Turner,1996-09-01 **The Origins Of Neuro Linguistic Programming** John Grinder,2013-05-09 The Origins of NLP brings together the recollections and thoughts of some of the main protagonists from the very early days of NLP In 1971 Richard Bandler and Frank Pucelik were students at Kresge College at the University of California Santa Cruz They had a strong mutual interest in Gestalt Therapy Frank because of his traumatic time in Vietnam and because he had been working with some disaffected and drug addicted kids and Richard because he had been working with Science and Behavior Books on transcribing and editing Fritz Perls seminal work The Gestalt Approach and Eyewitness to Therapy They started a local Gestalt group and ran 2 3 sessions a week collaborating and experimenting with the language of therapy They started achieving some brilliant results but were having problems transferring their skills to others and so Richard invited one of their college professors John Grinder to observe what they were doing in order that he would hopefully be able to deconstruct what they were doing that was so effective John was a professor of Linguistics and was instantly impressed with the work that they were doing He was able to add more structure and in due course the three of them formalised what is now known as the Meta Model NLP or Meta as it was known then was born Creating Sustainable Results with Solution-Focused Applied Psychology Louis Cauffman,2023-04-05 This practical evidence based guide details how professional practitioners and change facilitators can integrate a solution focused approach into their daily work and practice While conventional therapeutic methods centre on the assumption that problems arise due to deficiencies and therefore focus on diagnosis and subsequent treatment the solution focused approach is resource based and operates on the assumption that human beings always have resources at their disposal to move forward Free from the burden of detailed problem analysis the solution focused approach prioritizes clients hope for change in their lives and taps into the opportunities and resources available to bring about such transformation The solution focused practitioner is able to design incisive interventions that are flexible enough to adapt to any situation clients might find themselves in and this book provides a practical formulation that is immediately applicable to all professional fields of applied psychology Creating Sustainable Results with Solution Focused Applied Psychology is important reading for therapists and coaches of all schools of thought as well as anyone who practices as a professional change facilitator including social workers mediators business leaders and educators *Transform Your Life with NLP: Teach Yourself* Paul Jenner,2010-08-27 Transform Your Life with NLP gives you the motivation and the tools you need to change any or every aspect of your life Use the NLP mindset to program your subconscious and you will be able to improve anything from sporting success to work performance You can also use NLP to boost your self esteem and to find resilience at times of stress or pressure You don t need to be an expert or even to have any experience of NLP and a tailored 2 week program at the end of the book will ensure you reach all your goals and help you to set new ones Featuring self assessment exercises write in review areas and other learning materials that really work this book has the power to change
