

DEVELOPING ASSESSMENT RELIABILITY AND VALIDITY: ITEM ANALYSIS

Readily available analysis techniques allow us to obtain sophisticated item analysis data for music items

Item Response Theory models should become the standard analysis approach

3 parameter models for dichotomous items which measure difficulty and discrimination while controlling for guessing

Polytomous generalized rating scale models extend IRT theory to the analysis of rubric-based assessments (i.e. Samejima's graded response model)

Easy software programs such as XCalibre4™ make these complex calculations accessible

S. Department of Health and Human Services, Agency for Healthcare Research and Quality, 2013-04-09

The internal validity of a study reflects the extent to which the design and conduct of the study have prevented biases. One of the key steps in a systematic review is assessment of a study's internal validity or potential for bias. This assessment serves to:

- 1 identify the strengths and limitations of the included studies
- 2 investigate and potentially explain heterogeneity in findings across different studies included in a systematic review
- 3 grade the strength of evidence for a given question

The risk of bias assessment directly informs one of four key domains considered when assessing the strength of evidence. With the increase in the number of published systematic reviews and development of systematic review methodology over the past 15 years, close attention has been paid to the methods for assessing internal validity. Until recently, this has been referred to as quality assessment or assessment of methodological quality. In this context, quality refers to the confidence that the trial design, conduct, and analysis has minimized or avoided biases in its treatment comparisons. To facilitate the assessment of methodological quality, a plethora of tools has emerged. Some of these tools were developed for specific study designs (e.g., randomized controlled trials, RCTs, cohort studies, case control studies), while others were intended to be applied to a range of designs. The tools often incorporate characteristics that may be associated with bias; however, many tools also contain elements related to reporting (e.g., was the study population described and design (e.g., was a sample size calculation performed) that are not related to bias. The Cochrane Collaboration recently developed a tool to assess the potential risk of bias in RCTs. The Risk of Bias (ROB) tool was developed to address some of the shortcomings of existing quality assessment instruments, including over-reliance on reporting rather than methods. Several systematic reviews have catalogued and critiqued the numerous tools available to assess methodological quality or risk of bias of primary studies. In summary, few existing tools have undergone extensive inter-rater reliability or validity testing. Moreover, the focus of much of the tool development or testing that has been done has been on criterion or face validity. Therefore, it is unknown whether or to what extent the summary assessments based on these tools differentiate between studies with biased and unbiased results (i.e., studies that may over or underestimate treatment effects). There is a clear need for inter-rater reliability testing of different tools in order to enhance consistency in their application and interpretation across different systematic reviews. Further validity testing is essential to ensure that the tools being used can

identify studies with biased results Finally there is a need to determine inter rater reliability and validity in order to support the uptake and use of individual tools that are recommended by the systematic review community and specifically the ROB tool within the Evidence based Practice Center EPC Program In this project we focused on two tools that are commonly used in systematic reviews The Cochrane ROB tool was designed for RCTs and is the instrument recommended by The Cochrane Collaboration for use in systematic reviews of RCTs The Newcastle Ottawa Scale is commonly used for nonrandomized studies specifically cohort and case control studies

The What, Why and How of Assessment Simon Child,Paul Ellis,2021-07-21 How do teachers develop their understanding of the foundation principles of assessment stay up to date with the latest classroom approaches and have the confidence to evaluate and question the effectiveness of new methods This professional resource for teachers supports them to understand the what why and how of assessment It provides key knowledge on the types and purposes of assessment and explores key themes such as validity reliability and fairness It explores assessment in practice offering practical support for busy teachers and takes an in depth look at how qualifications are designed and developed and how examinations are marked graded and regulated

