Chapter 1. Professional Nursing

MULTIPLE CHOICE

1. The nurse completes an admission database and explains that the plan of care and discharge goals will be developed with the patients input. The patient states, How is this different from what the doctor does? Which response would be most appropriate for the nurse to make?
- a. The role of the nurse is to administer medications and other treatments prescribed by your doctor.
 - b. The nurses job is to help the doctor by collecting information and communicating any problems that occur.
 - c. Nurses perform many of the same procedures as the doctor, but nurses are with the patients for a longer time than the doctor.
 - d. In addition to caring for you while you are sick, the nurses will assist you to develop an individualized plan to maintain your health.

ANS: D

This response is consistent with the American Nurses Association (ANA) definition of nursing, which describes the role of nurses in promoting health. The other responses describe some of the dependent and collaborative functions of the nursing role but do not accurately describe the nurses role in the health care system.

DIF: Cognitive Level: Understand (comprehension) REF: 3

TOP: Nursing Process: Implementation MSC: NCLEX: Safe and Effective Care Environment

2. The nurse describes to a student nurse how to use evidence-based practice guidelines when caring for patients. Which statement, if made by the nurse, would be the most accurate?
