Regulating Regional Power Systems Clinton J. Andrews, 1995-01-24 Synthesizes the best current thinking on the problem of electricity regulation Regulating Regional Power Systems Clinton J. Andrews, 1995-01-01 *Designing Competitive Electricity Markets* Hung-po Chao, Hillard G. Huntington, 2013-12-01 The authors are prominent economists operation researchers and engineers who have been instrumental in the development of the conceptual framework for electric power restructuring both in the United States and in other countries Rather than espousing a particular market design for the industry s future each author focuses on an important issue or set of issues and tries to frame the questions for designing electricity markets using an international perspective The book focuses on the economic and technical questions important in understanding the industry s long term development rather than providing immediate answers for the current political debates on industry competition Regulation of the Power Sector Ignacio J. Pérez-Arriaga, 2014-02-26 Regulation of the Power Sector is a unified consistent and comprehensive treatment of the theories and practicalities of regulation in modern power supply systems The need for generation to occur at the time of use occasioned by the impracticality of large scale electricity storage coupled with constant and often unpredictable changes in demand make electricity supply systems large dynamic and complex and their regulation a daunting task Arranged in four parts this book addresses both traditional regulatory frameworks and also liberalized and re regulated environments First an introduction gives a full characterization of power supply including engineering economic and regulatory viewpoints The second part presents the fundamentals of regulation and the third looks at the regulation of particular components of the power sector in detail Advanced topics and subjects still open or subject to dispute form the content of Part IV In a sector where regulatory design is the key driver of both the industry efficiency and the returns on investment Regulation of the Power Sector is directed at regulators policy decision makers business managers and researchers It is a pragmatic text well tested by the authors quarter century of experience of power systems from around the world Power system professionals and students at all levels will derive much benefit from the authors wealth of blended theory and real world derived know how **Energy Regulation in Africa** Ishmael Ackah, Charly Gatete, 2024-03-19 This book analyzes the political economy governing energy regulation across the African continent Presenting case studies that span diverse energy sectors and countries it provides an overview of their complex political and regulatory frameworks The book explores emerging technologies and energy markets highlighting Africa s preparedness for the energy transition and sheds light on the pivotal role of cross border energy trade with regard to energy access Further it examines regulators influence within regional power pools as well as their contribution to gender mainstreaming in the energy sector addressing vital social issues This book is divided into five parts the first of which focuses on the political economy of energy regulation The second part discusses emerging technologies and climate change issues while the third examines regional energy markets and regional institutional collaboration The fourth part features

contributions on gender mainstreaming while part five rounds up the coverage The book will be of interest to policymakers and investors in Africa as well as scholars interested in energy regulation and economics Inside a Public Policy Black Box Michael J. DeLor, 2019-11-14 Michael J DeLor focuses on how the operation and regulation of private electric utilities has become complicated and contentious in the United States in part because of environmental impact As a consequence Congress rarely passes substantive economic based legislation dealing with the topic and the Federal Energy Regulatory Commission FERC as the primary federal economic regulator of private electric utilities must often act without clear legislative guidance **Understanding Electric Utilities and De-Regulation** H. Lee Willis, Lorrin Philipson, 2018-10-03 Power interruptions of the scale of the North American Blackout of 2003 are rare but they still loom as a possibility Will the aging infrastructure fail because deregulated monopolies have no financial incentives to upgrade Is centralized planning becoming subordinate to market forces Understanding Electric Utilities and De Regulation Second Edition provides an updated non technical description that sheds light on the nature of the industry and the issues involved in its transition away from a regulated environment The book begins by broadly surveying the industry from a regulated utility structure to the major concepts of de regulation to the history of electricity the technical aspects and the business of power Then the authors delve into the technologies and functions on which the industry operates the many ways that power is used and the various means of power generation including central generating stations renewable energy and single household size generators The authors then devote considerable attention to the details of regulation and de regulation To conclude one new chapter examines aging infrastructures and reliability of service while another explores the causes of blackouts and how they can be prevented Based on the authors extensive experience Understanding Electric Utilities and De Regulation Second Edition offers an up to date perspective on the major issues impacting the daily operations as well as the long term future of the electric utilities industry *Flexibility analysis and regulation technology of clean energy system* Nantian Huang, Yingjun Wu, Dazhi Yang, Zhaoyu Wang, 2023-06-02 *FERC.*, 1981 **The Proceedings of the 11th Frontier Academic Forum of Electrical Engineering (FAFEE2024)** Qingxin Yang, Jian Li, 2024-12-04 This book contains the original and refereed research papers presented at the 11th Frontier Academic Forum of Electrical Engineering FAFEE 2024 held in Chongqing China Topics covered include Power System and New Energy Motors and Systems Power Electronics and Electrical Drives High Voltage and Discharge Electrical Energy Storage and Application New Electrical Materials Advanced Electromagnetic Technology The papers share the latest findings in the field of electrical engineering making the book a valuable asset for researchers engineers and university students etc *Federal Energy Regulatory Commission Statutes & Regulations* United States.
