *Alien* s legacy consider its current position within visual culture and establish what the series means and why it still matters forty years since its birth

The Futurist Rebecca Keegan,2010-10-05 With the release of *Avatar* in December 2009 James Cameron cements his reputation as king of sci fi and blockbuster filmmaking It s a distinction he s long been building through a directing career that includes such cinematic landmarks as *The Terminator* *Aliens* *The Abyss* and the highest grossing movie of all time *Titanic* *The Futurist* is the first in depth look at every aspect of this audacious creative genius

culminating in an exclusive behind the scenes glimpse of the making of Avatar the movie that promises to utterly transform the way motion pictures are created and perceived As decisive a break with the past as the transition from silents to talkies Avatar pushes 3 D live action and photo realistic CGI to a new level It rips through the emotional barrier of the screen to transport the audience to a fabulous new virtual world With cooperation from the often reclusive Cameron author Rebecca Keegan has crafted a singularly revealing portrait of the director s life and work We meet the young truck driver who sees Star Wars and sets out to learn how to make even better movies himself starting by taking apart the first 35mm camera he rented to see how it works We observe the neophyte director deciding over lunch with Arnold Schwarzenegger that the ex body builder turned actor is wrong in every way for the Terminator role as written but perfect regardless After the success of The Terminator Cameron refines his special effects wizardry with a big time Hollywood budget in the creation of the relentlessly exciting Aliens He builds an immense underwater set for The Abyss in the massive containment vessel of an abandoned nuclear power plant where he pushes his scuba breathing cast to and sometimes past their physical and emotional breaking points including a white rat that Cameron saved from drowning by performing CPR And on the set of Titanic the director struggles to stay in charge when someone maliciously spikes craft services mussel chowder with a massive dose of PCP rendering most of the cast and crew temporarily psychotic Now after his movies have earned over 5 billion at the box office James Cameron is astounding the world with the most expensive innovative and ambitious movie of his career For decades the moviemaker has been ready to tell the Avatar story but was forced to hold off his ambitions until technology caught up with his vision Going beyond the technical ingenuity and narrative power that Cameron has long demonstrated Avatar shatters old cinematic paradigms and ushers in a new era of storytelling The Futurist is the story of the man who finally brought movies into the twenty first century
