Reinventing Community Stories From The Neighborhoods Of Cohousing:

Reinventing Community David Wann, 2010 Human beings are not meant to live alone or in isolated nuclear family arrangements. We do best in community. But in a few short generations we've lost many of the social skills necessary for successful community living. The folks in *Reinventing Community* are the vanguard for the future; they're learning today what it takes to go beyond the solitary and alienated survival tactics of modern urban life to the full flowering of the human spirit of tomorrow. Eric Utne, founder of *Utne* magazine and editor of *Cosmo Doogood's Urban Almanac*. Cohousing began in Scandinavia in the 1960s as a response to a feeling of isolation within typical suburban communities where you don't know your neighbor nor can you rely on their assistance, not even for a cup of sugar. Cohousing spread to the United States in the 1980s and there are now several hundred such communities throughout the country in more than thirty states. *Reinventing Community* is the first cohousing anthology that tells real world stories from the perspectives of the unique people who live in these communities, whether they be in urban, suburban, or rural settings. Unlike the few how-to guides in the marketplace today, this book details the lives of these close-knit groups of caring and active neighbors who enjoy their own privacy yet also share a wonderful sense of camaraderie and connection. Exploring everything from planning a cohousing community to moving in, to the joys and challenges of daily life, *Reinventing Community* shares with its readers a sense of what it takes to build a true community in our often detached and disengaged modern world.

Finding Community Diana Leafe Christian, 2007-05-01 Finding community is as critical as obtaining food and shelter, since the need to belong is what makes us human. The isolation and loneliness of modern life have led many people to search for deeper connection, which has resulted in a renewed interest in intentional communities. These intentional communities or ecovillages are an appealing choice for like-minded people who seek to create a family-oriented and ecologically sustainable lifestyle, a lifestyle they are unlikely to find anywhere else. However, the notion of an intentional community can still be a tremendous leap for some, deterred perhaps by a misguided vision of eking out a hardscrabble existence with little reward. In fact, successful ecovillages thrive because of the combined skills and resources of their members. *Finding Community* presents a thorough overview of ecovillages and intentional communities and offers solid advice on how to research, thoroughly visit, thoughtfully evaluate, intelligently and join gracefully. Useful considerations include: Important questions to ask of members and of yourself; Signs of a healthy and not so healthy community; Cost of joining and staying; Common blunders to avoid. *Finding Community* provides intriguing possibilities to readers who are seeking a more cooperative, sustainable, and meaningful life. Diana Leafe Christian is the author of *Creating a Life Together* and editor of *Communities* magazine. She lives at Earthhaven Ecovillage in North Carolina.

Communes in America, 1975-2000 Timothy Miller, 2019-03-26 *Communes in America 1975-2000* is the final volume in Miller's trilogy on the history of American intentional communities. Providing a comprehensive survey of communities during the last quarter of the twentieth century, Miller offers a detailed study of their character, scope, and

evolution Between 1975 and 2000 the American communal experience evolved dramatically in response to social and environmental challenges that confronted American society as a whole Long accepted social norms and institutions family religion medicine and politics were questioned as the divorce rate increased interest in spiritual teachings from Asia grew and alternative medicine gained ground Cohousing flourished as a response to an increasing sense of alienation and a need to balance community and private lives At the same time Americans became increasingly concerned with environmental protection and preservation of our limited resources In the face of these social changes communal living flourished as people sought out communities of like minded individuals to pursue a higher purpose Organized topically each chapter in the volume provides basic information about various types of communities and detailed examples of each type from ecovillages and radical Christian communities to pagan communes and cohousing experiments Miller also takes a step back to look at the prevalence of communal living in American life over the twentieth century Based on exhaustive research Miller s final volume provides an indispensable survey and guide to understanding utopianism s enduring presence in American culture

Place Timothy Beatley, Kristy Manning, 2013-04-22 Current patterns of land use and development are at once socially economically and environmentally destructive Sprawling low density development literally devours natural landscapes while breeding a pervasive sense of social isolation and exacerbating a vast array of economic problems As more and more counties begin to look more and more the same hope for a different future may seem to be fading But alternatives do exist The Ecology of Place Timothy Beatley and Kristy Manning describe a world in which land is consumed sparingly cities and towns are vibrant and green local economies thrive and citizens work together to create places of eduring value They present a holistic and compelling approach to repairing and enhancing communities introducing a vision of sustainable places that extends beyond traditional architecture and urban design to consider not just the physical layout of a development but the broad set of ways in which communities are organized and operate Chapters examine the history and context of current land use problems along with the concept of sustainable places the ecology of place and ecological policies and actions local and regional economic development links between land use and community planning and civic involvement specific recommendations to help move toward sustainability The authors address a variety of policy and development issues that affect a community from its economic base to its transit options to the ways in which its streets and public spaces are managed and examine the wide range of programs policies and creative ideas that can be used to turn the vision of sustainable places into reality The Ecology of Place is a timely resource for planners economic development specialists students and citizen activists working toward establishing healthier and more sustainable patterns of growth and development Designing Families John Scanzoni, 2000 Designing Families is a thought provoking examination of the
