Mobilizing The Community Local Politics In The Era Of The Global City:

Mobilizing the Community Robert Fisher, Joseph M. Kling, 1993-09-17 In an era of global transition contemporary grassroots organizing represents the dominant form of resistance available to people who seek to control their lives. It is the basis for restoring public life, empowering individuals and communities, and challenging the state and the capital. Through empirically based case studies and theoretical essays, *Mobilizing the Community* discusses strategies, tactics, ideology, and leadership often used in grassroots mobilization. It covers citizen initiatives, ethnic self-help organizations, community-based development and service delivery programs, political lobbying and advocacy efforts, political party building, and direct action protest groups. The empowerment of various groups—middle class suburbanites, the poor, women, gay men, lesbian women, communists, neopopulists, workers, immigrants, hispanics, and blacks—is addressed. This comprehensive volume provides powerful suggestions to scholars, practitioners, and analysts of urban studies and political science, as well as activists. This is a very useful volume. Its emphasis on the process of community organizing leads to a focus on tactics, strategy, resource acquisition, and alliance formation. This complements the more usual survey studies of movement participants, which tend to be static and give equal weight to each individual. **Housing Studies**

Extraordinary Politics Charles Euchner, 2018-02-19 Political protest and social movements: their history, their cyclical development, their organization strategies, and tactics constitute what Charles Euchner calls extraordinary politics, an antidote to the breakdown of politics as usual and a necessary, if not sufficient, condition of democracy. Activists have set the pace on every conceivable issue, including the environment, gay rights, feminism, abortion, states' rights, religion, and multiculturalism. The president and Congress can barely keep up, but extraordinary politics keeps evolving. With style and grace, the author weaves together hundreds of examples drawn from movements spanning the ideological spectrum to offer both a practical and intellectual guidebook to political activism in a reputedly apathetic age, embracing with abandon the art of making a difference. When dissidents and activists toppled powerful regimes across the globe in the 1980s and 1990s—from the Soviet Union to South Africa, from Nicaragua to the Philippines—how did Americans respond to challenges in their own country? The conventional wisdom is that Americans sullenly withdrew from all manner of political action. But in fact, activists of all backgrounds took to the streets to challenge ordinary structures of politics. These movements: their history, their cyclical development, their organization strategies, and tactics constitute what the author calls extraordinary politics. Activists have set the pace on every conceivable issue, including the environment, gay rights, feminism, abortion, states' rights, religion, and multiculturalism. The president and Congress can barely keep up, but extraordinary politics keeps evolving. With style and grace, Charles Euchner weaves together hundreds of examples drawn from movements spanning the ideological spectrum to offer both a practical and intellectual guidebook to political activism in a reputedly apathetic age, embracing with abandon the art of making a difference. Widening Democracy: Citizens and Participatory Schemes in Brazil and Chile, 2009-08-17 From democratic restoration in the 1980s up

to today most Latin American countries have been struggling constantly to find a workable balance between the need to strengthen the authority of state institutions and their citizens aspirations to have a real say in the decision making process This book looks at the contrasting ways in which both Brazil and Chile have been dealing with societal demands for participation during the last two decades The contributors to this volume highlight a series of historical and political factors that help to understand why Brazil has been able to introduce innovative democratizing policies while Chile has largely failed in the advancement of participatory schemes as its decision making process continues to be heavily top down and technocratic Contributors Rebecca N Abers Gianpaolo Baiocchi Adolfo Castillo Diaz Herwig Cleuren Gonzalo Delamaza Vicente Espinoza Joe Foweraker Marcus Klein Kees Koonings Adalmar Marquetti Patricio Navia William R Nylen Paul W Posner Patricio Silva and Brian Wampler *Urban Movements in a Globalising World* Pierre Hamel, Henri Lustiger-Thaler, Margit Mayer, 2003-09-02 This collection deals with the transformation of urban movements in these new social economic and political environments *Comprehensive Handbook of Social Work and Social Welfare, Social Work Practice* , 2008-03-31 Comprehensive Handbook of Social Work and Social Welfare Volume 3 The Profession of Social Work features contributions from leading international researchers and practitioners and presents the most comprehensive in depth source of information on the field of social work and social welfare **Race and Politics** Leland T. What's Left of Blackness T. Fisher, 2012-10-15 This book analyzes the political transformations in black women's socially engaged community based political work in England in the late twentieth century It situates these shifts alongside Britain's political economy and against the discourse and deployment of blackness as a political imaginary in which to engage in struggles for social justice

Community Organizing for Urban School Reform Dennis Shirley, 2010-01-01 Observers of all political persuasions agree that our urban schools are in a state of crisis Yet most efforts at school reform treat schools as isolated institutions disconnected from the communities in which they are embedded and insulated from the political realities which surround them *Community Organizing for Urban School Reform* tells the story of a radically different approach to educational change Using a case study approach Dennis Shirley describes how working class parents public school teachers clergy social workers business partners and a host of other engaged citizens have worked to improve education in inner city schools Their combined efforts are linked through the community organizations of the Industrial Areas Foundation which have developed a network of over seventy Alliance Schools in poor and working class neighborhoods throughout Texas This deeply democratic struggle for school reform contains important lessons for all of the nation's urban areas It provides a striking point of contrast to orthodox models of change and places the political empowerment of low income parents at the heart of genuine school improvement and civic renewal

Democratic Policing in Transitional and Developing Countries Michael D. Wiatrowski, 2016-05-13 Is it possible to create democratic forms of policing in transitional and developing societies This volume argues that policing models and practices promoted by the west are often inadequate for adoption by countries making democratic transitions because they do not adequately address issues such as human rights equity co production accountability openness and organizational change Therefore police reform is often limited to a one size fits all approach The book expands the dialogue so that discussions of democratic policing around

the world are more realistic comprehensive and sensitive to the local context Detailed case studies on Iraq South Africa Northern Ireland and Kazakhstan provide a realistic assessment of the current state of policing The editors use the studies to suggest how to promote democratic policing and other important goals of democratic reform around the world The volume will assist academics policy makers NGOs and others in tailoring a local democratic policing strategy within a broader framework to enhance socioeconomic development and citizen capacity build social capital reduce various forms of conflict and support human rights

The Ethnic Entanglement Lui Hebron, John F. Stack, 1999-06-30 The ongoing reconstruction of world politics following the collapse of Soviet and Eastern European variants of communism have seemingly unleashed the power of ethnicity with a vengeance Stack Hebron and their contributors explore the concept of ethnicity in international relations seeking to address this most destabilizing yet ubiquitous dimension of the emerging new world order As a central force in international politics ethnicity and ethnonational movements raise two fundamental questions about the nature of power and politics in contemporary international relations First what is the relationship between ethnicity and conflict within across and among states Second what role does ethnicity play in exacerbating conflicts which result in the intervention by external forces both state and nonstate manifested by increasing levels of violence and spillover instability as exemplified by the Middle East the Asian Republics of the former Soviet Union and Yugoslavia This book is designed to provide scholars of international relations with a compelling approach to the study of ethnicity The study of ethnic nationalism is a growing area of scholarly inquiry not fully appreciated Thus this collection is designed to fill a void in the literature and as such will be of interest to students scholars and policy makers involved with issues of ethnicity and world politics
