Mobile Ipv6: Mobility In A Wireless Internet Hesham Soliman, 2004 Mobile Video with Mobile IPv6 Daniel Minoli, 2012-07-30 Increased reliance on mobile devices and streaming of video content are two of the most recent changes that have led those in the video distribution industry to be concerned about the shifting or erosion of traditional advertising revenues Infrastructure providers also need to position themselves to take advantage of these trends Mobile Video with Mobile IPv6 provides an overview of the current mobile landscape then delves specifically into the capabilities and operational details of IPv6 The book also addresses 3G and 4G services the application of Mobile IPv6 to streaming and other mobile video outputs and closes with a chapter on future directions *IPv6 Mandates* Karl A. Siil, 2008-03-10 Here s the guide you need for a smooth transition to IPv6 Ready or not IPv6 is coming While every enterprise will have some individual issues to manage this guide will help you decide on a transition strategy develop a plan execute it and verify progress You ll understand the common tasks and recognize the risks and limitations of IPv6 Follow the guidelines use the checklists and you will find that making the transition is no longer intimidating in fact it may even require fewer resources than you anticipate Handle your transition as you would any large scale technology rollout Know at every stage whether you re on track and how to fix things if you re not Understand the Federal mandates that are driving IPv6 adoption Craft plans that take into account the unique elements and pitfalls related to IPv6 Discover IPv6 specific issues such as rules regarding the use and allocation of IPv6 addresses Establish groups of tasks identify and resolve dependencies among them and assign an optimal order for execution Maintain your newly IPv6 capable network to keep it operational and secure *Convergence and Hybrid Information Technology* Geuk Lee, Daniel Howard, Dominik Ślęzak, 2011-09-13 This book constitutes the refereed proceedings of the 5th International Conference on Convergence and Hybrid Information Technology ICHIT 2011 held in Daejeon Korea in September 2011 The 94 revised full papers were carefully selected from 323 initial submissions The papers are organized in topical sections on communications and networking intelligent systems and applications sensor network and cloud systems information retrieval and scheduling hardware and software engineering security systems robotics and RFID Systems pattern recognition image processing and clustering data mining as well as human computer interaction
