Municipal Budget Crunch Roger L. Kemp, 2014-01-10 This book is based on a national literature search focusing on the best practices of cities of all sizes and geographic locations intended to maintain public services while holding down taxes. Many public officials have great ideas but tend to work in a vacuum so they don't know what other cities are doing. This volume codifies knowledge in this new field for the first time. Every case study included in this book has the city's website listed. This reference work makes it easy for professionals seeking additional information on any and all budget reduction methods that seem to work somewhere.

Civics 101 Roger L. Kemp, 2022-02-23 Citizens generally have a desire to learn more about America's cities including their own community's municipal government. This is true because people spend most of their lives living, working, and paying municipal taxes in cities. Many citizens, however, know more about their state and federal government than they do about the city in which they live. This is primarily due to the extensive media coverage given to topical issues and news events plus what they as students were never taught in high school civics classes many years ago. City government is the level of government of which citizens should be most informed. After all, the decisions made by the local elected public officials, mayors, and city council members have a more direct and greater impact on their lives than do those decisions made by elected leaders in higher levels of government. This thirst for knowledge is made apparent when speaking before community groups and professional organizations about how much municipal government works. Most citizens want to know more about the operations of their local government including the roles of their elected officials, advisory bodies, chief administrative officer, and the various functional managers that make government work.

Cities and Water Roger L. Kemp, 2008-12-26 Droughts, global warming, and rising infrastructure costs have brought new attention to water as both an urban planning and an environmental issue. This volume presents many best practice case studies to show how cities and towns throughout the United States are restoring their wetlands, watersheds, rivers, beaches, and harbors, even as rapid urbanization has put more stress on water supplies. These collected accounts are designed to educate citizens and public officials about water-related issues and future concerns. Regional and national resource directories are included.

Civics 108 Roger L. Kemp, 2022-07-24 It should be remembered that government organizations like their business counterparts have distinct life cycles. During their lives, public organizations generally go through four phases: growth, stability, retrenchment, and revitalization. Different political and management strategies are needed to set the course and properly guide an organization through each phase of its development. Strategy is concerned with defining purposes and developing goals and plans for an organization's future direction and growth. While some cities, particularly those in suburban areas with an expanding tax base, are in the growth or stability phase of their life cycle, many others have entered the retrenchment or revitalization phase of their development. Sound budget reduction strategies will assist public officials in this latter category as they debate and adopt policies that ultimately lead to the financial self-help and renewal necessary for the future.
