## **Regions Institutions And Agrarian Change In European History:**

**Regions, Institutions, and Agrarian Change in European History** Rosemary Lynn Hopcroft, 1999 An institutional approach to agricultural development in Europe leading to the Rise of the West      **The Oxford Handbook of Early Modern European History, 1350-1750** Hamish M. Scott, 2015 This Handbook re examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam      *Farming the North Sea Coast, 900-2000* Piet van Cruyningen, 2025-04 The author opens a powerful dialogue between agricultural history on the one hand and environmental history on the other a brilliant and provocative synthesis of a thousand years of coastal farming Tim Soens University of Antwerp Belgium The fascinating story of how the North Sea coast has been farmed is ever changing Long before the industrial revolution the inhospitable fens and marshes of the low lying coastal wetlands on both sides of the Sea had been transformed into one of the most productive agricultural regions in Europe Agriculture in the coastlands reached its apogee during the eighteenth and nineteenth centuries as is witnessed by the many impressive farm buildings established then However more recently it has become clear that lowland farming and even the physical existence of the lowlands are in jeopardy owing to rising sea levels and problems of drainage This book offers a history of farming and water management on the North Sea coast assessing the forces driving and inhibiting agricultural progress more broadly It examines the ways in which farmers in the past dealt with the two main constraints on their decision making the natural environment and the human environment of institutional rules and customs regulating behaviour It looks in particular at how setbacks were overcome and how farming practices were improved which then raised the money with which to finance the maintenance of dykes canals and sluices      **The Oxford Encyclopedia of Economic History** Joel Mokyr, 2003 What were the economic roots of modern industrialism Were labor unions ever effective in raising workers living standards Did high levels of taxation in the past normally lead to economic decline These and similar questions profoundly inform a wide range of intertwined social issues whose complexity scope and depth become fully evident in the Encyclopedia Due to the interdisciplinary nature

of the field the Encyclopedia is divided not only by chronological and geographic boundaries but also by related subfields such as agricultural history demographic history business history and the histories of technology migration and transportation The articles all written and signed by international contributors include scholars from Europe Latin America Africa and Asia Covering economic history in all areas of the world and segments of economies from prehistoric times to the present The Oxford Encyclopedia of Economic History is the ideal resource for students economists and general readers offering a unique glimpse into this integral part of world history

**Southern Italy in the Late Middle Ages** Eleni Sakellariou, 2011-12-09 This book combines economic history and theory to offer a positive reappraisal of the interaction between demographic forces urbanization commercialisation and the role of the state and their impact on the late medieval economy of the kingdom of Naples

**Remaking Modernity** Julia Adams, Elisabeth S. Clemens, Ann Shola Orloff, 2005-02 A sociology collection reviewing the state of historical study in a wide range of areas while showcasing the use of poststructuralist approaches to studying family gender war protest revolution state making social provisions colonialism trans

*Seventeenth-Century Europe* Thomas Munck, 2017-03-16 This thematically organised text provides a compelling introduction and guide to the key problems and issues of this highly controversial century Offering a genuinely comparative history Thomas Munck adeptly balances Eastern and Southern Europe Scandinavia and the Ottoman Empire against the better known history of France the British Isles and Spain Seventeenth Century Europe gives full prominence to the political context of the period arguing that the Thirty Years War is vital to understanding the social and political developments of the early modern period provides detailed coverage of the debates surrounding the general crisis absolutism and the growth of the state and the implications these had for townspeople the peasantry and the poor examines changes in economic orientation within Europe as well as continuity and change in mental and cultural traditions at different social levels Now fully revised this second edition of a well established and approachable synthesis features important new material on the Ottomans Christian Moslem contacts and on the role of women The text has also been thoroughly updated to take account of recent research This is a fully revised edition of a well established synthesis of the period from the Thirty Years War to the consolidation of absolute monarchy and the landowning society of the ancien régime Thematically organised the book covers all of Europe from Britain and Scandinavia to Spain and Eastern Europe Important new material has been added on the Ottomans on Christian Moslem contacts and on the role of women and the text has been thoroughly updated to take account of recent research

**Homosexuality in Medieval Europe** Tobias Lanslor, Although the church condemned homosexuality in the late Middle Ages they had not been too worried about homosexual behavior and such an attitude also prevailed in the secular world However around the thirteenth century these tolerant attitudes changed dramatically Some historians relate this change to the climate of fear and intolerance that prevailed in the century against minority groups that departed from the norm of the majority This persecution reached its peak in the medieval Inquisition when the Cathars and Waldenses sects

were accused of obscenity sodomy and Satanism In 1307 accusations of sodomy and homosexuality were important during the Knights Templar trial **Life in the Middle Ages** Mikael Eskelner, Martin Bakers, Tobias Lanslor, In the history of Europe the Middle Ages or medieval period lasted from the 5th to the 15th century It began with the fall of the Western Roman Empire and merged into the Renaissance and the Age of Discovery The Middle Ages is the middle period of the three traditional divisions of Western history classical antiquity the medieval period and the modern period In this long period of a thousand years there were all kinds of events and processes that were very different from each other temporally and geographically differentiated responding both to mutual influences with other civilizations and spaces and to internal dynamics Many of them had a great projection towards the future among others those that laid the foundations of the development of the subsequent European expansion and the development of social agents who developed a predominantly rural based society but witnessed the birth of an incipient urban life and a bourgeoisie that will eventually develop capitalism

