The Encyclopedia of Film Composers Thomas S. Hischak,2015-04-16 For more than a century original music has been composed for the cinema From the early days when live music accompanied silent films to the present in which a composer can draw upon a full orchestra or a lone synthesizer to embody a composition music has been an integral element of most films By the late 1930s movie studios had established music departments and some of the greatest names in film music

emerged during Hollywood's Golden Age including Alfred Newman, Max Steiner, Dimitri Tiomkin and Bernard Herrmann. Over the decades other creators of screen music offered additional memorable scores and some composers such as Henry Mancini, Randy Newman and John Williams have become household names. The Encyclopedia of Film Composers features entries on more than 250 movie composers from around the world. It not only provides facts about these artists but also explains what makes each composer notable and discusses his or her music in detail. Each entry includes Biographical material, Important dates, Career highlights, Analysis of the composer's musical style, Complete list of movie credits. This book brings recognition to the many men and women who have written music for movies over the past one hundred years. In addition to composers from the United States and Great Britain, artists from dozens of other countries are also represented. A rich resource of movie music history, The Encyclopedia of Film Composers will be of interest to fans of cinema in general as well as those who want to learn more about the many talented individuals who have created memorable scores.

The Science and Art of Saxophone Teaching Ray Smith, 2021-02-24 The Science and Art of Saxophone Teaching will become a standard resource for saxophone teachers the world over. Perhaps no other book has brought so many practical ideas and approaches for the saxophonist and the pedagogue under one cover. This book can be equally valuable for the serious intermediate to advanced saxophone student. The video demonstrations that are paired with the book will be invaluable to all saxophonists.

Musical Childhoods Berenice Nyland, Aleksandra Acker, Jill Ferris, Jan Deans, 2015-02-11 Musical Childhoods is a culmination of more than a decade of research driven by the fact that music has been neglected in early childhood programs in favour of literacy and numeracy. Recent research has identified a connection between academic performance and musical programs and this has given music a renewed status in many schools. This book promotes the idea of children's competence in the use of the language of music and argues that all children have a right to participate in musical discovery and celebrates children's engagement with meaningful and disparate experiences in music. Written by leading practitioners and researchers in the field, this book seeks to reaffirm children's communicative competence when exposed to high quality musical experience, provide new perspectives on children's ability to engage with music in many diverse forms and explore and promote the role of the musician as an artist and teacher. The book is structured into three parts: The theoretical overview, The children, the musicians and the music. The research through the eyes of the protagonist and looking into the future. Early childhood students, researchers and academics with a specific interest in music and musicality will find this an insightful read.
