Religion And Globalization:

Religion and Globalization Peter Beyer, 1994-03-31 In his exploration of the interaction between religion and worldwide social and cultural change the author examines the major theories of global change and discusses the ways in which such change impinges on contemporary religious practice meaning and influence Beyer explores some of the key issues in understanding the shape of religion today including religion as culture and as social system pure and applied religion privatized and publicly influential religion and liberal versus conservative religions He goes on to apply these issues to five contemporary illustrative cases the American Christian Right Liberation Theology movements in Latin America the Islamic Revolution in Iran Zionists in Israel and religious Religion, Globalization, and Culture Peter Beyer, Lori G.

Beaman, 2007-10-30 This volume brings together over 25 articles by many of the most important authors who have worked on issues directly related to the theme of religion and globalization An additional emphasis on culture flags the inclusion of the relation of religion to its wider social context and also permits questioning the boundaries of religion so as to avoid a strong bias in favour of the analysis of institutionalized religion The key emphasis of the book however is the focus specifically on religion a topic that is still largely ignored in the burgeoning literature on globalization The articles are divided into five subthemes theoretical issues historical approaches to religion and globalization forms and boundaries of religion key issues such as ecology and gender and regional perspectives Contributors Afe Adogame Elisabeth Arweck Lori Beaman Peter Beyer John Boli Gary Bouma Dave Brewington George Van Campbell Jos Casanova Paul Freston Nobutaka Inoue Laurel Kearns Otto Maduro Vasilios Makrides Meredith McGuire Vincenzo Pace Rubina Ramji James T Richardson Ole Riis Roland Robertson Marie Andr e Roy Shandip Saha John H Simpson James V Spickard William Stahl George Thomas Bryan Turner Margit Warburg and Michael Wilkinson *Religion and Globalization* John L. Esposito, Darrell J. Fasching, Todd Vernon Lewis, 2008

A unique and in depth introduction to religion in the modern world Religion and Globalization includes coverage of Christianity Judaism Islam Hinduism Buddhism East Asian religions and new religious movements It addresses such questions as How do these various religions change as they are brought into contact with each other by the forces of globalization and How are ancient traditions modified to accommodate the realities of the 21st century Focusing on the diverse ways that humans have been religious in the past and are religious today the book examines the changes that began with the Scientific Revolution and how those changes have shaped these religions as they are practiced today Ideal for courses on religion and globalization or religion and politics Religion and Globalization includes sixteen custom maps key terms at the end of each chapter a glossary and timelines of important events each religious tradition **New Religions and Globalization** Armin Geertz, Margit Warburg, 2008-08-01 Globalization is a predominant theme in contemporary educational and political circles Research on globalization has become a political priority because the world has become a single place as Roland Robertson formulated it where events in any particular part of the world can and often do have

political economical and military consequences for the rest of the world Discourse on globalization however has generally ignored the cultural consequences Recent waves of violence that seem to be religiously fueled if not motivated among immigrants and refugees in Europe and their home regions in the Middle East have demonstrated that we can only ignore culture values and religion at our own peril Globalization and new religions is the theme of this book It is argued here that studying new religions in a globalization perspective offers theoretical and methodological advantages both for the general study of religion and the general study of globalization Religions are often cosmopolitan and universal in their overall message yet they may at the same time be utterly immersed in local interactions This is often clearly expressed among minority religions The contrast of the local and the global is accentuated by globalization and in particular many new religions have followed suit This book draws together a selection of top quality papers given at a conference held in Aarhus in 2002 under the auspices of the Research Network on New Religions RENNEN The papers which have been edited and updated represent the work of leading scholars in the history of religions sociology of religion psychology of religion and other disciplines They address questions that are vital for everyone in the modern world whether approached as a reflection of world economy and power dynamics new possibilities of communication and cultural exchange in the light of mass media and technology increased cultural plurality in the wake of migration or as a combination of any of these globalization challenges the academic study of religion to renewed theoretical and methodological reflection Religion and Globalization Véronique Altglas,2010 Because space and identities are reformulated by religions as they break through geographic and cultural boundaries religion is now widely recognized as e the great globalizer e tm In particular as they become transnational religions adapt to new social contexts and interact with other cultures transforming themselves and their cultural environment Furthermore religions and their adherents are extremely responsive to globalization whether they perceive it as threatening their particular identity or as an opportunity to provide a universal message to the world and become a e global religion e tm This new four volume collection from Routledge brings together all the key texts on globalization and religion in one easy to use e mini library e tm Each of the volumes articulates theoretical and empirical perspectives while theories attempt to grasp the nature of the relations between globalization and religion a diversity of case studies shed light on the importance of religion in the making of contemporary global situations The first volume brings together the best scholarship on religion and space in its global context Volume II entitled Westernization of Religion and its Counter Trends looks at the debates surrounding the westernization of religion including the transnational diffusion and local expressions of Christianity and counter trends to the westernization of religion Volume III features articles concerning the theories and case studies on the religious responses to globalization The final volume looks at the new challenges epistemological and transnational faced by religion and politics in their global context Flourishing Miroslav Volf,Tony Blair,2016-01-12 More than almost anything else globalization and the great world religions are shaping our lives affecting everything from the public policies of political

leaders and the economic decisions of industry bosses and employees to university curricula all the way to the inner longings of our hearts Integral to both globalization and religions are compelling overlapping and sometimes competing visions of what it means to live well In this perceptive deeply personal and beautifully written book a leading theologian sheds light on how religions and globalization have historically interacted and argues for what their relationship ought to be Recounting how these twinned forces have intersected in his own life he shows how world religions despite their malfunctions remain one of our most potent sources of moral motivation and contain within them profoundly evocative accounts of human flourishing Globalization should be judged by how well it serves us for living out our authentic humanity as envisioned within these traditions Through renewal and reform religions might in turn shape globalization so that can be about more than bread alone