*Nature's End* S. Sörlin, P. Warde, 2009-07-23 Environmental History as a distinct discipline is now over a generation old with a large and diverse group of practitioners around the globe This book provides a reflection on the achievements diversity and direction of environmental history in its varied national international and continental contexts Growth Recurring Eric Lionel Jones, 2000 An affordable new edition intended for course use Blood in the Fields Matthew Philipp Whelan, 2020-02-14 On March 24 1980 a sniper shot and killed Archbishop Oscar Romero as he celebrated mass Today nearly four decades after his death the world continues to wrestle with the meaning of his witness Blood in the Fields Oscar Romero Catholic Social Teaching and Land Reform treats Romero's role in one of the central conflicts that seized El Salvador during his time as archbishop and that plunged the country into civil war immediately after his death the conflict over the concentration of agricultural land and the exclusion of the majority from access to land to farm Drawing extensively on historical and archival sources Blood in the Fields examines how and why Romero advocated for justice in the distribution of land and the cost he faced in doing so In contrast to his critics who understood Romero's calls for land reform as a communist inspired assault on private property Blood in the Fields shows how Romero relied upon what Catholic Social Teaching calls the common destination of created goods drawing out its implications for what property is and what possessing it entails For Romero the pursuit of land reform became part of a more comprehensive politics of common use prioritizing access of all peoples to God's gift of creation In this way Blood in the Fields reveals how close consideration of this conflict over land opened up into a much more expansive moral and theological landscape in which the struggle for justice in the distribution of land also became a struggle over what it meant to be human to live in society with others and even to be a follower of Christ Understanding this conflict and its theological stakes helps clarify the meaning of Romero's witness and the way God's work to restore creation in Christ is cruciform **Christian History in Rural Germany** David Mayes, 2022-11-14 Surely Christian history in Germany principally followed the outlines of a Catholic and Protestant

narrative right On the contrary for Hesse Hanau and Fulda this dominant framework largely obscures the historical experience of most Christians specifically rural Christians The rural Christian narrative animated for more than a millennium by agricultural and communal forces principally followed an indigenous path characterized by long term surges and setbacks This path eventually bifurcated not in the 1517 1648 period but rather in the wake of the 1648 Peace of Westphalia and it did so not into Catholic and Protestant storylines but rather into those Christian corpora Gemeinden which maintained their local civil sacred unity into the twentieth century and those which lost that unity after succumbing to Westphalia s divisive effects

**Barbed Wire** Reviel Netz,2009-11-10 The history of animals and humans as seen through barbed wire In this original and controversial book historian and philosopher Reviel Netz explores the development of a controlling and pain inducing technology barbed wire Surveying its development from 1874 to 1954 Netz describes its use to control cattle during the colonization of the American West and to control people in Nazi concentration camps and the Russian Gulag Physical control over space was no longer symbolic after 1874 This is a history told from the perspective of its victims With vivid examples of the interconnectedness of humans animals and the environment this dramatic account of barbed wire presents modern history through the lens of motion being prevented Drawing together the history of humans and animals Netz delivers a compelling new perspective on the issues of colonialism capitalism warfare globalization violence and suffering Theoretically sophisticated but written with a broad readership in mind Barbed Wire calls for nothing less than a reconsideration of modernity

Integrity and Agreement Lanse Minkler,2008-07-23 Two impressive features of this book are its clarity of purpose and the breadth of disciplinary resources to which it appeals Geoffrey Brennan Professor of Economics Australian National University Facing massive evidence that people do not act generally as self regarding payoff maximizers economists have become increasingly interested in issues of cooperation altruism identity and morality Lanse Minkler s contribution is particularly important because of his powerful argument that the evidence of cooperation cannot be explained adequately by a more complicated preference function A disposition for honesty is not simply a matter of preference it is an issue of personal integrity identity and commitment This has major implications In particular we have to reconstruct the theory of the firm from first principles No economist committed to the pursuit of truth should ignore this volume Geoffrey Hodgson Research Professor in Business Studies University of Hertfordshire United Kingdom and Editor in Chief of the Journal of Institutional Economics This is an interesting account of the role of integrity preference integrity and commitment integrity on economic behavior While drawing knowledge from traditional subfields of economics it also includes insights gleaned from psychology and philosophy showing their effects in varied areas such as political behavior the employment relation religion and human rights In this exciting volume Lanse Minkler does an excellent job of incorporating various newer concepts of fairness and integrity into economic analysis Ernst Fehr Professor and Head of the Chair of Microeconomics and Experimental Economic Research and Director of the Institute for Empirical Research in Economics University of Zurich

