Mon-Khmer Studies XI Philip N. Jenner, 1982 **Journal of Southeast Asian Languages and Culture** Philip N. Jenner, 2002 The Languages and Linguistics of Mainland Southeast Asia Paul Sidwell, Mathias Jenny, 2021-08-23 The handbook will offer a survey of the field of linguistics in the early 21st century for the Southeast Asian Linguistic Area. The last half century has seen a great increase in work on language contact, work in genetic, theoretical and descriptive linguistics, and since the 1990s especially documentation of endangered languages. The book will provide an account of work in these areas focusing on the achievements of SEAsian linguistics as well as the challenges and unresolved issues and provide a survey of the relevant major publications and other available resources. We will address: Survey of the languages of the area organized along genetic lines with discussion of relevant political and cultural background issues; Theoretical, descriptive and typological issues; Genetic classification and historical linguistics; Areal and contact linguistics; Other areas of interest such as sociolinguistics, semantics, writing systems etc. Resources: major monographs and monograph series, dictionaries, journals, electronic data bases etc. Grammar sketches of languages representative of the genetic and structural diversity of the region.

The Handbook of Austroasiatic Languages (2 vols), 2014-12-04. The Handbook of the Austroasiatic Languages is the first comprehensive reference work on this important language family of South and Southeast Asia. Austroasiatic languages are spoken by more than 100 million people from central India to Vietnam, from Malaysia to Southern China, including national languages Cambodian and Vietnamese and more than 130 minority communities, large and small. The handbook comprises two parts: Overviews and Grammar Sketches. Part 1: The overview chapters cover typology, classification, historical reconstruction, plus a special overview of the Munda languages. Part 2: Some 27 scholars present grammar sketches of 21 languages representing 12 of the 13 branches. The sketches are carefully prepared according to the editors' unifying typological approach, ensuring analytical and notational comparability throughout. *Lost Tongues of the Red River* John D. Phan, 2025-03-04. Among the world's languages, Vietnamese provides unique insight into the cosmopolitan dynamism of premodern Asia. Modern notions of language history are often constrained by nationalist narratives focused on bolstering a particular nation's social, cultural or political identities. A closer look at the Vietnamese language reveals a rich record of interaction and transformation that does not fit easily within modern nation-state lines or boundaries. By employing philological, textual and comparative linguistic methodologies, John D. Phan uncovers the history of a Sinitic language rooted in the Red River Plain of northern Vietnam, which he calls Annamese Middle Chinese. The life and death of this language stimulated dramatic transformations in the speech of the region, ultimately giving rise to a new and alloyed language over the early centuries of the second millennium Vietnamese. Drawing connections among linguistic, demographic, intellectual and cultural realities over time, Phan traces the story of the emergence of Vietnamese within the broader context of a cosmopolitan East and Southeast Asia. *Lost Tongues of the Red River* demonstrates how language forms a surprisingly

intimate record of human interaction one with unique potential to enrich and expand our understanding of the distant past

Mon-Khmer: Peoples of the Mekong Region Ronald D. Renard, Kr. Anchalee Singhanetra Renard, 2015-03-01 The Mon Khmer project took a long journey before it was turned into a final product the first comprehensive collection of articles on Mon Khmer peoples of the Mekong Region The project was started in 2001 by the first editor of the book Dr Ronald D Renard who unfortunately did not see the final product of his valuable work During 1995 1996 Dr Ron Renard as the manager of the UNDP Highland People project and I travelled to Northeast Cambodia Vietnam and Laos to explain to representatives of ethnic communities the aim of the project and how the ethnic minorities many of whom are Mon Khmer could be involved and benefit from it It may well be that this encounter with these ethnic groups made him expand his intellectual interest to study them in addition to the Karen in Thailand whose history of integration into the Siamese state he had studied for his dissertation completed in 1980 According to my last conversation with Ron it was during the time when he worked for the Journal of Siam Society in the late 1990s that he decided to embark upon the Mon Khmer project which preoccupied the last part of his academic life

