Regional Governance and Policy-Making in

South America Anne Marie Hoffmann, 2018-10-09 This book analyzes Latin American regional integration with a novel conceptual approach grounded in extensive field research Using the UNASUR Uni n de Naciones Suramericanas as a case study the author investigates the process of policy making in regional public policy fields in South America The project focuses on intergovernmental structures of regional organizations as an institutional framework for a variety of independent processes in regions It also challenges the perspective of democratic states as unitary actors and seeks to analyze the factors which favor or obstruct regional processes in different policy fields This work will appeal to researchers graduate students and anyone interested in Latin American politics and policy making Regional Governance in Post-NAFTA North America

Brian Bow, Greg Anderson, 2014-10-30 Twenty years after NAFTA the consensus seems to be that the regional project in North America is dead The trade agreement was never followed up by new institutions that might cement a more ambitious regional community The Security and Prosperity Partnership SPP launched with some fanfare in 2005 was quietly discontinued in 2009 And new cooperative ventures like the US Canada Beyond the Border talks and the US Mexico Merida Initiative suggest that the three governments have reverted to the familiar pre NAFTA pattern of informal incremental bilateralism One could argue however that NAFTA itself has been buried and yet the region somehow lives on albeit in a form very different from regional integration in other parts of the world A diverse group of contributors from the United States Canada and Mexico with experience in academia government service think tanks and the private sector bring to bear a sophisticated and much needed examination of regional governance in North America its historical origins its connection to the regional distribution of power and the respective governments domestic institutions and the variance of its forms and function across different issue areas The editors begin by surveying the literature on North American regional politics matching up developments there with parallel debates and controversies in the broader literatures on comparative regional integration and international policy coordination more generally Six contributors later explore the mechanisms of policy coordination in specific issue areas each with an emphasis on a particular set of actors and with its own way of characterizing the relevant political and diplomatic dynamics Chapters on the political context for regional policy coordination follow leading to concluding remarks on the future of North America At a time when scholarly interest in North America seems to be waning even while important and interesting political and economic developments are taking place this volume will reinvigorate the study of North America as a region to better understand its past present and future

Regional Competition Peter W.J. Batey, Peter Friedrich, 2013-03-14 Many parts of the world are currently experiencing the outcome of processes of economic integration globalization and transformation Technological advances in telecommunications and in transport facilities have opened up new possibilities for contracts and exchanges among regions External effects among regions have increased in importance As a result competition among regions has intensified Except some pioneering work by regional scientists and scholars of public finance and economics the phenomenon of regional

competition has yet to attract the attention it warrants despite its importance for policy making The present volume is intended to remedy this neglect by providing high level contributions to the three main topics of the book the theory of regional competition methods of analysis of regional competition and policies of regional competition Regional Developmentalism through Law Jonathan Bashi Rudahindwa, 2018-05-20 Offering a study of regionalism in Africa and investigating the ways in which law can be used to address the issues raised by regional processes on the continent this book examines the African Economic Community considering that it has been entrusted to coordinate and to harmonize policies between various Regional Economic Communities RECs across the continent thereby influencing the continent's approach towards regional integration It seeks to identify how law can be used to strengthen the African RECs while ensuring that they achieve their goal of promoting regional development across the continent Drawing upon economic and political theories and using a critical doctrinal analysis of legal texts and norms the book uncovers the legal and economic underpinnings of the model of regional integration followed by the regional schemes operating under the banner of the AEC aiming to contribute to the search for effective methods to ensure the success of these various initiatives Proposing the concept of Regional Developmentalism Through Law as the most suitable conceptual framework to support the effective establishment of an African Economic Community this book will be of interest to researchers academics and policy makers interested in the correlation between law regional integration and development in Africa Self-Determination and Secession in Africa Redie Bereketeab, 2014-08-07 This book provides a unique comparative study of the major secessionist and self determination movements in post colonial Africa examining theory international law charters of the United Nations and the Organisation of African Unity OAU African Union's AU stance on the issue The book explores whether self determination and secessionism lead to peace stability development and democratisation in conflict ridden societies particularly looking at the outcomes in Eritrea and South Sudan The book covers all the major attempts at self determination and secession on the continent extensively analysing the geo political economic security and ideological factors that determine the outcome of the quest for self determination and secession It reveals the lack of inherent clarity in international law social science theories OAU AU Charter UN Charters and international conventions concerning the topic This is a major contribution to the field and highly relevant for researchers and postgraduate students in African Studies Development Studies African Politics and History and Anthropology *The Euro Before the EU?* Altin Ilirjani, 2006 This book argues that a Poisson likelihood regression model is better suited to estimate the impact of common currencies on bilateral trade The author estimates and compares potential effects of euroization on bilateral trade with the Eurozone and national incomes of Albania Serbia and Macedonia using three different gravity estimates **Inequality Beyond Globalization** Christian Suter, 2010 This volume debates the complex nature of the relationships between globalization social and economic transformations and growing inequalities Employing a global world historical and comparative perspective the 16 articles brought together in this volume deal with three central

questions Firstly the question of the spatio temporal evolution and variations of growing inequalities secondly the relative importance of globalization as compared to other factors explaining growing inequalities and thirdly institutional variations of inequality dynamics and globalization impacts Christian Suter is Professor of Economic Sociology at the University of Neuchâtel and President of the World Society Foundation domiciled at the University of Zurich Switzerland **Eurasian**
