market dynamics of asset prices Presenting a range of analytical empirical and numerical techniques as well as several different modeling approaches the authors depict the state of debate on the market selection hypothesis By explicitly assuming the heterogeneity of investors they present models that are descriptive and normative as well making the volume useful for both finance theorists and financial practitioners Explains the market dynamics of asset prices offering insights about asset management approaches Assumes a heterogeneity of investors that yields descriptive and normative models of portfolio selections and asset pricing dynamics *Contemporary Economic Geographies* Jennifer Johns, Sarah Marie Hall, 2025-05-20 The subdiscipline of economic geography has a long and varied history and recent work has pushed the field to diversify even further This collection takes this agenda forward by showcasing inspiring critical and plural perspectives for contemporary economic geographies Highlighting the contributions of global scholars the thirty chapters showcase fresh ways of approaching economic geography in research teaching and praxis With sections on thought leaders contemporary critical debates and future research agendas this collection calls for greater openness and inclusivity *Contemporary Economic Theory* Andriana Vlachou, 2016-07-27 Leading international scholars challenge neoliberalism on its assumptions way of reasoning and empirical evidence In particular they discuss critically from the standpoint of radical perspectives the issues of limiting the state and privatization inflation and unemployment and the possibility of a socialist society They also discuss the current project for the monetary and economic union EMU of Europe considered as an application of neoliberalism They assess and question the internal market the common currency and central bank independence and investigate alternatives to the EMU project and the marketization agenda Analytical Political Economy Roberto Veneziani, Luca Zamparelli, 2018-06-11 Offering a unique picture of recent developments in a range of non conventional theoretical approaches in economics this book introduces readers to the study of Analytical Political Economy and the changes within the subject Includes a wide range of topics and theoretical approaches that are critically and thoroughly reviewed Contributions within the book are written according to the highest standards of rigor and clarity that characterize academic work Provides comprehensive and well organized surveys of cutting edge empirical and theoretical work covering an exceptionally wide range of areas and fields Topics include macroeconomic theories of growth and distribution agent based and stock flow consistent models financialization and Marxian price and value theory Investigates exploitation theory trade theory the role of expectations and animal spirits on macroeconomic performance as well as empirical research in Marxian economics *Commodity Tax Harmonization in the European Community* Andreas Haufler, 2012-12-06 The book is concerned with the main issues that arise for general commodity taxation in the internal market the choice of a new international tax principle and the question of tax rate harmonization The book provides a thorough discussion of these issues and evaluates the choices made by the European Community from a welfare theoretic perspective by comparing them to feasible alternatives The discussion integrates a large number of recent theoretical and policy oriented contributions

which have so far not been collected and summarized in a single volume Special features of the book are that a the analysis combines elements of international trade theory and public finance two economic disciplines which are rarely integrated b a dual general equilibrium framework is used throughout the analysis c a second best setting is consistently employed incorporating relevant policy constraints and integrating conflicting arguments in a single analytical framework d part of the theoretical analysis is supplemented by a computable general equilibrium approach The book shows that well known international trademodels can be extended to model alternative principles for taxing international trade but also international differences in preferences for public goods and different views of government behavior issues which are directly relevant for the discussion of tax rateharmonization but are rarely treated in an analytical way

Foundations of European Central Bank Policy Wolfgang Gebauer,2013-03-09 European central bank policy is already taking place today in an informal way It comprises in short European exchange rate management and interest rate policy decisions within and without the European Monetary System EMS A focal point of such policy actions are the money market operating targets of European Central Banks Those central bank policies appear to be dominated however by the Deutsche Bundesbank This has caused recurring critical discussion of European asymmetries and German leadership in monetary stabilization pOlicies before and after the EMS turbulences of September 1992 However it should be pointed out that German dominance has increasingly evolved in a cooperative way ever since the Committee of European Central Bank Governors began to meet regularly in 1964 the Basle Nyborg accord of 1987 formed a further stage of cooperative efforts within the EMS Presently a small group of countries including Benelux and Austria generally follows after prior concertation German monetary policy patterns In this narrow sense there exists a European central bank policy within a Deutsche Mark Zone In a broader sense European central bank policy is shaped after proper consultation by monetary cooperation between the larger EMS countries but once again dominantly influenced by Germany recent problems of highjnterest rates in France and elsewhere due to relative restrictive German monetary pOlicies are striking examples German monetary dominance in the narrow or broad sense obviously creates in the long run an untenable situation in the eyes of European partner countries