Clinical Assessment and Intervention for Autism Spectrum Disorders Johnny L. Matson,2011-09-02 Autism spectrum disorder has received increasing research in recent years with more information on assessment and treatment than can be readily assimilated from primary literature by clinicians Clinical Assessment and Intervention for Autism Spectrum Disorders summarizes evidence based assessments and intervention for Autism across the life span providing clinicians with a practical overview of how best to assess and treat this disorder The book begins with a discussion of what warrants a determination of being evidence based and a description of the disorder from a life span perspective The book also provides a chapter on differential diagnosis of autism relative to other disorders What follows are separate sections on assessment and intervention These chapters discuss first how to assess and then separately how to treat behavioral problems communication and social skills issues academic and vocational skills and the use of pharmacology and an assessment of possible pharmacological effects Intended for practitioners assessing and treating children with developmental delays the book provides clinicians with best practices for assessing and treating delays associated with autism Covers the full range of Autism Spectrum Disorders Covers the lifespan Focuses on evidence based assessment and treatment

The First 1000 Days in the Nordic Countries: Psychosocial Interventions and Psychological Tests: A Review of the Evidence Breivik, Kyrre,Eng, Helene,Kaiser, Sabine,Karjalainen, Piia,Kurki, Marjo,Kyrrestad, Henriette,Laaajasalo, Taina,Martinussen, Monica,Merikukka, Marko,Peltonen, Kirsi,Pettersen, Susann Dahl,Rasmussen, Lene-Mari P.,Reedtz, Charlotte,Rye, Marte,2021-06-22 Available online <https://pub.norden.org/nord2021/037> The report provides an overview and short systematic review of the psychosocial interventions and psychological tests used in the Nordic countries during the first

1000 days of a child's life i.e. from the prenatal period until two years of age. A total of 63 interventions and 33 tests were reviewed. Findings reveal that although a large number of interventions and tests are available for the target groups in the Nordic countries, evidence regarding their effectiveness or psychometric properties is often lacking or insufficient. Thus, it is important that research efforts be enhanced in the Nordic region to strengthen the evidence base of the interventions and instruments that practitioners rely upon in order to assess and support mental wellbeing for Nordic children and families during this critical period in their lives.

Language and Pedagogy: Understanding and Implementation Pasquale De Marco, 2025-03-17

Language and Pedagogy: Understanding and Implementation is a comprehensive and engaging exploration of the world of language teaching and learning, guiding readers through the intricacies of language acquisition and the diverse approaches and methods that shape effective language instruction. Delving into the very nature of language, this book unravels the complexities of its structure, properties, and universal features. It traces the remarkable journey of language acquisition from a child's first babbles to the fluency of a seasoned polyglot and examines the diverse theories that attempt to explain this fascinating process. With a focus on practical applications, the book surveys the wide array of approaches and methods used in language teaching, from traditional methods like the Grammar Translation Method to innovative approaches like Task-Based Language Teaching. It explores the strengths, weaknesses, and underlying principles of each methodology, providing readers with a comprehensive understanding of the field. The book also examines the role of technology in language teaching, highlighting its potential to enhance engagement, foster collaboration, and personalize the learning experience. Assessment, an integral component of language teaching, is given due attention. The book explores the purposes, types, and methods of assessment, as well as the challenges of assessing language proficiency and the importance of validity and reliability in language testing. The role of the language teacher, a pivotal figure in the learning process, is also brought into focus. The book examines the qualities that make an effective language teacher, the diverse roles and responsibilities they fulfill, and the importance of teacher training and development. Recognizing the central role of the learner in the language learning journey, the book dedicates a chapter to exploring the characteristics of successful language learners, the strategies and techniques they employ, and the impact of motivation and autonomy on their progress. It also delves into the language learning environment, both physical and psychological, examining the factors that can facilitate or hinder language acquisition. Finally, the book looks to the future of language teaching, examining emerging trends and innovations that are shaping the field. It investigates the impact of globalization on language teaching, the rise of online language learning, and the potential of artificial intelligence to revolutionize language instruction. The book concludes with a vision for the future of language teaching, one that embraces innovation, diversity, and the transformative power of language to connect people across cultures and borders.