The Languages of Mainland Southeast Asia N. J. Enfield, 2021-04-01 Mainland Southeast Asia is one of the most fascinating and complex cultural and linguistic areas in the world This book provides a rich and comprehensive survey of the history and core systems and subsystems of the languages of this fascinating region Drawing on his depth of expertise in mainland Southeast Asia Enfield includes more than a thousand data examples from over a hundred languages from Cambodia China Laos Malaysia Myanmar Thailand and Vietnam bringing together a wealth of data and analysis that has not previously been available in one place Chapters cover the many ways in which these languages both resemble each other and differ from each other and the diversity of the area's languages is highlighted with a special emphasis on minority languages which outnumber the national languages by nearly a hundred to one The result is an authoritative treatment of a fascinating and important linguistic area

The Languages and Linguistics of South Asia Hans Henrich Hock, Elena Bashir, 2016-05-24 With nearly a quarter of the world's population members of at least five major language families plus several putative language isolates South Asia is a fascinating arena for linguistic investigations whether comparative historical linguistics studies of language contact and multilingualism or general linguistic theory This volume provides a state of the art survey of linguistic research on the

languages of South Asia with contributions by well known experts Focus is both on what has been accomplished so far and on what remains unresolved or controversial and hence offers challenges for future research In addition to covering the languages their histories and their genetic classification as well as phonetics phonology morphology syntax and sociolinguistics the volume provides special coverage of contact and convergence indigenous South Asian grammatical traditions applications of modern technology to South Asian languages and South Asian writing systems An appendix offers a classified listing of major sources and resources both digital online and printed

Case, Typology, and Grammar Anna Siewierska, Jae Jung Song, 1998-01-01 The present volume is a collection of fifteen original articles that include descriptive typological and or theoretical studies of a number of morphosyntactic phenomena such as case transitivity grammaticalization valency alternations etc in a variety of languages or language groups and discussions concerning theoretical issues in specific grammatical frameworks The collection written in honor of the Australian linguist Barry J Blake on his 60th birthday thematically reflects the field that Professor Blake has worked in over the past three decades The volume will be of special interest to researchers in morphosyntax and linguistic typology In addition scholars in discourse grammar historical linguistics theoretical syntax semantics language acquisition and language contact will find articles of interest in the book

A Guide to Austroasiatic Speakers and Their Languages Robert Parkin, 1991 Ideophones Erhard Friedrich Karl Voeltz, Christa Kilian-Hatz, 2001-01-01 The present volume represents a selection of papers presented at the International Symposium on Ideophones held in January 1999 in St Augustin Germany They center around the following hypotheses Ideophones are universal and constitute a grammatical category in all languages of the world ideophones and similar words have a special dramaturgic function that differs from all other word classes they simulate an event an emotion a perception through language In addition to this unique function a good number of formal parallels can be observed The languages dealt with here display strikingly similar patterns of derivational processes involving ideophones An equally widespread common feature is the introduction of ideophones via a verbum dicendi or complementizer Another observation concerns the sound symbolic behavior of ideophones Thus the word formation of ideophones differs from other words in their tendency for iconicity and sound symbolism Finally it is made clear that ideophones are part of spoken language the language register where gestures are used rather than written language

The Effects of Duration and Sonority on Countour Tone Distribution Jie Zhang, 2013-12-16 First Published in 2002 Part of the Outstanding Dissertations in Linguistics series this is an in depth investigation of the effects of duration and sonority on contour tone distribution The term tone language usually refers to languages in which the pitch of a syllable serves lexical or grammatical functions In some tone languages the contrastive functions of pitch are sometimes played by pitch changes within a syllable Pitch changes of this kind are called contour tones The distribution of contour tones in a language are when under what phonological contexts contour tones are more readily realized

