Reinventing Africa:

Re-Inventing Africa Ifi Amadiume,1997-12 This book reveals how conventional anthropology has consistently imposed European ideas of the natural nuclear family women as passive object and class differences on a continent with a long history of women with power doing things differently Amadiume argues for an end to anthropology and calls instead for a social history of Africa by Africans

Reinventing Africa Annie E. Coombes,1994-01-01 Between 1890 and 1918 British colonial expansion in Africa led to the removal of many valuable African artifacts that were subsequently brought to Britain and displayed This fascinating book analyses the ways in which African peoples and their material culture were represented in Britain at this time the justifications for imperial expansion implicit in the displays and the effects that this had on racial stereotyping and prejudice Annie Coombes argues that this activity had profound repercussions for the construction of a national identity within Britain itself the effects of which are still with us today

What Is Ailing Africa? — Practical Philosophy in Reinventing Africa Stephen Onyango Ouma,2024-06-11 Not only does this book detail the colonial

experiences in Africa through what the author refers to as a social construct it also vehemently criticises modern African governments for their current corruption and maintenance of the continent s situation This book presents a two pronged analysis of Africa s predicament by looking at the duality of ethics and identity It tries to trace the problematic aspects of westernization and modernization within the contexts of neo colonialism and continued exploitation of Africa by external forces as well as the complicity of Africans themselves

Re-Inventing Africa's Development Jong-Dae Park,2018-12-31 This open access book analyses the development problems of sub Sahara Africa SSA from the eyes of a Korean diplomat with knowledge of the economic growth Korea has experienced in recent decades The author argues that Africa s development challenges are not due to a lack of resources but a lack of management presenting an alternative to the traditional view that Africa s problems are caused by a lack of leadership In exploring an approach based on mind set and nation building rather than unity which tends to promote individual or party interests rather than the broader country or national interests the author suggests new solutions for SSA s economic growth inspired by Korea s successful economic growth model much of which is focused on industrialisation This book will be of interest to researchers policymakers NGOs and governmental bodies in economics development and politics studying Africa s economic development and Korea s economic growth model

Africa's Buildings Itohan I. Osayimwese,2025-09-23 A groundbreaking history of Africa s looted architectural heritage and a bold proposal for the repatriation of the continent s stolen cultural artifacts Between the nineteenth century and today colonial officials collectors and anthropologists dismembered African buildings and dispersed their parts to museums in Europe and the United States Most of these artifacts were cataloged as ornamental art objects which erased their intended functions and the removal of these objects often had catastrophic consequences for the original structures Africa s Buildings traces the history of the collection and distribution of African architectural fragments documenting the brutality of the

colonial regimes that looted Africa's buildings and addressing the ethical questions surrounding the display of these objects. Itohan Osayimwese ranges across the whole of Africa from Egypt in the north to Zimbabwe in the south and spanning the western, central and eastern regions of the continent. She describes how collectors employed violent means to remove elements such as columns and door panels from buildings and how these methods differentiated architectural collecting from conventional collecting. She shows how Western collectors mischaracterized building components as ornament, erasing their architectural character and concealing the evidence of their theft. Osayimwese discusses how the very act of displacing building parts like floor tiles and woven screen walls has resulted in a loss of knowledge about their original function and argues that because of these removals, scholars have yet to fully grasp the variety and character of African architecture. Richly illustrated, *Africa's Buildings* uncovers the vast scale of cultural displacement perpetrated by the West and proposes a new role for museums in this history, one in which they champion the repatriation of Africa's architectural heritage and restitution for African communities.

Inventing Africa Robin Derricourt, 2011-03-04 *Inventing Africa* is a critical account of narratives which have selectively interpreted and misinterpreted the continent's deep past. Writers have created alluring images of lost cities, vast prehistoric migrations and golden ages of past civilisations. Debates continue on the African origins of humankind, the contributions of ancient Egypt to the world and Africa's importance to global history. Images of Africa simplifying a complex and diverse continent have existed from ancient Mediterranean worlds, slave trading nations and colonial powers to today's political elites, ecotourists and aid givers. Robin Derricourt draws on his background as publisher and practitioner in archaeology and history to explore the limits and the dangers of simplifications, arguing as with Said's concept of Orientalism that ambitious ideas can delude or oppress as well as inform. *Defending Africa* against some of the grand narratives that have been imposed upon its peoples, *Inventing Africa* will spark new debates in the history of Africa and of archaeology.

Perspectives on Africa Roy Richard Grinker, Stephen C. Lubkemann, Christopher B. Steiner, 2010-05-17 The second edition of *Perspectives on Africa: A Reader in Culture History and Representation* is both an introduction to the cultures of Africa and a history of the interpretations of those cultures. Key essays explore the major issues and debates through a combination of classic articles and the newest research in the field. Explores the dynamic processes by and through which scholars have described and understood African history and culture. Includes selections from anthropologists, historians, philosophers and critics who collectively reveal the interpenetration of ideas and concepts within and across disciplines, regions and historical periods. Offers a combined focus on ethnography and theory, giving students the means to link theory with data and perspective with practice. Newly revised and updated edition of this popular text with 14 brand new chapters and two new sections: Conflict and Violent Transformations and Development, Governance and Globalization.
