Educational Bilingualism Natalia A. Gunina,Radislav P. Millrood,2019-08-18 This volume focuses on the recent trend in English language pedagogy of educational bilingualism that is teaching English language contents and cultures in bilingual lessons It draws on the critical revision of the monolingual tradition of language instruction rooted in the outdated direct method once powerful at the turn of the 20th century The realities of education are that the English language is spreading to foreign lands circulating alongside native tongues functioning as a universal communication tool for multinational groups or individuals and emerging as a global language in education This book proves the hypothesis that in the epoch of information

breakthroughs and global migration the value of English in education lies in it being the key to innovative knowledge This leads to its integration with the learners own language providing alternative sources of information and marking cultural self identity

Cheering for Self James S. Vass Jr,James Vass Jr,2003-05-13 This book is a study of UW men s basketball fans during the 2001 2002 season and explores their proclivity to cheering for self during basketball events The term basketball event is used rather than basketball game to make clear that everything connected to and seen heard or experienced before during and after a basketball game is included The actual game itself is only part of the basketball event An undercurrent runs throughout this participant observation mini ethnography dealing with access and the relative quality of that access to basketball events being affected by ones age class race and gender The prominent role of advertising in shaping basketball events and helping to construct fans as consumers of products both commercial and institutional during the process of cheering for self is central to this idea Cheering for self is the activity engaged in by individual fans after they find things to