Linguistics of Vietnamese Daniel Hole, Elisabeth

Löbel,2013-05-28 The present collection of articles grew out of a workshop on Vietnamese linguistics in 2009 at the University of Stuttgart Germany To our knowledge no workshop with a comparable scope has been held outside of Vietnam for the past 20 years or even longer Given the important typological status of Vietnamese as a paradigm case of an isolating language the volume covers the most relevant fields in linguistics syntax semantics phonology and the lexicon A guiding principle in assembling the chapters for this volume has been to take an inclusive stance as far as the commitment to different frameworks and research methodologies is concerned All the contributors are proponents of recent developments in their individual areas of specialization The editors have taken special care to cater for a readership which should be as broad as possible This means that each contribution is self contained and does not presuppose any knowledge of Vietnamese The volume is recommended to general linguists comparative linguists typologists and to researchers specializing in languages of East and South East Asia The Oxford Handbook of Historical Phonology Patrick Honeybone,Joseph

Salmons,2015-11-26 This book presents a comprehensive and critical overview of historical phonology as it stands today Scholars from around the world consider and advance research in every aspect of the field In doing so they demonstrate the continuing vitality and some continuing themes of one of the oldest sub disciplines of linguistics The book is divided into six parts The first considers key current research questions the early history of the field and the structuralist context for work on segmental change The second examines evidence and methods including phonological reconstruction typology and computational and quantitative approaches Part III looks at types of phonological change including stress tone and morphophonological change Part IV explores a series of controversial aspects within the field including the effects of first language acquisition the status of lexical diffusion and exceptionless change and the role of individuals in innovation Part V considers theoretical perspectives on phonological change including those of evolutionary phonology and generative historical phonology The final part examines sociolinguistic and exogenous factors in phonological change including the study of change in real time the role of second language acquisition and loanword adaptation The authors who represent leading proponents of every theoretical perspective consider phonological change over a wide range of the world s language families The handbook is in sum a valuable resource for phonologists and historical linguists and a stimulating guide for their students *Gender* Greville G. Corbett,1991-04-26 Surveys gender across a range of languages For class use and as a reference resource for students and researchers in linguistics *Oral Traditions of Southeast Asia and Oceania* Herman C.

Kemp,2004 The Acehnese Language and Society: Language and Linguistics Maya Safhida, dkk,2022-10-27 Indonesia is a pluralistic nation consisting of various ethnic groups throughout the country Each tribe has its own language to communicate both among ethnic and inter ethnic groups Language has an important role as a means of communication for humans to convey their intentions and ideas and express themselves in interactions in society The Acehnese language is one of the regional languages in Aceh Province one of the provinces out of 37 provinces in Indonesia This language is one of the

languages with the largest number of speakers in the province It dominates in the acquisition of the language of the people in Aceh However until now few people know about the fundamentals of the Acehnese language Structurally the Acehnese language has many unique features One of its uniqueness is the phonological aspect or the sound of the language The Acehnese language has a higher number of phonemes when compared to other regional languages in Aceh even Indonesian Another of its uniqueness for example is in the aspect of vocabulary and how some word differences are seen in the varieties of Acehnese spoken throughout the province country and even those speakers who reside in other countries There are also many social factors in Acehnese society that affect the meaning of a particular word or phrase in this language Therefore we had invited researchers and practitioners to contribute to writing the book The Acehnese Language and Society as part of the Universitas Syiah Kuala Press Book Series Language and Linguistics Notes on Linguistics ,1991 *Iconicity in Cognition and across Semiotic Systems* Sara Lenninger, Olga Fischer, Christina Ljungberg, Elżbieta Tabakowska, 2022-11-15 This volume investigates iconicity as to both comprehension and production of meaning in language gesture pictures art and literature It highlights iconic processes in meaning making and interpretation across different semiotic systems at structurally historically and pragmatically different levels of iconicity with special focus on Cognitive Semiotics Exploring the ubiquity of iconicity in verbal visual and gestural communication these contributions discuss it from the point of view of human meaning making examined as a phenomenon that is experienced embodied and often polysemiotic in nature