Religion in the Context of Globalization Peter Beyer, 2013-07-24 Peter Beyer has been a central figure in the debate about religion and globalization for many years this volume is a collection of essays on the relation between religion and globalization with special emphasis on the concept of religion its modern forms and on the relation of religion to the state Featuring a newly written introduction and conclusion which frame the volume and offer the reader guidance on how the arguments fit together this book brings together ten previously published pieces which focus on the institutional forms and concept of religion in the context of globalizing and modern society The guiding theme that they all share is the idea that religion and globalization are historically conceptually and institutionally related What has come to constitute religion and what social roles religion plays are not manifestations of a timeless essence called religion or even a requirement of human societies In concept and institutional form religion is an expression of the historical process of globalization above all during modern centuries What religion has become is one of the outcomes of the successive transformations and developments that have brought about contemporary global society Including some of the most important theoretical work in the field of religion and globalization this collection provokes the reader to consider paths for future research in the area and will be of great interest to students and scholars of religion and politics globalization and religion and sociology

Globalization and Identity Majid Tehranian, B. Jeannie Lum, 2011-12-31 In the first decade of the twenty first century globalization and identity have emerged as the most critical challenges to world peace This volume of Peace Policy addresses the overarching question What are the effects of globalization in the areas of culture ethnic diversity religion and citizenship and how does terrorism help groups attain a sense of global identity Part I Citizenship in a Globalizing World reexamines globalization in light of the traditions from which human civilizations have evolved Linda Groff focuses on Samuel R Huntington's thesis that the Cold War would be followed by a clash of civilizations Joseph A Camilleri traces the history of the concept of citizenship and its transformation through the ages to modern times Kamran Mofid argues that the marketplace is not just an economic sphere but one where economic and business interests must embrace the spiritual assets of the community Majid Tehranian raises the problem of identity and advocates the assumption of global identity responsibility and citizenship Part II Convergence in Global Cultures explores the complex issues of diversity in religions Christopher Leeds Vladimir Korobov and Bharat Gupta show how the reconceptualization of the world both geographically and regionally can recreate new sensibilities needed to overcome differences Part III Divergence in Global Conflicts discusses the multiple dimensions of the globalizing effects of economic expansion and political strife experienced by different cultures at local and regional levels Audrey Kitigawa and Ade Ogunrinade use Nigeria as an example of political manipulation of religious and ethnic groups to divert attention from the real problems of social and economic marginalization Fred Riggs looks at how the Web has become a medium in the globalization of religious movements The authors maintain that continuing efforts for dialogue across cultural and religious boundaries in today's interreligious and interfaith organizations can become a force for healing

Globalization and Orthodox Christianity Victor Roudometof, 2013-10-15 With approximately 200 to 300 million adherents worldwide Orthodox Christianity is among the largest branches of Christianity yet it remains relatively understudied This book examines the rich and complex entanglements between Orthodox Christianity and globalization offering a substantive contribution to the relationship between religion and globalization as well as the relationship between Orthodox Christianity and the sociology of religion and more broadly the interdisciplinary field of Religious Studies While deeply engaged with history this book does

not simply narrate the history of Orthodox Christianity as a world religion nor does it address theological issues or cover all the individual trajectories of each subgroup or subdivision of the faith Orthodox Christianity is the object of the analysis but author Victor Roudometof speaks to a broader audience interested in culture religion and globalization Roudometof argues in favor of using globalization instead of modernization as the main theoretical vehicle for analyzing religion displacing secularization in order to argue for multiple hybridizations of religion as a suitable strategy for analyzing religious phenomena It offers Orthodox Christianity as a test case that illustrates the presence of historically specific but theoretically distinct glocalizations applicable to all faiths

Global Religions Mark Juergensmeyer, 2003-03-20 Can Islam be located on a map Is Europe the center of the Christian world Is India a Hindu nation While decades ago these questions were often answered in the affirmative the truth has never been that simple Not only are adherents of particular faiths spread across the globe but there are many variations of a particular faith practiced side by side This has only become more true in recent years as the pace of globalization has quickened The essays collected here provide brief and accessible introductions to the major world religions in their global contexts The volume begins with an introduction to the globalization of religion by Mark Juergensmeyer and is followed by individual essays on Christianity Islam Judaism Hinduism Buddhism and local religious societies The book concludes with three essays reflecting on the global religious scene Taken together these essays provide a concise authoritative and highly readable introduction to the state of worldwide religion in the 21st century
