The New Cambridge Bibliography of English Literature George Watson, Ian Roy Willison, 1974 **Shakespeare in Hollywood, Asia, and Cyberspace** Alexander Cheng-Yuan

Huang, Charles Stanley Ross, 2009 *Shakespeare in Hollywood Asia and Cyberspace* shows readers how ideas of Asia operate in Shakespeare performances and how Asian and Anglo European forms of cultural production combine to transcend the mode of inquiry that focuses on fidelity. The result is a new creativity that finds expression in different cultural and virtual locations including recent films and massively multiplayer online games such as *Arden The World of Shakespeare*. The papers in this volume provide a background for these modern developments showing the history of how Shakespeare became a signifier against which Asian and Western cultures defined and continue to define themselves. Hollywood films and a century of Asian readings of plays such as *Hamlet* and *Macbeth* are now conjoining in cyberspace making a world of difference in how we experience Shakespeare. The papers written by experts in the field provide an introduction to the diverse incarnations and bold sequences of screen and stage that in recent decades have produced new versions of Shakespeare's great comedies and tragedies and new ways of experiencing them. Authors in the first part of the collection examine body politics and race in Hollywood Shakespearean films and film techniques. It complements the second part of the book in which the history of Shakespearean readings and stagings in China, Indonesia, Cambodia, Japan, Okinawa, Taiwan, Malaya, Korea, and Hong Kong are discussed. Papers in the third part of the volume contain analyses of the transformation of the idea of Shakespeare in cyberspace, a rapidly expanding world of new rewritings of both Shakespeare and Asia. Together the three sections of this comparative study show how Asian cultures and Shakespeare affect each other, how one culture is translated to another.

Shakespeare's Language in Digital Media Janelle Jenstad, Mark Kaethler, Jennifer Roberts-Smith, 2017-12-22

The authors of this book ask how digital research tools are changing the ways in which practicing editors historicize Shakespeare's language. Scholars now encounter, interpret, and disseminate Shakespeare's language through an increasing variety of digital resources including online editions such as the Internet Shakespeare Editions (ISE), searchable lexical corpora such as the Early English Books Online Text Creation Partnership (EEBO-TCP) or the Lexicons of Early Modern English (LEME), high quality digital facsimiles such as the Folger Shakespeare Library's Digital Image Collection, text visualization tools such as Voyant apps for reading and editing on mobile devices, and more. What new insights do these tools offer about the ways Shakespeare's words made meaning in their own time? What kinds of historical or historicizing arguments can digital editions make about Shakespeare's language? A growing body of work in the digital humanities allows textual critics to explore new approaches to editing in digital environments and enables language historians to ask and answer new questions about Shakespeare's words. The authors in this unique book explicitly bring together the two fields of textual criticism and language history in an exploration of the ways in which new tools are expanding our understanding of Early Modern English.
