Shell Guide To Yacht Navigation:

The Shell Guide to Yacht Navigation John O. Coote,1987-01-01 **Cruising (With) Class** Stan Zimmerman,2007-02-26

Many beginning sailors soon yearn for a larger boat with a galley head and berths so they can extend their time on the water and range of action However the simple mechanics of sailing do not include the variety of arts necessary to cruise successfully Cruising with Class began as a series of lectures at the Sarasota Florida Sailing Squadron with the intention of teaching basic skills to beginning cruisers Comfort on the water is not a matter of soft cushions It comes from confidence in the ability to voyage safely Reading the weather planting the anchor calculating the tides navigating a coast avoiding fatigue choosing equipment coping with storms reacting to disasters these are the arts of a cruiser Although the book calls on the author s 25 years of cruising small sailboats it is not a travelogue Instead it is a precise iteration of lessons learned the hard way and presented in sailor to sailor fashion so others can avoid disaster and find comfort bred in confidence on the water

Breaking the Shell Joseph H. Genz,2018-02-28 On the atoll of Rongelap in the northern seas of the Marshall Islands apprentice navigators once learned to find their way across the ocean by remotely sensing how islands transform the patterning of swell and currents Renowned for their instructional stick charts that model and map the interplay of islands and waves these students of wave piloting techniques embarked on trial voyages to ruprup jo kur a Marshallese expression roughly translated as breaking the shell of the turtle which would confer their status as navigators These traditional practices already in decline with imposing colonial occupations came to an abrupt halt with the Cold War era nuclear weapons testing program conducted by the United States The residents and their descendants are still trying to recover from the myriad environmental biological social and psychological impacts of the nuclear tests Breaking the Shell presents the journey of Captain Korent Joel who having been forced into exile from the near apocalyptic thermonuclear Bravo test of 1954 has reconnected to his ancestral maritime heritage and forged an unprecedented path toward becoming a navigator Paralleling the Hawaiian renaissance that centered on Nainoa Thompson learning from Satawalese navigator Mau Piailug the beginnings of the Marshallese voyaging revitalization a collaborative community based project spanning the fields of anthropology history and oceanography involved blending scientific knowledge systems resolving ambivalence in nearly forgotten navigational techniques and deftly negotiating cultural protocols of knowledge use and transmission Through Captain Korent s own voyaging trial he and a group of surviving mariners from Rongelap are against one of the darkest hours

in human history breaking the shell of their prime identity as nuclear refugees to begin recovering their most intimate of connections to the sea Ultimately these efforts would inaugurate the return of the traditional outrigger voyaging canoe for the greater Marshallese nation an achievement that may work toward easing ethnic tensions abroad and ensure cultural survival in their battle against the looming climate change induced rising ocean Drawing attention to cultural rediscovery revitalization and resilience in Oceania the Marshallese are once again celebrating their existence as a people born to the rhythms of the sea
