Treating Cancer with Herbs Michael Tierra, 2003 Cancer is the scourge of our age More than any other disease cancer has captured our fears and projected despair throughout society Our bodies have become the experimental real life testing grounds for countless chemical toxins pollutants refined foods and stresses These toxins are clearly exerting their effect in the rise of numerous forms of cancer striking every part of our bodies The medical profession is attempting to attack these cancers with every available form of chemical radiation and invasive surgery While modern medicine has long recognized the healing potential of herbs some of the most commonly used cancer medicines were originally developed from herbs we have been indoctrinated to believe that surgery radiation and chemical therapies are the only successful procedures even though they tend to fail much of the time and may actually destroy the quality of life to such a degree that many believe the cure is worse than the disease There is another approach to the treatment of cancer Finding cancer s root causes and applying a holistic understanding of lifestyle diet stress reduction and appropriate nutritional and herbal support can strengthen the body and its immune system restore the spirit and balance the psyche of the cancer patient With this integrative approach a healthy mental and emotional balance joins a healthy approach to life to truly treat cancer Not every cancer patient is cured but every patient is brought to a state of understanding which in many cases leads to what appear to be miraculous remissions In other cases it allows the individual to experience a quality of life and passing uncommon in our society the ability to face life and death with dignity and a sense of completion Book jacket

Entheogens and the Development of Culture John A. Rush, 2013-07-30 *Entheogens and the Development of Culture* makes the radical proposition that mind altering substances have played a major part not only in cultural development but also in human brain development Researchers suggest that we have purposely enhanced receptor sites in the brain especially those for dopamine and serotonin through the use of plants and fungi over a long period of time The trade off for lowered functioning and potential drug abuse has been more creative thinking or a leap in consciousness Experiments in entheogen use led to the development of primitive medicine in which certain mind altering plants and fungi were imbibed to still fatigue pain or depression while others were taken to promote hunger and libido Our ancestors selected for our neural hardware and our propensity for seeking altered forms of consciousness as a survival strategy may be intimately bound to our decision making processes going back to the dawn of time Fourteen essays by a wide range of contributors including founding president of the American Anthropological Association s Anthropology of Religion section Michael Winkelman PhD Carl A P Ruck PhD Boston University professor of classics and an authority on the ecstatic rituals of the god Dionysus and world

renowned botanist Dr Gaston Guzman member of the Colombian National Academy of Sciences and expert on hallucinogenic mushrooms demonstrate that altering consciousness continues to be an important part of human experience today
