The Meaning of Water Veronica Strang,2020-06-03 Water is the most valuable resource and the most passionately contested Drought has become an increasingly extreme problem in many parts of the world and it is predicted that 60% of the major cities in Europe will run short of water in the next decade In industrialized countries per capita water usage continues to rise intractably despite strenuous efforts by environmentalists and resource managers to encourage conservation Conflicts over water and environmental degradation from the overuse of resources are intensifying Water is not merely a physical resource in every cultural context it is densely encoded with social spiritual political and environmental meanings and these have a powerful effect upon patterns of water use and upon the relationships between water users and suppliers This book makes an in depth analysis of the meanings of water and considers how they are experienced and formed at an individual and societal level Focusing on the River Stour in Dorset Strang draws upon a wide range of data ethnographic research cultural mapping local archives and folklore She explores the controversies surrounding water ownership and management and the social and political questions raised by water privatization in the UK The topical nature of these issues and their global relevance make this book a vital contribution to contemporary research on water and an essential read for anyone with an interest in getting under the surface of one of the worlds most important social and environmental issues

Gender, Water and Development Anne Coles,Tina Wallace,2020-05-12 There is a renewed global commitment to water for all Yet even though women are usually responsible for domestic water provision their needs and voices continue to be marginalized in the development process A close analysis of current policy and practice shows that organizations providing improved water supplies to poor communities typically neglect the gendered nature of access to and control over water resources The resulting gender bias causes inefficiencies and injustices in water provision and reduces the effectiveness of well meant efforts This book shows how in different environmental historical and cultural contexts gender has been an important element in water provision It draws on a wide range of first hand material analyzed from different disciplinary perspectives Case studies include analysis of the role of water in inhibiting the fight against HIV AIDS

in southern Africa and the challenges of taking gender into account in large water projects in India and Nepal **Heathen Paths** Pete Jennings,2007 A detailed researched and inspired book on Norse and Anglo Saxon tradition Paganism This book is written from a different perspective to other books published on aspects of what is known variously as Asatru The Northern Tradition and Odinism to present a handbook of accumulated data so that people can read and interpret it for themselves aided by sometimes conflicting or complementary opinions clearly labelled enabling the reader to develop and adapt their own theories and practices rather than have them laid out by someone else Where possible Pete compares more than one source of information Trying to subjectively observe a movement from within whilst being a part of it oneself is a delicate path to tread but in this book Pete does an admirable job separating them from the historical data being presented

Liminal Images Alex Woodcock,2005 The presence of unusual grotesque and rude carvings on ecclesiastical buildings have been explained in a number of ways from reflecting the warped sense of humour of the masons to a purely ornamental or marginal function However in this study of medieval sculpture from southern England Alex Woodcock suggests that imagery should be seen in the same way as the buildings themselves as liminal spaces mediating between the human mortal world and the sacred and unknown In examining various distorted and foliate heads grotesques mythical creatures beasts and so on Woodcock argues that these are wholly appropriate images for medieval religious life reflecting the ambiguous and the unclassifiable in an unknown realm whilst also having an apotropaic function Placing emphasis on liminality the study focuses in particular on heads severed foliate and otherwise and whole figures humans animals and hybrids including detailed studies of the siren and mermaid **Crystals and Sacred Sites** Judy Hall,2012-11 Crystals and Sacred Sites teaches you how to tap into the healing energy of sites from around the world using the power of crystals and sacred stones

The British National Bibliography Arthur James Wells,2000 **The New Werner Twentieth Century Edition of the Encyclopaedia Britannica** ,1905 *Celtic Women's Spirituality* Edain McCoy,1998 The Celts provide strong accessible images of powerful women This work illustrates how the reader can create a personalized pathway linking two important aspects of self the feminine and the hereditary or adopted Celt and as a result enable her to become a whole powerful woman **The Encyclopædia Britannica** ,1905 *The Encyclopædia Britannica* Thomas Spencer Baynes,1891

The Encyclopædia Britannica Thomas Spencer Baynes,1890 **Anglo-American Encyclopedia** ,1910 *The Boy's Own Annual* ,1906 **The Literary American** George Payn Quackenbos,1849 *The Literary World* ,1901 *The View Over Atlantis* John Michell,1975 *The Economist* ,1867 **Albion** Jennifer Westwood,1985 *Bulletin of the Atomic Scientists* ,1970-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world
