Music Collection Development and Management in the Digital Age Kirstin Dougan Johnson, 2023

Music Collection Development and Management in the Digital Age offers both a theoretical context and practical approaches to the issues facing today's music collection builders and managers. In this exciting new book, Kirstin Dougan Johnson engages readers with many of the core responsibilities involved with music collections in both music library and general library settings. The author examines the whole of music collections, incorporating into that vision guidance on the principles and tasks involved with collection building, acquisitions, management, and assessment. Details include music formats and publishing, music identification and discoverability, the context of music collections, and the tasks involved in building and scoping them, diversity and inclusion in music collections, budgets and acquisitions workflows, pre and post order tasks, collection management and assessment, and future directions for collection development in music. With its focus on issues related to music scores and media in physical and electronic forms, *Music Collection Development and Management in the Digital Age* directly addresses subject librarians who select music materials in academic libraries. The volume also serves music librarians in other settings such as public and conservatory libraries. All in all, *Music Collection Development and Management in the Digital Age* is an essential reference for all who work with music collections, whether in music libraries specifically, general library collections with music holdings, or centralized library acquisitions departments.

A Comparative History of the Literary Draft in Europe Olga Beloborodova, Dirk Van Hulle, 2024-11-15

Literary drafts are a constant in literatures of all ages and linguistic areas, and yet their role in writing processes in various traditions has seldom been the subject of systematic comparative scrutiny. In 38 chapters written by leading experts in many different fields, this book charts a comparative history of the literary draft in Europe and beyond. It is organized according to eight categories of comparison distributed over the volume's two parts devoted respectively to Text i.e. the textual aspects of creative processes and Beyond Text i.e. aspects of creative processes that are not necessarily textual. Across geographical, temporal, linguistic, generic, and media boundaries to name but a few, this book uncovers idiosyncrasies and parallels in the surviving traces of human creativity while drawing the reader's attention to the materiality of literary drafts and the ephemerality of the writing process they capture.
