Financia We The Future David Pattinson,2015-08-07 America has entered a new era The Great Recession of 2007 09 completely altered the way our society approaches employment The economy is placing an increasing emphasis on knowledge and technology Our world is becoming more globalized and interconnected than ever It is undeniable our world is changing Change is a good thing but it can also be painful and I believe that Millennials have born the pain of these historic shifts more than any other group Since the start of the Recession the unemployment rate for young adults has been significantly higher than the national average Total student debt in America exceeds 1 trillion dollars And young people continue to face serious challenges in obtaining meaningful employment Despite these obstacles I believe young people have the power to achieve success in this new era But this will require major shifts in how we approach education what we expect from our government and how we plan our own careers This book is a reflection of the trends and tribulations that have made up this post Recession era and offers guidance on how to build meaningful dynamic careers It is a collection of the

important conversations young people and those who advise them need to have in order to grasp success in a new economic age We are the future of America I believe the future is bright if we decide to act now *Help Efficient, Accessible, Low-Cost, Timely Healthcare (HEALTH) Act of 2003* United States. Congress. House. Committee on the Judiciary,2003

Affordable Healthcare Akram Ali, MD,2019-10-10 Our healthcare system is on life support It does not need temporary relief What it needs is intensive therapy for a quick recovery We need to abandon persistent past failures and current abuses to pursue a fundamentally different approach to achieve affordable healthcare for everyone The fundamental problem of healthcare in our country is the persistently rising medical care cost Nationally we spent 254 billion in 1980 and 3.3 trillion in 2018 a 1200% rise in about four decades in contrast our population increased by 32% during the same time period and yet about 30 million Americans remain uninsured and about 25 million under insured Those who are insured pay extra out of pocket in addition to paying high premiums and high deductibles The medical care insurers are often blamed for rising medical care cost although they only collect premiums from the consumers and pay the bills of the medical care providers doctors hospitals drug makers and others As the size of providers bills goes up so do the premiums of the insurers The providers grossly abuse the system and they are accountable to no one Here an innovative practical and sustainable system is presented that would control these abuses and make quality basic medical care affordable to everyone at about half the current cost Per capita medical care cost in every state would be calculated and capped This would not be socialized medicine nor would it be controlled by the government This would be independent and non profit system It would be guided by the Central Board and managed by the State Boards It would be overseen by the respective Senates This plan would be pilot tested in a small state for three years prior to its application nationwide
