Nature Writing Don Scheese, 2013-10-28 In this comprehensive study of the genre Don Scheese traces its evolution from the pastoralism evident in the natural history observations of Aristotle and the poetry of Virgil to current American writers He documents the emergence of the modern form of nature writing as a reaction to industrialization Scheese s personal observations of natural settings sharpen the reader s understanding of the dynamics between author and locale His study is further informed by ample use of illustrations and close readings core writers such as Thoreau John Muir and Mary Austin showing how each writer s work exemplifies the pastoral tradition and celebrate a spirit of place in the United States

these American icons The Toughest Kid We Knew Frank Bergon,2020-06-15 Frank Bergon s newest work is a thoughtful exploration of the ways that memories of random childhood events become unexpected revelations about life in the West In many senses this project is a personalized version of Two Buck Chuck The Marlboro Man where Bergon explored the ways that a multiethnic and multiracial society shaped and continues to shape the day to day lived realities of the residents and communities of the San Joaquin Valley Bergon s latest book creation however is more elegiac in tone paying tribute to ranching and farming lives that are disappearing under suburban and exurban sprawl industrial farming and white collar job growth *Our Preposterous Use of Literature* Tracy Scott McMillin,2000 He examines the ways in which Emerson s texts have been read in the United States the myriad methods by which those texts have been pillaged picked over and repackaged in a word consumed by biographers political apologists self help proponents entrepreneurs and academicians alike The World of John Burroughs Edward Kanze,1999 Born in 1837 in the Catskill Mountains of New York State and a longtime resident of the Hudson River Valley Burroughs spent his life studying the natural world His powerful verbal landscapes and philosophical insights into the natural world during the height of the Industrial Revolution were read by hundreds of thousands of people from powerful industrialists to countless schoolchildren He counted among his friends the poet Walt Whitman the pioneering preservationist President Teddy Roosevelt Thomas Edison and Andrew Carnegie Henry Ford whose own farmland upbringing Burroughs s writing recalled not only gave the writer a Model T car and went camping with him but also purchased his boyhood homestead which Burroughs and other relatives were having trouble maintaining and deeded it to his friend Author Ed Kanze himself a naturalist writer and photographer sheds new light on Burroughs s enormous contribution to how we think about our environment His biographical text is enhanced by many quotations from Burroughs s essays and poems and uniquely by conversations with Burroughs s granddaughter who contributed numerous affectionate recollections of her grandfather as well as many archival photographs of him his farm and woodland writing studio Slabsides and family and friends including Muir Roosevelt Ford Edison and others The text is further enlivened with crisp color photographs by Ed Kanze that evoke the landscapes Burroughs knew and loved and the many birds animals and plants that he wrote about with such intimacy and feeling Burroughs s world truly comes alive again in the words and pictures of this book **Back from the Far Field** Bernard W. Quetchenbach,2000 Many poets writing after World War II have found the individual focus of contemporary poetics poorly suited to making statements directed at public issues and public ethics The desire to invest such individualized poetry with greater cultural authority presented difficulties for Vietnam protest poets for example and it has been a particular challenge for nature writers in the Thoreau tradition who have attempted to serve as advocates for the natural world Examining the implications of this dilemma Bernard W Quetchenbach locates the poets Robert Bly Gary Snyder and Wendell Berry within two traditions the American nature writing tradition and the newer tradition of contemporary poetics He compares the work of two other twentieth century poets Robinson Jeffers and Theodore

Roethke to illustrate how the contemporary shift toward a poetics focused on the poet's life has affected portrayals of nature and the public voice in poetry. Turning back to the work of Bly, Snyder and Berry, Quetchenbach assesses their attempts to reinvent the public voice in the context of contemporary poetics and what effect these attempts have had on their work. He argues that these poets have learned from their postwar generation techniques for adapting a personalized poetics to environmental advocacy. In addition to modifying what critics have called the poetics of immediacy, these poets have augmented their poetic output with prose and identified themselves with long-standing traditions of poetic, ethical, and spiritual authority. In doing so, Bly, Snyder and Berry have attempted to solve not only a problem inherent in contemporary poetics but also the larger problem of the role of the poet in a society that does not recognize poetry. While it would be an overstatement to suggest that these three figures have found a place for the poet in American life, they have reached audiences that extend beyond traditional readers of poetry. At the end of the twentieth century, Quetchenbach concludes, poets have begun to identify and direct their writing to specific audiences defined less by aesthetic preferences and more by a shared interest in and dedication to the work's subject matter. Whether revealing a disturbing trend for poetry or an encouraging one for environmentalism and other political causes, it is one of many provocative conclusions. Quetchenbach draws from his examination of postwar nature poetry. *Digressions in Deep Time* Declan Lloyd, Warren

Mortimer, 2024-06-18. Deep time is a term which attempts to capture temporal scales far beyond human comprehension. These are stretches of time epitomised by geological and cosmic scale processes vast enough to make the entirety of human existence appear as little more than a footnote. The past few years have seen a boom in texts dedicated to the study of deep time extending across a broad range of disciplines which fall markedly outside of its geological roots. These studies are unified by two ideas in particular: that deep time thinking and ecocriticism should be considered in conjunction, and that literature and the arts play a vital role in fostering a deep time awareness. *Digressions in Deep Time* is the first collection of essays which considers the multifarious representations of deep time across literature and the arts, assembling the work of a wide range of prominent scholars whose research frequently engages with temporality and ecocriticism. Featured contributions include work by the Pulitzer prize-winning author John McPhee who popularised the term deep time in the late seventies, as well as chapters by Richard Irvine, author of *An Anthropology of Deep Time*, Benjamin Morgan, author of *The Outward Mind*, and Andrew Tate, author of *Apocalyptic Fiction*. *Dramas of Solitude* Randall Roorda, 1998-02-26. Brings the insights of narrative theory to bear upon the genre of nature writing to explore the social or ethical purposes of solitude in stories of retreat in nature. *Zen and the Brain* James H. Austin, 1999-06-04. A neuroscientist and Zen practitioner interweaves the latest research on the brain with his personal narrative of Zen. Aldous Huxley called humankind's basic trend toward spiritual growth the perennial philosophy. In the view of James Austin, the trend implies a perennial psychophysiology because awakening or enlightenment occurs only when the human brain undergoes substantial changes. What are the peak

experiences of enlightenment How could these states profoundly enhance and yet simplify the workings of the brain Zen and the Brain presents the latest evidence In this book Zen Buddhism becomes the opening wedge for an extraordinarily wide ranging exploration of consciousness In order to understand which brain mechanisms produce Zen states one needs some understanding of the anatomy physiology and chemistry of the brain Austin both a neurologist and a Zen practitioner interweaves the most recent brain research with the personal narrative of his Zen experiences The science is both inclusive and rigorous the Zen sections are clear and evocative Along the way Austin examines such topics as similar states in other disciplines and religions sleep and dreams mental illness consciousness altering drugs and the social consequences of the advanced stage of ongoing enlightenment