Social scientists who treat humans as rational beings driven exclusively by self interest ignore a key factor shaping human behavior the influence of moral principles Starting with the elementary principle lying is wrong economic theorist Lanse Minkler examines the ways in which a sense of morality guides real life decision making Whether one feels committed to specific or general moral principles Minkler explains integrity demands consistently acting on that commitment Because truthfulness is the most basic moral principle integrity means honesty And honesty extends beyond truth telling It requires good faith when entering an agreement and then standing by one s word From this premise Minkler explores the implications of integrity for contracts between buyers and sellers and understandings between employers and employees He also finds a role for integrity in an individual s religious vows an elected official s accountability to constituents and a community s obligation to human rights Integrity and Agreement reintroduces morality as a factor for economists sociologists psychologists and political scientists to consider in their efforts to comprehend human behavior Lanse Minkler is Associate Professor of Economics at the University of Connecticut

**Growth Triumphant** Richard A. Easterlin, 2009-11-10 Taking a longer view than most literature on economic development Richard A Easterlin stresses the enormous contrast between the collective experience of the last half century in both developed and developing countries and what has gone before An economic historian and demographer the author writes in the tradition of the new economic history drawing on economic theory and quantitative evidence to interpret the historical experience of economic theory and population growth He reaches beyond the usual disciplinary limits to draw as appropriate on sociology political science psychology anthropology and the history of science The book will be of interest not only to social scientists but to all readers concerned with where we have been and where we are going Easterlin is both an economic historian and a demographer and it is the combination of these two disciplines and the fine balance between theory and experience that make this well written refreshingly optimistic book excellent reading Population and Development Review In this masterful synthesis Richard Easterlin draws on the disciplines of economic history demography sociology political science psychology and the history of science to present an integrated explanation of the origins of modern economic growth and of the mortality revolution His book should be easily accessible to non specialists and will give them a sense of why economic history can inform our understanding of the future Dora L Costa Massachusetts Institute of Technology EH Net and H Net Growth Triumphant is simply a fascinating book Easterlin has woven together a history of economic growth economic development human mortality and morbidity the connections each has with the others and the implications of this nexus of forces on the future This book deserves a wide audience Choice In what must surely be the most fair minded well balanced and scrupulously reasoned and researched book on the sensational subjects implied in its title the Industrial Revolution the mortality and fertility revolutions and the prospects for future happiness for the human race Professor Easterlin has set in place the capstone of his research career Journal of Economic History Richard A Easterlin is Professor of Economics University of Southern California

**Capitol Investments** Glenn R.

Parker, 2009-11-10 A sophisticated yet accessible analysis of the acquisition and marketability of political skills The Cult of Statistical Significance Deirdre Nansen McCloskey, Steve Ziliak, 2010-02-11 McCloskey and Ziliak have been pushing this very elementary very correct very important argument through several articles over several years and for reasons I cannot fathom it is still resisted If it takes a book to get it across I hope this book will do it It ought to Thomas Schelling Distinguished University Professor School of Public Policy University of Maryland and 2005 Nobel Prize Laureate in Economics With humor insight piercing logic and a nod to history Ziliak and McCloskey show how economists and other scientists suffer from a mass delusion about statistical analysis The quest for statistical significance that pervades science today is a deeply flawed substitute for thoughtful analysis Yet few participants in the scientific bureaucracy have been willing to admit what Ziliak and McCloskey make clear the emperor has no clothes Kenneth Rothman Professor of Epidemiology Boston University School of Health The Cult of Statistical Significance shows field by field how statistical significance a technique that dominates many sciences has been a huge mistake The authors find that researchers in a broad spectrum of fields from agronomy to zoology employ testing that doesn't test and estimating that doesn't estimate The facts will startle the outside reader how could a group of brilliant scientists wander so far from scientific magnitudes This study will encourage scientists who want to know how to get the statistical sciences back on track and fulfill their quantitative promise The book shows for the first time how wide the disaster is and how bad for science and it traces the problem to its historical sociological and philosophical roots Stephen T Ziliak is the author or editor of many articles and two books He currently lives in Chicago where he is Professor of Economics at Roosevelt University Deirdre N McCloskey Distinguished Professor of Economics History English and Communication at the University of Illinois at Chicago is the author of twenty books and three hundred scholarly articles She has held Guggenheim and National Humanities Fellowships She is best known for *How to Be Human Though an Economist* University of Michigan Press 2000 and her most recent book *The Bourgeois Virtues Ethics for an Age of Commerce* 2006 **Increasing Returns and Path Dependence in the Economy** W. Brian Arthur, 1994-10-26 DIVPioneering work on an important new approach to economics div *Markets and Cultural Voices* Tyler Cowen, 2009-11-10 This intriguing work explores the world of three amateur artists A native tradition all of their painting is done in Mexico yet the finished product is sold almost exclusively to wealthy American art buyers Cowen examines this cultural interaction between Mexico and the United States to see how globalization shapes the lives and the work of the artists and their families The story of these three artists reveals that this exchange simultaneously creates economic opportunities for the artists but has detrimental effects on the village A view of the daily village life of three artists connected to the larger art world this book should be of particular interest to those in the fields of cultural economics Latino studies economic anthropology and globalization
