**Governing Urban Regions Through Collaboration** Joël

Thibert, 2016-04-22 With the demise of the Old Regionalist project of achieving good regional governance through amalgamation voluntary collaboration has become the modus operandi of a large number of North American metropolitan regions. Although many researchers have become interested in regional collaboration and its determinants few have specifically studied its outcomes. This book contributes to filling this gap by critically re-evaluating the fundamental premise of the New Regionalism which is that regional problems can be solved without regional higher government. In particular this research asks to what extent does regional collaboration have a significant independent influence on the determinants of regional resilience. Using a comparative Canada U.S. mixed method approach with detailed case studies of the San Francisco Bay Area, the Greater Montreal and trans-national Niagara Buffalo regions, the book examines the direct and indirect impacts of inter-local collaboration on policy and policy outcomes at the regional and State/Provincial levels. The book research concentrates on the effects of bottom-up state mandated and functional collaboration and the moderating role of regional awareness, higher governmental initiative and civic capital on three outcomes: environmental preservation, socio-economic integration and economic competitiveness. In short, the book seeks to highlight those conditions that favor collaboration and might help avoid the collaborative trap of collaboration for its own sake. More specifically, this research concentrates on the effect of bottom-up state mandated and functional collaboration, the moderating role of regional awareness, governmental initiative and civic capital on environmental preservation, socio-economic integration and economic competitiveness. In short, the book seeks to understand whether and how urban regional collaboration contributes to regional resilience. **The**

**Futures of the City Region** Michael Neuman, Angela Hull, 2013-09-13 Does the city region constitute a new departure in urbanisation? If so, what are the key elements of that departure? The realities of the urban in the 21st century are increasingly complex and polychromatic. The rise of global networks enabled by supranational administrations, both governmental and corporate, strongly influences and structures the management of urban life. How we conceive the city region has intellectual and practical consequences. First in helping us grasp rapidly changing realities and second in facilitating the flow of resources, ideas and learning to enhance the quality of life of citizens. Two themes interweave through this collection within this broad palette. First are the socio-spatial constructs and their relationship to the empirical evidence of change in the physical and functional aspects of urban form. Second is what they mean for the spatial scales of governance. This latter theme explores territorially based understandings of intervention and the changing set of political concerns in selected case studies. In efforts to address these issues and improve upon knowledge, this collection brings together international scholars building new data-driven cross-disciplinary theories to create new images of the city region that may prove to supplement if not supplant old ones. The book illustrates the dialectical interplay of theory and fact, time and space and spatial and

institutional which expands on our intellectual grasp of the theoretical debates on city regions through practical knowing citing examples from Europe the United States Australasia and beyond This book was originally published as a Special Issue of Regional Studies      *Cities, State and Globalisation* Tassilo Herrschel, 2014-01-03 This book investigates the ways in which city regions view themselves as single entities how they are governed what is meant by governance why the question of city regional governance matters and the extent to which the balance between internal and external factors is important for finding governance solutions Examples from North America and Europe are compared and contrasted to gain a better understanding of what matters on the ground to people and policy makers when seeking answers to the challenges of a globalised rapidly changing world In order to analyse the conditions involved in making local decisions the author looks at the impact of established policy making practices socio economic patterns among the population existing views of the local and the regional and their respective roles among the electorate and policy makers and the scope for building city regional governance under given statutory and fiscal provisions The complex interaction of these factors is shown to produce place specific forms and modi operandi for governing city regions as local regional constructs This book will be of interest to urban and regional policy makers and scholars working in the fields of economic geography and political geography      **Planning World Cities** Peter Newman, Andy Thornley, 2011-06-21 This major comparative text on urban planning and the global and regional context in which it takes place examines what have been traditionally regarded as world cities New York London Tokyo and also a range of other important cities in America Europe and Asia The authors show the role planning has played in the way cities have responded to the forces of globalization and argue for the importance of diverse rather than one size fits all planning practices This fully revised second edition systematically brings the debates on the impact of globalization right up to date and provides integrated coverage of the latest planning theory and practice It also contains extended analysis of the implications of the rapid growth of Chinese cities such as Shanghai Hong Kong and Beijing New material is included on the impact of globalization on poorer mega cities like Mumbai and Johannesburg      **Place Matters** Peter Dreier, John H. Mollenkopf, Todd Swanstrom, 2004 Analyzes the problematic trends facing America's cities and older suburbs and challenges us to put America's urban crisis back on the national agenda      **Regional Equity** Victor Rubin, 2017-10-02 Regional equity as a field of scholarship as an arena of policy change and as a social movement has grown diversified and matured in important ways over the past decade The fruits of that growth and development can be seen in recent federal and state policies in the practices of many regional planning organizations and in the agendas and approaches of countless community based organizations and issue advocacy groups As the field has expanded a growing number of researchers have been tracking these phenomena explaining how and why concepts of metropolitan development are being reframed documenting the efforts to shape policies and diversify leadership assessing where and how equity and social justice concerns have been brought into regional planning for transportation land use housing public finances environmental quality
