Biomechanics of Cell Division Nuri Akkas,2013-03-09 There are virtually hundreds of life scientists publishing hundreds of papers a year on numerous aspects of the cell cycle The following are few of the topics covered cell membrane organization membrane components cytoskeleton and associated proteins cell motility actin in dividing cells surface modulating assemblies microfilaments microtubules cleavage furrow fusion etc In all these topics lifescientists talk about among others the forces within the system the motion within the system and the failure of the system The concepts of force motion and failure are one way or another all related to the structure of the cell and to the mechanics of the cell activities When the concepts of mechanics and structure enter the problem then one has to talk about biomechanics in this case biomechanics of cytology which we would like to call Cytbmechanics However a review of the journals books and conference proceedings related to various aspects of cytology reveals that mechanicians have not yet entered the field of cytology at a noticeable level Some lifescientists have indeed made use of the general principles of mechanics in their works however no truly interdisciplinary publication has yet appeared from the collaboration of mechanicians and lifescientists in the field of for instance cell division

Lectures on Developmental Physiology Alfred Kühn, 2013-03-14 1 Jind published lectures insipid ALEXANDER VON HUMBOLDT ta LOUIS AGASSIZ January 15 1840 Many things speak against the publication of lectures The effect of the spoken word is very different from that of the written word Repeated recapitulations which help the listener understand are unnecessary and the overtones of speech disappear in print A lecture particularly when not meant for beginners and not offered in preparation for a test permits the privilege of subjective choice and when published it is rightly open to criticism So it has not been easy for me to determine to publish these lectures which I have given in various forms in Göttingen and then again in Tübingen In the end the deciding factors were the urging of my students the encouragement of colleagues many of whom I was delighted to see among my listeners and the wish of my publisher with whom I have enjoyed a friendly relationship for a long time The final form of the text is basically a copy and thus real lectures are the heart of it If the lectures had not been taken down repeatedly this book would not have appeared I could not have undertaken a textbook sized compilation of this material With all the changes the organization the line of thought and of ten the composition of the lectures themselves were retained They may recall to my listeners of old the hours we spent together
