Religion and Politics in Enlightenment Europe James E. Bradley, Dale K. Van Kley, 2001 This work shows that the collapse of the post reformation confessional state was more the result of religious dissent from within much of it orthodox than attacks of an anti religious Enlightenment In sharp contrast to the Reformation era religious conflicts which tended to pit Protestant and Catholic confessions and states against each other the 18th century religious conflicts described in this work took place within the various confessional establishments and states that founded and maintained them such as Russian Orthodoxy in the East and the Anglican Establishment in England and Ireland In the course of its analysis this work destroys the notion of any kind of privileged relationship between religion and political or social reaction This work reveals the religious roots of modern ideas of individual rights and limitations on government as well as the imperative of political order and the need for social hierarchy

Education, Politics and Religion James Arthur, Liam Gearon, Alan Sears, 2010-06-28 In recent years a number of popular books have savaged religion arguing it is a dangerous delusion that poisons human societies and relationships This is but the most recent manifestation of a secularising agenda that has been sweeping contemporary democratic societies since the Enlightenment This book pushes back against that agenda examining its key assumptions and arguing that the exclusion of religious people and ideas from education and the public square is both undemocratic and unwise For the most part the book

draws arguments and examples from Christianity the religious tradition of the authors but it recognises that many religions share the concerns and possibilities examined The book examines contemporary expressions of the secularising agenda in Western democracies with particular focus on how that is played out in education It demonstrates how republican theory understood within a faith perspective provides a shared understanding and substantive basis for education within a Western democracy It explores the historical connections and disconnections between religion and civic life in the West from ancient to contemporary times and examines religiously based civic action and pedagogical approaches contending both have the potential to contribute greatly to democracy It will be of value to any who are interested in exploring how democracies can include the voices of all their citizens the religious and the secular
