Shaping Globalization:

Shaping Globalization Nicanor Perlas, 2019-03-25 Civil Society has become a major power in the world The stunning defeat of the controversial and secretive Multilateral Agreement on Investments the massive worldwide WTO protests and the yearly meetings of the World Social Forum are testimony to its coming of age From these significant victories civil society continued to catch world attention with the Arab Spring the grassroots movement that helped elect former US President Barack Obama and the significant gains of the anti fracking campaign With tens of millions of citizens and over a trillion dollars involved in advancing its agenda civil society now joins the state and the market as the third key institution shaping globalization However it cannot fully mobilize its resources and power as it currently lacks clear understanding of its identity Shaping Globalization argues that global civil society is a cultural institution wielding cultural power and shows how through the use of this distinct power it can advance its agenda in the political and economic realms of society without compromising its identity Nicanor Perlas outlines the strategic implications for civil society both locally and globally and explains that civil society s key task is to inaugurate threefolding the forging of strategic partnerships between civil society government and business Such authentic tri sector partnerships are essential for advancing new ways for nations to develop and for charting a different sustainable type of globalization Using the model of the Philippine Agenda 21 we are shown how civil society and progressive individuals and agencies in government and business are demonstrating the effectiveness of this new understanding to ensure that globalization benefits the environment the poor and society as a whole This reprinted edition includes a new Afterword

Towards a Better Global Economy Franklin Allen, Jere R. Behrman, Nancy Birdsall, Shahrokh Fardoust, Dani Rodrik, Andrew Steer, Arvind Subramanian, 2014-09-04 Substantial progress in the fight against extreme poverty was made in the last two decades But the slowdown in global economic growth and significant increases in income inequality in many developed and developing countries raise serious concerns about the continuation of this trend into the 21st century The time has come to seriously think about how improvements in official global governance coupled with and reinforced by rising activism of global citizens can lead to welfare enhancing and more equitable results for global citizens through better national and international policies This book examines the factors that are most likely to

facilitate the process of beneficial economic growth in low middle and high income countries It examines past present and future economic growth demographic changes the hyperglobalization of trade the effect of finance on growth climate change and resource depletion and the sense of global citizenship and the need for global governance in order to draw longer term implications identify policy options for improving the lives of average citizens around the world and make the case for the need to confront new challenges with truly global policy responses The book documents how demographic changes convergence and competition are likely to bring about massive shifts in the sectoral and geographical composition of global output and employment as the center of gravity of the global economy moves toward Asia and emerging economies elsewhere It shows that the legacies of the 2008 09 crisis high unemployment levels massive excess capacities and high debt levels are likely to reduce the standard of living of millions of people in many countries over a long period of adjustment and that fluctuations in international trade financial markets and commodity prices as well as the tendency of institutions at both the national and international level to favor the interests of the better off and more powerful pose substantial risks for citizens of all countries The chapters and their policy implications are intended to stimulate public interest and facilitate the exchange of ideas and policy dialogue **Urban Geography in America, 1950-2000** Brian J.L Berry,James
