of Genocide in Cinema Jonathan Friedman, William Hewitt, 2016-10-27 The organization Genocide Watch estimates that 100 million civilians around the globe have lost their lives as a result of genocide in only the past sixty years Over the same period the visual arts in the form of documentary footage has aided international efforts to document genocide and prosecute those responsible but this book argues that fictional representation occupies an equally important and problematic place in the process of shaping minds on the subject Edited by two of the leading experts in the field The History of Genocide in Cinema analyzes fictional and semi fictional portrayals of genocide focusing on amongst others the repression of indigenous populations in Australia the genocide of Native Americans in the 19th century the Herero genocide Armenia the Holodomor Stalin's policy of starvation in Ukraine the Nazi Holocaust Nanking and Darfur Comprehensive and unique in its focus on fiction films as opposed to documentaries The History of Genocide in Cinema is an essential resource for students and researchers in the fields of cultural history holocaust studies and the history of film

Filming History from Below Efrén Cuevas, 2022-01-11 Traditional historical documentaries strive to project a sense of objectivity producing a top down view of history that focuses on public events and personalities In recent decades in line with historiographical trends advocating history from below a different type of historical documentary has emerged focusing on tightly circumscribed subjects personal archives and first person perspectives Efrén Cuevas categorizes these films as microhistorical documentaries and examines how they push cinema's capacity as a producer of historical knowledge in new directions Cuevas pinpoints the key features of these documentaries identifying their parallels with written microhistory a reduced scale of observation a central role given to human agency a conjectural approach to the use of archival sources and a reliance on narrative structures Microhistorical documentaries also use tools specific to film to underscore the affective dimension of historical narratives often incorporating autobiographical and essayistic perspectives and highlighting the role of the protagonists personal memories in the reconstruction of the past These films generally draw from family archives with an emphasis on snapshots and home movies Filming History from Below examines works including Peter Forgács's films dealing with the Holocaust such as The Maelstrom and Free Fall documentaries about the Israeli Palestinian conflict Rithy Panh's work on the Cambodian genocide films about the internment of Japanese Americans during the Second World War such as A Family Gathering and History and Memory and Jonas Mekas's chronicle of migration in his diary film Lost Lost Lost

The Unsolved Murder of Adam Walsh Arthur Jay Harris, 2016-03-01 Another hitch missing autopsy The Walsh case was hampered by various problems including a missing autopsy report and a glitch in identifying the remains The Miami Herald March 28 2010 From The Unsolved Murder of Adam Walsh Book One The Adam Walsh story you know After 6 year old Adam was found murdered his father John Walsh channeled his unbearable grief into becoming an angry crime fighting TV host Yet this is the story you don't know For decades officials had never revealed the file proving the child was Adam Astonishingly it showed that the ID of the dead child had never been completed Why Was it because the evidence was either inconclusive or showed that the

child likely actually wasn't Adam. After Hollywood Police closed the case in 2008, not only was the police investigative file made a public record, so were the medical examiners' files in two districts. Harris asked to see all of them and realized this. As shown by his smile in the missing picture, Adam's top front baby teeth were both gone. But the found child had a buck tooth, a left top front tooth that was in almost all the way in the words of a state forensic anthropologist who the police had later consulted. When was the missing picture taken? How long before Adam vanished? John Walsh wrote it was one week. Harris found it was actually about a month. He found Adam's last best friend who said he saw him a week or two before he disappeared and remembered that he still didn't have any top front teeth. However, the police's last seen alive description reads that his top left front tooth was partially in. So within the week or two before Adam disappeared, his new tooth had erupted. Two weeks after Adam was gone, the child's head was found. The Fort Lauderdale medical examiner told the newspapers then that the child, Adam, he said, had been dead for possibly all of the 14 days he had been missing. Teeth don't keep growing after death. In just that week or two before he disappeared, could Adam's top left front tooth have gone from eruption to in almost all the way? That would be very unusual, if not impossible. More likely it would have taken months, maybe up to six. Pediatric and forensic dentists and parents of young children told Harris. If indeed Adam's top left front tooth doesn't match the same one in the found child, there also should be other indicators that they don't match. To compare discovered abandoned bodies with missing people, forensic dentists use the missing person's dental charts and dental X-rays. The upstate medical examiner who made the positive ID wrote that Adam's dental chart showed that he had a filling in a lower left molar that matched a filling in the found child. But that was only enough for a presumptive ID, which is less than a positive ID. It was only one filling, and it was in a common place for children to have cavities. And the dental chart he used is missing from his file, as well as the files of Hollywood Police, which originally handled it, and the Fort Lauderdale medical examiner, who the upstate M.E. said he gave a copy to. Further, none of the files mention ever getting or using Adam's dental X-rays for a comparison. Those would have made for a definitive match or a negative match. Nor is there a mention anywhere of a forensic dental consultation, ordinarily done in such circumstances to make positive IDs. Adam's dentist says he no longer has the original records, so the examination that should have been done then can never be done in the future. Even worse, there is no autopsy report. The medical examiner who performed the autopsy admitted in writing that neither he nor anyone else in his office ever wrote one. Detectives, prosecutors, and defense attorneys who work homicides told Harris they had never heard of that ever happening before. This is what it all means. As there never has been, there never can be a trial for the murder of Adam Walsh, because prosecutors can never establish that the murder victim was Adam Walsh. Instead, this case is about something different: crimes, injustices, and horrors against likely two young children, their families, and their communities. A child close in age to Adam, who has never been correctly identified, whose parents were never notified, and whose murder was never investigated, and who was not buried under his or her correct identity. And also the kidnapping of a young boy in a
